

Sammed Prakash

Software Engineer

Phone: +1 857-626-0907 | Email: sammed.p@mycvscout.com | Location: Boston, MA

Professional Summary

- Software Engineer with **3+ years of experience** in all software development life cycle aspects, offering a comprehensive understanding of design, development, implementation, and deployment across various project requirements.
- Skilled in building web applications using the **Spring Framework**, including **Spring MVC, Spring Context, Spring Data, Spring AOP, Spring ORM, Spring Batch, and Spring Security**.
- Proficient in core programming languages: **C, C++, Java, JavaScript, and Python**, with extensive knowledge of **data structures, algorithms, and OOP principles**.
- Experienced in designing and deploying scalable **cloud-based web applications on AWS platforms**, leveraging cloud services to optimize application performance and reliability.
- Expertise in database development with **MySQL, SQL Server, and NoSQL** databases such as **MongoDB**, including advanced skills in creating and managing **Stored Procedures, Triggers, and complex SQL Queries**.
- Expertise in automating **software builds, tests, and deployments** using Jenkins for a streamlined **CI/CD pipeline**.

Technical Skills

- Methodologies:** SDLC, Agile/Scrum, Kibana, Waterfall
- Languages:** Java, Python, SQL, C, C++
- Frameworks/Libraries:** Spring Boot, Spring MVC, Spring REST, Spring Security, Spring Data JPA, ReactJS, GraphQL, OAuth 2.0
- Web Technologies:** JavaScript, TypeScript, HTML5, CSS3, jQuery
- Testing:** Postman, JUnit, Mockito, React Testing Library
- Cloud:** AWS (EC2, SQS, SNS, Elastic Beanstalk, Lambda, Code Deploy, and CloudWatch)
- Database:** MySQL, PostgreSQL, MongoDB, DynamoDB, Oracle
- Tools:** Git, Bitbucket, Jenkins, Docker, Kubernetes, Grafana, RabbitMQ, Swagger UI
- Operating System:** Windows, MacOS, Linux, Unix

Education

Master of Science in Computer Science | University of Massachusetts, Boston, MA
Bachelor in Information Science | SJB Institute of Technology, Karnataka, India

Work Experience

M&T Bank, MA, USA Software Engineer

Feb 2024 – Present

- Optimized React components** using techniques like **memoization and code splitting**, resulting in a 10% reduction in bundle size and improved application performance.
- Built and maintained scalable web solutions** with **Java** and **Python**, leveraging **Agile/Scrum** and **SDLC** methodologies to ensure efficient delivery and adherence to requirements.
- Boosted code quality and security** by integrating automated testing in the **Jenkins-managed CI/CD pipeline**, enabling early detection and prevention of defects.
- Architected and implemented microservices** using **Spring Boot** for high scalability and fault tolerance, leveraging **REST APIs** and **RabbitMQ** for inter-service communication.
- Created secure service communication** using **Spring Cloud Security**, ensuring authentication and authorization between microservices.
- Established a GraphQL API** to efficiently query data from diverse sources, enabling real-time visualization of key metrics through integrated **Grafana** dashboards increasing data retrieval efficiency by 30%.
- Enhanced application response time by 30%** using **Amazon DynamoDB** for high-performance **NoSQL** data access, reducing latency and improving critical operation responsiveness.

Aspire Technolab, India Software Engineer

Aug 2019 – Jul 2022

- Integrated Java code with a ReactJS application** using a framework like **Redux and Context API**, facilitating efficient data management and state updates.
- Improved and managed the CI/CD pipeline** using **Jenkins and Docker**, implementing automated testing and deployment within an **agile development** framework for seamless backend changes integration and delivery.
- Accomplished comprehensive unit and integration tests** using **Java Spring Boot (JUnit)**, automating backend API calls to enhance reliability, and wrote 20+ automated tests for API sanity testing.
- Enabled real-time log search and analysis** by deploying a centralized logging solution with **Elasticsearch**, improving troubleshooting efficiency.
- Used Spring Security, JWT, OAuth 2.0 and LDAP** to establish robust authentication and authorization frameworks for applications.
- Executed and maintained monitoring and alerting of production and corporate servers such as **EC2** and storage such as **S3** buckets using **AWS Cloud Watch**.
- Collaborated with stakeholders** by sharing **Postman collections** and documentation, facilitating clear communication and understanding of API functionalities.
- Integrated Spring Cloud Stream and Spring Cloud Task** for asynchronous messaging and task execution, enabling loosely coupled microservices communication.
