SUMMARY

Graduate student in MS Management & Business Analytics with 3 years of experience in data-driven decision making, strategy development, and problem-solving. Interested in applying expertise to drive impactful value.

EDUCATION

University of Pittsburgh | Master of Science in Management & Business Analytics | Aug 2023 – Apr 2025

K.N. Toosi University of Technology | Bachelor of Science in Aerospace Engineering | Sep 2015 – Sep 2020

GRADUATE EXPERIENCE

AccuTrex Products, Inc. | Student Consultant Field Project: Lean Six Sigma | Jan 2025 – Present

- Analyzed and measured the production process from start to end and created a detailed process map to identify process improvement strategies for a 30% increase in production while maintaining quality and controlling costs.
- Suggested recommendations for optimizing machine runtime, workforce scheduling, and facility area design enhancing efficiency for operations.

Humotech Company | Pennsylvania Robotics and Technology Fellowship | Nov 2024 – Present

- Conducted comprehensive market analysis, evaluating market size (TAM), ease of entry, growth potential (CAGR), product cost feasibility, technology compatibility, and competitive intensity (using HHI index calculations) to develop a detailed decision matrix for identifying untapped market segments.
- Developed customer personas and tailored cold outreach strategies informed by the decision matrix to enhance market penetration.

U.S. Department of State Consular Affairs | Student Consultant Field Project | Aug – Dec 2024

- Researched and analyzed Gen Z travelers' behavior through interviews, national surveys, and social media traffic metrics.
- Proposed targeted recommendations to enhance visibility and social media engagement rates for the STEP program and Travel.gov, validated through A/B testing using sample-tailored advertising videos.

Center for Sustainable Business | Graduate Course Project: Project Management | Aug – Dec 2024

- Identified financial risks and projected cash flows for solar panel installations in new facilities, aligning with sustainability goals.
- Developed a Work Breakdown Structure using a hybrid approach of Agile and Waterfall methodologies.

Customer Behavior Analysis | Graduate Course Project: Data Mining | Aug – Dec 2024

- Developed predictive models (ANN, logistic regression, clustering, random forest, decision tree) to predict customer satisfaction and brand loyalty, leveraging data cleaning, model tuning, and feature analysis for improved accuracy.

Applebee's | Graduate Course Project: Management Financial Accounting | Jan – Apr 2024

- Analyzed four years of financial statements to identify key factors impacting market performance, uncovering the negative effects of specific underperforming franchises and recommending merger strategies.

Duquesne Light Company | Hackathon Decision-Making Case Competition | Jan – Mar 2024

- Developed ANP and AHP decision-making approaches, analyzing a decade of logistics data to identify the optimal infrastructure location to serve as the central hub for minimizing cost and distance while maximizing accessibility for pole inspection.

Crane NXT Company | Crane Operations and Supply Chain Case Competition | Oct – Dec 2023

Conducted detailed risk analyses and Net Present Value (NPV) evaluations to make decisions between acquiring a new warehouse facility or modifying current supply chain for cost and shipping time efficiency.

Vice President | Katz Operations Management Club | Apr 2024 – Present

Engagement Director | Katz PM (Project, Program, Product Management) Club | Apr 2024 – Jan 2025

PROFESSIONAL EXPERIENCE

Hamta Group | Business Development Associate | Feb 2022 – Mar 2023

- Analyzed customer feedback, financial statements, and benchmarking data to identify KPIs, uncover growth opportunities, and support product development.
- Achieved an 11% improvement in marketing conversion rates across 15+ projects in collaboration with the marketing team to refine product positioning.

SKILLS

Programming, Data Analysis and Predictive Modeling: C++, Python, R, SAS, SPSS

Statistical and Financial Analysis: Microsoft Excel, Analytics Solver

Data Management: MySQL, Microsoft Access

Data Visualization: Tableau, Power BI

Project Management: Microsoft Project, SharePoint
