Professional Summary:

Having **17+ years** of Professional IT hands-on experience in **SAP BW/BI, SAP BW/4HANA, SAP Native HANA, SAP Datasphere, and SAP Analytics Cloud (SAC)**, I specialize in the full lifecycle of analytics projects, including modeling, implementation, enhancement, development, testing, migration, maintenance, support and performance tuning. I am proficient in a variety of enterprise reporting tools such as **BEx, AFO, BOBJ, and SAC**. My expertise spans several SAP platforms, including **SAP ECC, S/4 HANA**, and key functional modules like **SD, MM, FI-GL, and CRM**. I have successfully supported numerous projects across industries such as Retail, Oil & Gas, Food, Manufacturing, Banking and Telecommunications, delivering high-quality solutions.

Technical Skills:

Business Warehouse : SAP BW/BI 7.3, 7.4, 7.5, BW/4 HANA

ERP Application : SAP ECC 6.0, S/4 HANA 2.0

Programming Languages : ABAP/4, SQL

SAP Cloud platform : SAP SAC, SAP BTP(BW), SAP Datasphere

Reporting tools : BEx, BOBJ, AFO, SAC

Functional Module : SD, MM, FI-GL, SRM

Database : SAP Native HANA, Oracle

Professional Experience:

Client: Heineken, CA

Duration: January 2022 - Present

Role: SAP BW HANA & SAC Consultant

Roles & Responsibilities:

- Designed and maintained **SAP Analytics Cloud (SAC) Planning Models** to support enterprise-wide financial and operational planning initiatives.
- Implemented **Planning Version Management**, enabling effective tracking and comparison of multiple plan scenarios and forecasts.
- Developed and managed **Forecast Versions using Data Actions**, automating business logic to streamline planning processes.
- Executed Manual Planning and configured Disaggregation Logic to align top-down targets with detailed, granular data inputs.
- Built and maintained Data Actions including Copy Steps, facilitating data movement and transformation between versions and time periods.
- Led Revenue and Margin Planning aligned with core business processes, collaborating with stakeholders to ensure accurate and actionable insights.
- Assisted in the design and implementation of data flows between SAP Analytics Cloud (SAC) and BW/4HANA, enabling real-time reporting and decision-making.
- Supported the development and maintenance of SAC data models, calculations, and visual structures to meet evolving business reporting needs.
- Ensured data accuracy, consistency, and security across SAC and BW/4HANA integrations by following best practices.
- Participated in identifying and resolving SAC data integration and performance issues, improving system stability and user experience.
- Contributed to performance tuning efforts by optimizing data model structures and query logic within SAC.
- Supported the creation and refinement of data governance policies and documentation, promoting data quality and compliance across platforms.
- Gathering functional, technical requirements from business users and analyze in order to optimize end to end build data design using **SAP HANA**.
- Involved in all phases of project prospective from Business Blueprinting, Configuration, Integration, testing, Go-Live, documentation, Post-Go live support and end-user training.
- Proficient in designing and developing complex **Calculation Views** to structure and model large datasets in HANA, optimizing performance and enabling advanced analytics.

- Expertise in writing **SQL Procedures and Scalar Functions** to automate business logic and enhance system processes within HANA.
- Experienced in creating reusable **Table Functions** to encapsulate complex logic and improve query modularity and performance.
- Strong ability in writing complex SQL queries, implementing loops, error handling, and data manipulation techniques for efficient database operations.
- Monitored SAP HANA system performance, optimized memory usage for calculation views, and contributed to Power BI dashboard enhancements for timely project delivery.
- Developed and optimized data **models** using **InfoObjects, Advanced DSOs, Composite Providers, and Open ODS Views** in SAP BW/4HANA; implemented complex transformations, ODP DataSources, BW Analytic Queries, and built **ABAP CDS Views/AMDP transformations**, while customizing reporting with Customer-Exit Variables to meet business requirements.
- Expertise in developing **SAP Datasphere** Data Builder Artifacts like Tables, ER Model, Graphical View, SQL View, Replication flow, Intelligent lookup, Task Chain, Analytic Models, Business Builder artifacts and Integrating SAP Datasphere with SAP BW.

Client: Universal Robina Corporation, Philippines

Duration: April 2020 - January 2022

Role: Senior SAP BW/4 HANA Consultant

Roles & Responsibilities:

- **Requirement Gathering & Functional Specifications:** Collaborated with client leads and functional owners to capture business requirements and translate them into detailed BW Functional Specifications for successful project delivery.
- **SAP BW Development & Data Modeling:** Designed and implemented Info-Objects, Hierarchies, Open ODS Views, Advanced DSOs, Composite Providers, BW Analytic Queries, and Variables, optimizing data flow and reporting within the SAP BW environment.
- **Advanced SAP Development:** Developed and optimized ABAP CDS Views, AMDP Transformations, Custom-exit Variables, and BADIs to customize and enhance SAP BW functionality according to business needs.
- **Enhancement & Cutover Activities:** Led major enhancements in Purchasing and Sales dataflows, integrated new fields into data targets and BEx reports, and managed the cutover process and TR imports for smooth production deployment.
- **Testing & System Upgrades:** Performed regression and non-regression testing, resolved dataflow defects, and carried out pre- and post-upgrade activities, including functional testing and sanity checks, ensuring optimal system performance post-BW upgrades

Client: Coca-Cola

Duration: December 2016 – March 2020

Role: Senior SAP BW HANA Consultant

Roles & Responsibilities:

- **SAP BW4HANA Implementation & Development:** Led requirement gathering sessions and collaborated with client leads and functional owners to prepare detailed BI technical specifications. Designed and developed Info-Objects, Hierarchies, Open ODS Views, Composite Providers, and BEx Queries, enabling efficient data modeling and reporting in SAP BW4HANA.
- **SAP BW Data Integration & Process Chains:** Developed and managed data flows, including creating ODP Datasources, Transformations, and BEx Variables. Built and optimized process chains for master data, resolving data load failures and performing testing to address issues during UAT, ensuring smooth data integration.
- **SAP HANA Studio & Advanced Data Modeling:** Created and optimized Calculation Views, Attribute Views, Analytical Views, and input parameters within HANA Studio, contributing to enhanced data modeling and analytics capabilities in SAP BW4HANA.
- **SAP Analytics Cloud (SAC) Reporting:** Developed Data Models with Live Data Connections to SAP BW4HANA and designed Stories and Dashboards for the Finance Module. Utilized advanced SAC features such as Linked Analysis, Input Prompts, and various filters to improve reporting and business intelligence insights.
- **SAP BW Support & Incident Management:** Managed MEM Application incidents and problem tickets, providing effective solutions to synchronization issues and advising users on data load timings. Led the

implementation of company code projects for MEM, conducted Unit Testing and SIT Testing, and optimized system performance by tuning data loads and resolving report issues.

Client: Pepsico

Duration: July 2014 - November 2016

Role: Senior SAP BW Consultant

Roles & Responsibilities:

- Coordinated with business experts to gather requirements, create technical documentation (GAP, FSD, TSD), and translate design documents into BW configurations, ensuring alignment with client needs.
- Developed and maintained BW objects such as InfoCubes, DSOs, DataSources, and Process Chains, while handling data extraction from SAP and non-SAP systems (SQL Server, JDE) using various integration tools like BODS and UD Connect.
- Created BEx queries, worked on Webi reports, and supported business users through integration, UAT, deployment, and knowledge transition to operational support resources.

Client: British Petroleum

Duration: February 2010 - June 2014

Role: Senior SAP BI Consultant

Roles & Responsibilities:

- Led and mentored the team in the Chiron Project, optimizing processes by integrating regional chains, reducing runtimes, and managing daily data loads, transport, and system refreshes across environments.
- Worked on BEx report modifications, archiving, SAP health checks, and housekeeping activities, ensuring data consistency and system performance, while preparing documentation like AID and remediation plans.
- Delivered exceptional support by resolving high-priority incidents, achieving SLAs, creating troubleshooting documents, and receiving client recognition for quick issue resolution and proactive knowledge sharing.

Client: Motorola

Duration: June 2008 - December 2009

Role: SAP BW Consultant

Roles & Responsibilities:

- Provided offshore BW and DW production support, managing 600+ daily loads and monitoring data loads using Process Chains, ensuring data consistency through reconciliation.
- Resolved production issues, performed root cause analysis, and implemented preventive maintenance to ensure timely data loads and system reliability.
- Handled enhancement requests, system performance tuning, and ticket resolution per SLA, while collaborating with onsite teams to address client needs and maintain issue tracking.

Client: Procter & Gamble (P&G)

Duration: December 2007 - May 2008

Role: SAP BW Consultant

Roles & Responsibilities:

- Collaborated with clients to gather requirements and prepared design documents, ensuring alignment with business needs for backend and front-end development.
- Developed and optimized data models, including Info Objects, Info Cubes, DSOs, and Multi-Providers, and implemented data extraction processes from SAP R3 using Generic Extraction.
- Led the development of VAT reporting applications for EMEA and Americas regions, including RRI integration, testing, and transport management for seamless deployment across environments.

Certifications:

- SAP Certified Associate - Reporting, Modelling and Data Acquisition with SAP BW/4HANA
- SAP Certified Associate - Data Analyst - SAP Analytics Cloud
- SAP Certified Associate - Data Engineer - SAP HANA
- Exploring SAP Datasphere - Record of Achievement

Education Qualification:

Master of Computer Applications (MCA) from Osmania University - India.
