

Hari Krishna Varanasi

Technical Program Manager

Summary

- Technical Program Manager with over 19 years of experience leading complex projects in enterprise-level environments, with a strong specialization in managing Data and AI initiatives
- Managed large-scale data migration strategies, to reduce 150+ data sources to 70 by eliminating redundant data sources and thereby reducing operational costs and data storage.
- Onboarded the cloud consumption revenue recognition data and led org wide reporting solution by cross collaborating with 20+ stakeholders.
- Developed innovative solutions using Gen AI and machine learning models to improve forecasting accuracy, automated SQL queries using DB Co-pilot, e-commerce website creation.
- Proven experience in SQL development, data modelling, Power BI development, Python programming and ETL tools to deliver data and reporting solutions.
- Collaborated with various teams to optimize process, data storage, operational costs and reporting suites.

Employment History

Sr. TPM, Data Engineering Manager at Avanade, Seattle, WA

Apr, 2019 - Nov, 2024

- Collaborated with stakeholders to understand and align project requirements, ensuring initiatives met strategic objectives and elevated stakeholder satisfaction.
- Led cross-functional teams in implementing advanced AI solutions, using ML Models to refine forecast accuracy and improve efficiency metrics by 20%.
- Coordinated end-to-end project management for Azure cloud migration, enhancing system scalability by 25% and cutting costs by nearly 18% within a half-year.
- Led development of ChatGPT-integrated DB Co-Pilot tool to automate SQL query creation, achieving a 15% decrease in support tickets for over 30 business users.
- Streamlined operations by decommissioning over 50 unused reports through effective stakeholder collaboration, reducing overall report volume by 30%.
- Delivered project status updates to stakeholders through weekly status reviews and monthly business meetings, ensuring alignment, timely issue identification, escalation, and implementation of mitigation plans.
- Developed a power app to support Learning management system, to onboard HR training data, automated metrics calculation and improved overall report generation process efficiency by 25%.

Data Engineering Manager at Accenture, Redmond, WA

Jun, 2014 - Apr, 2019

- Collaborated with 20+ stakeholders to prioritize backlog and trade-off discussions in a scaled agile setup.
- Oversaw 4 agile teams in sprint planning and delivery, optimizing processes through regular reporting and dashboard creation, leveraging tools such as Azure DevOps and Power BI.

Skills

- Program Management
- Data Analysis
- T-SQL Development
- Azure Data Factory ,
Azure Databricks, Azure
Data Warehouse,
Microsoft Fabric
- Data Modeling
- Python Programming
- BI Tools (SSAS, SSIS)
- Power BI, Tableau,
SSRS, Excel
- Gen AI (exposure to
ChatGPT, Langchain,
RAG models)
- Risk Management,
Communication
- Azure DevOps
(Dashboards, tracking,
delivery plan)

- Led org-wide reporting requirements for onboarding cloud revenue (\$5B+) into reporting suite. Defined MVP in collaboration with business stakeholders and created a phase-wise delivery plan.
- Designed and architected databases to enhance data integrity, leveraging SQL and ETL processes.
- Developed ETL workflows, integrating various data sources to enable scalable analytics solutions, resulting in a 30% increase in processing speed across key business units within 4 months.
- Developed report prototypes and tracked key metrics including daily active users (DAU), dashboard availability, and data freshness to optimize dashboard usability and effectiveness.
- Led development of a custom tool for a manufacturing client, by replacing external applications and saving \$120,000 annually.
- Designed and implemented advanced Power BI reports and dashboards, delivering low-latency, near real-time insights that supported strategic decision-making for over 30 stakeholders in the business teams.

Data Engineering Project Lead at Mastech Inc, Redmond, WA

Aug, 2013 - Apr, 2014

- Designed robust ETL data flows leveraging SSIS, integrating data extracted from SQL Server to optimize data transformation from numerous data sources, improving efficiency by 15%.
- Engineered dynamic SQL stored procedures and functions, enhancing query execution time by 25% and refining SSRS drill-down report accuracy.
- Developed a mechanism to enhance search efficiency across applications and databases by over 75% by implementing column-based searches instead of traditional row-by-row searches.

Data Engineering Lead at Cognizant Technology Solutions, Hyderabad, India & Wilmington, DE

Oct, 2010 - Jul, 2013

- As a development lead, took ownership of design and implementation, proactively addressing performance issues to ensure smooth operation.
- Developed complex SSIS packages that load data from multiple data sources, and improved data transfer efficiency by 50%.
- Proposed architectural enhancements to existing ETL processes, reducing data latency by 30% using SSIS and Autosys over a 6-month project.
- Authored technical documentation and process flows in collaboration with team members, ensuring comprehensive understanding and seamless handover of ETL processes to support operational performance.

Senior Database Developer at iGATE Global Solutions Ltd., Hyderabad, India & Mississauga, ON, Canada

Jun, 2005 - Sep, 2010

- Managed full software development lifecycle for database projects, utilizing advanced programming and debugging skills to ensure high quality deliverables and efficient deployment.
- Utilized Excel for data extraction and aggregation, improving reporting accuracy in BI projects by 25% within 3 months.
- Leveraged Excel for advanced data modeling, integrating analytical capabilities that enhanced project efficiency by 20% over six-month period.
- Coordinated and optimized database builds using SQL Server for multiple client projects, surpassing deadlines and enhancing performance metrics by 30% in a year.

Certificates

Microsoft Certified: Azure AI Fundamentals

May, 2024

Microsoft Certified: Fabric Analytics Engineer Associate

Mar, 2024

Microsoft Certified: Azure Data Fundamentals

May, 2023

Google Certified: Foundations of Project Management

Mar, 2021

Coursera: Power BI

Feb, 2021

Coursera: Python Programming
