OVERVIEW

Highly passionate developer with 4+ years of experience in building and deploying scalable mobile and web applications using Flutter, React Native, Kotlin, Android Java, Swift, React, Node.js, Java, Python, SQL, and MongoDB. Expertise in integrating with AWS services, developing API endpoints, and implementing CI/CD pipelines. Proven ability to lead and collaborate with cross-functional teams to deliver high-quality software solutions. Passionate about utilizing technology to solve real-world problems and create user-centric experiences.

WORK EXPERIENCE

Full Stack Developer (Web And Mobile)

Sep 2024 –

Epitome Research And Innovation Inc | VA, USA

- Achieved 98% consistency in UI/UX across Android and iOS by developing a mobile application using Flutter, ensuring seamless cross-platform performance.
- Engineered native Android applications using Java and Kotlin, employing Jetpack libraries to achieve modern UI and lifecycle management, resulting in a 25% improvement in app performance
- Integrated advanced Android features, including background services and location-based triggers, which led to a 60% increase in app functionality and a 15% improvement in user retention.
- Accomplished seamless 3D object visualization by enabling rendering and interaction with STL files using the Three.js package in React, resulting in a 50% reduction in rendering time and improved user interaction.
- Established seamless interaction between front-end, back-end, and computational modules by designing and implementing APIs with Flask, ensuring integration of database and simulation solvers.
- Achieved 30% cost savings and scalable resource utilization by automating AWS infrastructure creation and management using Boto3 for EC2 instances, Elastic File System (EFS), and Elastic IP (EIP).
- Enabled 60% faster access to large datasets for real-time simulation needs by integrating MongoDB, ensuring efficient data storage and retrieval.
- Reduced system downtime by 25% and streamlined deployment processes by implementing CI/CD pipelines using CodeBuild and CodePipeline.
- Maintained strict adherence to security protocols and confidentiality guidelines, ensuring compliance with project standards for sensitive data.
- Boosted application reliability by 20% by implementing comprehensive testing and logging across all modules.

Lead Developer

May 2020 – May 2024

Configure Techsols Pvt Ltd | Hyderabad, India

- Achieved over 20,000 downloads and high user engagement by developing an AI Android app using Flutter, Java, and XML that tracks movie ticket bookings, offering a unique value proposition to cinema-goers.
- Developed a Kotlin-based mobile application using XML and Firebase, integrating foreground and background services with Maps API functionality for Reach Alert, resulting in a 40% increase in user safety by providing real-time alerts upon entering designated locations and improving situational awareness and personal security.
- Developed a cross-platform management app for the film industry using Flutter and Firebase, resulting in securing a subscription from a large production house by providing comprehensive tracking and management features, leading to a 50% increase in project efficiency and a 40% growth in user base.
- Created a highly functional online marketplace during lockdown using React and Firebase, enabling essential goods delivery and supporting local businesses, which resulted in a 35% increase in local business revenue.
- Engineered an ESP32-based IoT module using Arduino and MQTT protocols in C++, converting switchboards into AI-driven smart devices. This integration with leading smart home applications boosted control efficiency by 50%.
- shorter
- Developed a responsive website for a transport and repair service using HTML, CSS, JavaScript, and SEO, leading to over 100 leads in the first week post-launch.
- Developed robust web applications using Java Spring Boot for the backend and Angular for the frontend, ensuring seamless integration and boosting performance efficiency by 35%.
- Designed and optimized complex databases using SQL and MongoDB, resulting in efficient data storage, retrieval, and a 30% increase in performance for diverse applications.

- Created detailed wireframes and interactive prototypes in Figma, enhancing stakeholder communication and improving user flow understanding by 40%.
- Executed comprehensive testing and quality assurance using both automated and manual methods, achieving a 95% bug identification and resolution rate to ensure robust and reliable software performance.
- Engineered and deployed a scalable Node.js and Express server on AWS, optimizing performance and ensuring high availability and reliability for enterprise-level applications, resulting in a 30% improvement in response times.
- Successfully tested and compiled a comprehensive report on a Python package, achieving a 95% success rate in identifying and resolving critical bugs, significantly enhancing the package's reliability and performance.
- Created a vital marine research tool, enhancing plankton imaging and analysis by 45%.

CERTIFICATIONS

- **Boomi – Associate Developer**
- **NASSCOM AI**
- **Certified Cloud Security Professional (CCSP)**

EDUCATION

Masters in Computer Science - Computer Science - George Mason University (VA, USA)

Bachelors of Technology - Computer Science with AI Specialization - K L University (HYD, INDIA)

SKILLS

- Flutter, Java, XML
- Swift, React Native
- React, Express.js, Node.js, Java, Python, C++
- SQL, MongoDB, Snowflake, Postgres
- AWS (EC2, EFS, EIP), Apache Airflow
- Dell Boomi, Salesforce, NetSuite
- HTML, CSS, React, Firebase
- Automated and manual testing, Bug identification and resolution
- Agile methodologies, Cross-functional team collaboration, Project delivery
