PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 7+ years of experience in front-end and back-end scenarios. Highly skilled in MEVN/MERN stacks with a strong background deploying business-ready applications on Azure/AWS. Focused on delivering scalable, user-centric solutions. Proficient in building AI and machine learning architectures in PyTorch. Excellent UI/UX design skills. Skilled in finance, with expertise in fixed income, bond markets, and other complex financial instruments.

SKILLS

Languages	JS , NodeJS , Python , HTML, CSS, C, C# NET, Java, Unity, Shell, PS
Databases	MongoDB , SQL , TSQL, NoSQL, Azure Managed SQL
Frameworks and tools	VueJS , React , ThreeJS , D3, GIT, SocketIO, NPM, VIM, Keras, Numpy, Pandas, Django
Cloud Tools	Azure DevOps/Functions, AWS EC2/Lambda/SES, Docker, Nginx, Caddy, Cisco, Meraki

RECENT WORK EXPERIENCE

Oracle – Sr. Applications Engineer

Remote – Nov 2024 to Present

- Developing and optimizing features for Oracle’s Supply Chain Management (SCM) software using JS and Oracle Visual Builder Studio, ensuring high performance and scalability.
- Building intuitive, user-centric interfaces following Oracle’s Redwood design principles, HTML, and CSS for seamless user experiences.
- Implementing end-to-end (E2E) testing frameworks using Python, Selenium, ensuring application robustness.

Angel Oak Capital Advisors, LLC – Sr. Full-Stack Developer

Georgia – Feb 2022 to May 2024

- [Developed AI/ML models](#) and financial visualization tools using Python, Node, and SQL to assess bank health, ESG compliance, and prepayment risk for non-QM mortgages.
- Built tools in Electron automating financial dashboard creation, enhancing productivity and enabling rapid, data-driven insights.
- Utilized Azure DevOps, Grunt, and Webpack to streamline robust development CI/CD pipelines.
- **Tangible results:** Delivered up to 8 internal tools and a [public website](#) (landing and dashboard past login screen) in production and driving client engagement. Read my blog publication [here](#).

Rainbow Design Services, Inc – Sr. Software Developer

Kentucky – Mar 2021 to Feb 2022

- Introduced new UI/UX features in Unity and C# NET, enhancing application stability and user experience.
- Developed GIS functionalities to visualize optic fiber layouts citywide, providing practical end-user features and improving spatial data analysis capabilities.
- Improved CI/CD environments with Shell scripting, resulting in faster and more reliable deployment processes.
- **Tangible results:** Resolved numerous bugs and added advanced GIS features to applications used by ISPs.

The Vanguard Group, Inc – Contract Software Developer

Pennsylvania – Jun 2019 to Jun 2020

- Developed *Vanguard’s Financial Advisors - Insights page* in Vue and Express enhancing user engagement and information accessibility for hundreds of financial advisors monthly.
- Built unit and end-to-end tests with Cypress, Jest, Mocha, and Chai.js, integrating them into the CI/CD pipeline to improve code reliability and deployment efficiency.
- **Tangible results:** The [Insight’s public webpage](#), and several bugfix commits. Read my blog publication [here](#).

NOTABLE PERSONAL PROJECTS

- **EyeMouse:** Developed a head-mounted assistive device enabling computer control via eye movement. Secured seed funding from the State Technology and Research Council to support R&D and prototyping.
- **GPT TEN LLC:** Founder and Tech Lead of a low-code workflow automation platform, enabling businesses to build and deploy AI-driven processes through a visual programming interface. See [website](#).
- **Lumston:** Co-founder and Tech Lead of a software company recognized among the top 20 Great Places to Work in the state, overseeing product development and engineering strategy.
- **Linux Kernel Development:** Internship in Intel, contributing to the W83627EHF temperature sensor driver used in Intel ATOM devices.

CERTIFICATIONS AND COURSES

- Microsoft Certified: Azure [Artificial Intelligence](#) (AI-900)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- MIT xPRO Leading Teams
- MongoDB for Database Administrators
- Neural Networks and Deep Learning
- O'Reilly - Choosing the right LLM
- Certified Oracle Redwood Application Associate
- Professional Certificate in AR-VR Development by NYU University
- HarvardX - PH125.8x: Data Science: [Machine Learning](#)
- MongoDB for Node.JS Developers
- Knowledge Graphs for RAG
- O'Reilly - Hands-On LLM Engineering
- *Full list of certifications in LinkedIn profile*

EDUCATION

- **Kennesaw State University, Georgia** – *Master of Science in Artificial Intelligence*
Accepted to the program starting Fall 2025.
- **University of Louisville, Kentucky** – *Master in Business Administration*
Relevant courses: Finance, Design Thinking, [Technology Management](#), Economics, Managerial Accounting, Financial Accounting, Leadership, Operations & Supply Chain Management.
- **Tec de Monterrey** – *B.Sc. Electronic and Computer Science Engineering* ([Verified International Qualification](#))
Relevant courses: [Machine Learning](#), [Statistics](#), CAD/CAM, Programming, Java, Data Structures, Signal Processing, Linux, CISCO.

HONORS, ACHIEVEMENTS & OTHER

- Intern at Intel where I received two SRA's (Spontaneous Recognition Award) for the submission of new invention ideas (Invention Disclosure Forms), these awards are rarely given to interns.
- *Invent It* Honorable mention award issued by World Palsy Day for the idea aimed to help quadriplegics and war veterans.
- Extensive international work experience, including holding a Swiss Type C Work Visa, demonstrating the ability to adapt to diverse professional environments.
- President of the Electronics and Computer Science Student Society Alumni for 1 year.
- Outstanding student with GPA from 3.6 to 4.0 during high-school, university and master's degree.
- Open-source contributor ([GitHub profile](#))
- [StackOverflow](#) 8K+ reputation ([StackOverflow profile](#))
