KS

SUMMARY

Senior Technical Lead with extensive expertise in Data Engineering, specializing in Big Data, Cloud and ETL tools across all software development phases with strong analytical, problem-solving, troubleshooting, and interpersonal skills, thriving in high-pressure environments in delivering scalable and cost-effective data solutions with long-lasting value to clients in India, USA, Malaysia, and Mexico.

EXPERIENCE

Senior Technical Lead

HCLtech 01/2013 - Present San Antonio, Mexico, India

- Led and Delivered End to End ETL/ELT data modernization solutions including data migration and integration by building, managing and optimizing data pipelines across the on-premise and cloud warehouse environments like Snowflake and AWS involving 100+ million records using ETL/ELT tools like IBM Datastage and DBT.
- Resolved many data issues in loading data to Snowflake and ETL Datastage upgrades from 11.5 to 11.7 including PeopleSoft/HR upgrade.
- Reduced OnPrem Storage costs to 60% by building a framework in Hadoop to transfer data between different sources like SQL to Hadoop and vice versa using Sqoop with data reconciliation process to create data lake.
- Improved the performance of the ETL jobs and SQL queries by tuning them for efficiency and reduced long running jobs by less than 30 minutes in batch and streaming data movements.
- Developed many reusable scripts in Unix/Python for end-to-end automation of jobs involving data pipelines, data reconciliation and enhancements and increased data accuracy by 95%.
- Automated more than 500+ ETL data pipelines workflow in Scheduling tools like Control M.

Technology Engineer

Virtusa Software Services Pvt Ltd 06/2010 - 11/2013 Chennai

- Provided end to end data solutions from analysis, design, development, testing of various data pipelines using ETL tools like Data stage as per business requirements from various sources across banking sectors.
- Improved the efficiency of ETL jobs and long running SQL queries by tuning them for performance and efficiency.
- Automated ETL processes that results in reduction in time by 40%.
- Coordinated with different teams to provide extensive production support with jobs tunings and handled time sensitive issues without any delays.
- Created more than 1000+ data pipelines in control M and automated the workflows.

Software Developer

Polaris Software Lab 11/2009 - 04/2010 Chennai

- Coordinated with different teams to troubleshoot and provide extensive production support by tuning the data pipelines and handled time sensitive issues without any delays.

SKILLS

AWS Services	Azure	Big Data
Data Engineering	Data lake	Db2
Dbt	Gitlab	Hadoop
	Hive	
IBM DataStage	Informatica	Netezza
Oracle	Python	SalesForce
Snowflake	Spark	Control M
	Agile	
ETL	GCP	Kafka
	AI	ML

CERTIFICATIONS

Data Analytics with Snowflake

AWS Cloud Quest Practitioner

HCL Certified on BigData Hadoop

ACHIEVEMENTS

Business Generation

Led and provided technical and architectural insights in multiple project proposals and won several projects worth more than 5 millions

EDUCATION

Bachelors in Engineering (Computer Science)

Anna University

2005 - 2009 Chennai

- Bachelors in Engineering (Computer Science) - First Class with Distinction
- Awarded with Gold Medal for "Best Achiever Award" for 2005-2009 batch.
- Microsoft Student Partners and won many prizes in various contests in many Nationwide Technical Symposiums
