Summary

SOC Analyst with extensive experience in leading 24x7x365 Security Operations Centers (SOC), specializing in incident monitoring, response, and threat analysis. Expert in SIEM tools (Splunk, ArcSight, Azure Sentinel) for advanced threat detection, security analytics, and log correlation for threat detection and log analysis. Expertise in vulnerability analysis, SOC ticket management (ServiceNow), phishing analysis, and email security (ProofPoint). Strong background in incident response, threat intelligence, Owasp Security, security automation, and compliance (ISO 27001, NIST, PCI-DSS, FedRAMP).

Experience

Security Analyst L2
Simeio Solutions
April 2022 - Present

- Developed advanced security alerts for SOC consumption, improving detection accuracy and response efficiency.
- Performed real-time triage of security alerts across cloud, production, and corporate environments.
- Conducted deep-dive analysis of escalated security incidents, collaborating with engineering teams for resolution.
- Managed and optimized Splunk ingestion, indexing, query performance, and runbook health checks.
- Developed and maintained SOC playbooks and Standard Operating Procedures (SOPs) to enhance incident response workflows.
- Served as an incident coordinator during high-severity security incidents, ensuring efficient communication and resolution.
- Oversaw incident assignment and queue management using ServiceNow.
- Conducted vulnerability scans using Tenable Nessus and provided remediation reports to patch management teams.
- Designed and managed enterprise EDR solutions, including CrowdStrike, Microsoft Defender ATP, and Symantec DLP.
- Applied expertise in DLP tools and concepts to secure organizational assets from data exfiltration and unauthorized access.
- Applied MITRE ATT&CK Framework techniques to improve threat detection and response strategies.
- Performed in-depth phishing email analysis using ProofPoint, improving detection rates and mitigating breaches.
- Created and optimized Splunk queries for log correlation, anomaly detection, and dashboard visualization, improving threat visibility and response efficiency. Designed customized Splunk dashboards to enhance security monitoring and streamline investigation workflows.
- Prepared and presented security metrics and SLA performance reports to stakeholders.

Security Analyst L1
HindhujaGlobal Solutions – India
Jan2020 - April 2022

- Designed and managed a world-class 24/7 Security Operations Center (SOC), deploying and evaluating security tools in compliance with HIPAA standards.
- Worked with various SIEM tools, including Azure Sentinel and ArcSight, to monitor, analyze, and respond to security events.
- Developed custom Azure Sentinel queries for threat hunting, alert tuning, and log analysis.
- Created KQL queries in Azure Sentinel to detect suspicious activity, correlate security logs, and enhance alerting mechanisms.
- Deployed and managed ForcePoint DLP solutions for endpoint security to mitigate data exfiltration risks.
- Performed threat hunting using KQL queries, identifying suspicious activities and unauthorized access attempts IPS / IDS – Deploying and managing CISCO NSM/NSP on all the operational sites.
- Conducted internal and external audits to ensure adherence to ISO 27001 and PCI-DSS frameworks.
- Performed threat hunting using KQL queries, identifying suspicious activities and unauthorized access attempts.
- Managed and maintained documentation linking deployed plays to applicable FedRAMP controls.
- Conducted internal and external audits to ensure compliance with ISO 27001, PCI-DSS, and FedRAMP frameworks.
- Led incident response efforts, investigating alerts, documenting findings, and coordinating remediation strategies.
- Collaborated with cloud security teams to secure platforms like AWS and Azure, utilizing their native security tools.

Education

- Master of Information Studies and Technology, Trine University
- Bachelor of Electronics and Communication Engineering, AVIT

Licenses & Certifications

- Cisco-certified Network Security– Cisco
- CompTIA Cybersecurity Analyst(CySA+)-CompTIA
- CompTIA Security+ - CompTIA
- Security Operations Analyst Associate (SC-200) - Microsoft Certified
- Azure SecurityEngineer Associate (AZ-500)- Microsoft Certified

Security Skills

Skill Category	Details
Incident Response & Forensics	Malware analysis, forensic triage, and security incident mitigation.
Identity & Access Management (IAM)	Managing Active Directory, Azure AD, and SaaS security controls.
Security Monitoring & Threat Detection	SIEM tools (Splunk, ArcSight, Azure Sentinel) for log analysis, threat detection, and anomaly detection using custom queries.(SQL)
Email Security & Phishing Analysis	ProofPoint, phishing detection, and mitigation.
Endpoint & Mobile Security	Web content filtering, endpoint protection, and mobile security solutions (CrowdStrike, Defender ATP, Symantec DLP).
Cloud Security & Compliance	Securing AWS, Azure environments, ensuring FedRAMP, NIST, ISO 27001, PCI-DSS compliance.
Vulnerability Assessment	Vulnerability assessment skills in cybersecurity involve identifying, analyzing, and prioritizing security weaknesses in systems, networks, applications, and devices. Key skills includes Vulnerability Scanning, Risk Analysis, Patch Management, System and Network Hardening, Penetration Testing Awareness and Scripting and Automation (Tenable Nessus, Qualys).
Operating Systems	Windows, Unix/Linux, and cloud platforms (AWS, Azure).
Ticketing Systems	ServiceNow and JIRA for incident tracking, service requests, and workflow automation.
Scripting & Automation	PowerShell, REST APIs for automation and system integrations.
Network Protocols	TCP/IP, DNS, DHCP, and encryption protocols.
Reporting & Documentation	Microsoft Excel (pivot tables, data visualization), Word (SOPs, audit reports), PowerPoint (security presentations).
Sniffing/Man-in-the-Middle	Wireshark, Ettercap, Cain& Abel
Incident Response & Forensics	Malware analysis, forensic triage, and security incident mitigation.

Projects and Home Labs

- Developed SOC performance dashboards aligning with productivity and response metrics.
- Designed a Kali Linux-based home lab for penetration testing and threat modeling.
- Utilized Burp Suite for web application security testing, identifying vulnerabilities.
- Created and optimized Splunk queries for threat hunting and security analytics.
- Managed FedRAMP-approved documentation repository for Incident Response compliance.

Additional Contributions

- Developed and maintained dashboards for tracking and reporting SOC performancemetrics.
- Assisted in internal and external audits, ensuring compliance with regulatory and organizational security standards.
- Provided training sessions on advanced securityconcepts to enhance team skills and knowledge.
