CAROLINE BOH TIANI

PERSONAL SUMMARY

A devoted Security Operations Center analyst with over 03 years of hands-on experience providing first level response for security incidents including but not limited to security events at the level of the network, application, and endpoint. A good understanding, experience and detailed knowledge of security tools, technologies, and best practices. Able to resolve problems before they become a crisis and can troubleshoot product delivery and quality issues thereby directly contributing to a company's overall growth and profitability. A goal-driven and self-directed collaborator with strong written, communication, relationship building skills and excellent work ethics.

SKILLS/TECHNICAL TOOLS

Malware Analysis | Endpoint Security | Incident Response | Cyber Threat Intelligence | Network Security Protocols | TCP/IP | Splunk | CrowdStrike | Nessus | O365 | Snort | Firepower | FireEye | Jira | ServiceNow | McAfee | Bluecoat | Palo Alto | Cisco IronPort | Linux | Windows | Active Directory | Microsoft Office 365 | SharePoint | OneDrive | Virus Total | Domain Tools | IP/URL void | IBM X-Force | Any. Run | Threat Grid Sandbox | Cloud Computing | Authorization-To-Operate (ATO) Process | PO&AM Management | PowerShell | Java | Risk Management | Security Assessment | Authorization.

WORK EXPERIENCE

SECURITY OPERATIONS CENTER (SOC) ANALYST

Pitch Technologies | February 2021 - Current

- Working in a 24x7 Security Operations Center, delivering round-the-clock security vigilance, ensuring uninterrupted protection and rapid incident response
- Continuous monitoring, analyzing and interpreting security events and threats using the IDS and SIEM to determine intrusion and malicious events.
- Using Vulnerability Assessment tools such as Nessus to perform scheduled and manual scans as required
- Investigating malicious phishing emails, domains and IPs using Open-Source tools and recommending proper blocking based on analysis.

- Rescanning mitigated systems for further infections using CrowdStrike and Symantec AV and commissioning systems back to the network
- Conducting research on new and evolving threats and vulnerabilities with potential to impact the monitored environment, using different OSINT sources
- Conducting log analysis using Splunk
- Searching firewalls, email, web, or DNS logs to identify and mitigate intrusion attempts.
- Efficiently managed incidents from initial assignment to final resolution, ensuring timely and effective responses.
- Actively assisted in building Standard Operating Procedures (SOPs) as needed, contributing to the continuous improvement of SOC operations and processes
- Diligently documented all assigned tickets, ensuring thorough records of work performed and attaching necessary artifacts to meet Security Log Review (SLR) standards.
- Contributed to the creation of daily SOC and shift reports, ensuring seamless communication and efficient pass down of emails and tickets to the incoming shift team.

IT SUPPORT SPECIALIST

Pitch Technologies | August 2019 - February 2021

- Resolved complex technical issues that arose on client computer using troubleshooting.
- Effectively made recommendations to IT users on selection of hardware and software
- Successfully administered user accounts, Exchange mailboxes, and security and distribution
- Installed and maintained Windows and desktop software, service packs, patches, and anti-virus updates.
- Participated in revolving on-call schedule to provide 24/7 service to users.
- Troubleshoot various technical issues dealing with printers, network, and phone systems and providing support in setting up audio and visual technology for conferences and meetings.
