

Thomas M. Pettway	Enterprise Infrastructure Engineer	
11706 Valerie Ct. Midlothian, VA 23114 (804) 833-5986 mpettway@rockasan.com	Accomplished IT engineering professional with over 34 years of experience as a Windows Enterprise Systems Administrator with a background in software design and production systems architecture and operational support. ➤ Experienced in 24x7 operational support, complex troubleshooting, server monitoring, process documentation, capacity planning and ongoing maintenance. ➤ Chief designer and administrator of a large-scale VMware vSphere implementation covering vCenter Server, over 140 physical ESX hosts and the virtual infrastructure for over 400 virtual servers operating both Windows and Linux production environments. ➤ Extensive experience as an SMS/SCCM administrator with responsibilities that include the complete build-out of the SCCM infrastructure, asset tracking, software packaging and distribution, patch management, imaging, and custom SQL reporting. ➤ Proven track record of managing high-profile, complex projects with the ability to implement with minimal disruption to systems and end users. ➤ Demonstrated ability to develop and implement effective security policies and procedures as they relate to data security and system hardening.	
CORE COMPETENCIES	SQL Server 2005 – 2019 Windows Server 2003 – 2022 SCCM/MECM VMware vSphere Active Directory and LDAP System Security and Group Policy Cloud-based Disaster Recovery	SANS/DAS/iSCSI Technologies Infrastructure & Integration Mass Software Deployments .NET GUI Design & PowerShell Scripting Conceptual/Logical/Physical Data Modeling Capacity Planning & Documentation Root Cause Analysis
TECHNICAL PROFICIENCIES	SQL Server Administration SQL Database Maintenance and Tuning SQL Reporting Services T-SQL Query Language Scripting/Coding Automations	Microsoft Azure and Entra ID Administration Microsoft Intune Administration Active Directory Administration SCCM/Microsoft Endpoint Configuration Manager Windows Server Administration
CERTIFICATIONS	CompTia A+ PC/Workstation Certification (A+), March 2001	
EDUCATION AND CREDENTIALS	High School Diploma Clover Hill High School, Chesterfield, VA 1986	
MILITARY SERVICE	U.S. Army Date of Enlistment: August 1986 ETS Separation: January 1990 Corporal E4 Section Leader and a member of the 3/7 th and 2/18 th Infantry Regiments responsible for the training and maintenance of 12 Infantry crew members, 2 armored M901 ITV Anti-Tank vehicles and personnel counseling. Reassigned to the 5/20 th Infantry in South Korea.	

Thomas M. Pettway	
PROFESSIONAL EXPERIENCE Oct. 2016 to Sep. 2024 Irvine, California	Principal Engineer, IT <u>Edwards Lifesciences</u> Manage 25,000 Windows systems using multiple instances of Microsoft Endpoint Configuration Manager in both a production and manufacturing environment. Intune and Autopilot administrator in a hybrid on-prem/Azure domain configuration. Develop and document desktop technology standards policies. Conduct research on emerging technologies with recommendations to increase cost effectiveness and infrastructure flexibility. Establish and verify compliance with technical architecture standards, processes, principles, and methodologies. Identify appropriate life cycle management of technology tools and platforms. Technical Lead for the creation, packaging and deployment of desktop operating systems, security patches and application upgrades using both Intune and Microsoft Endpoint Configuration Manager, packaging tools and multiple scripting languages.
May 2012 to Sep. 2016 Irvine, California	Operating System Administrator, Sr. Staff <u>Broadcom Corporation</u> Develop, maintain and implement standard desktop, laptop and server images and create, test and implement tools used to facilitate image deployment. Provide leadership and mentoring for Technical/Desktop Support including assistance with complex problem resolution and training on standard desktop/server hardware functionality. Maintain state-of-the-art knowledge of desktop/server hardware and software capabilities, anti-virus solutions, and functionality through direct contact with manufacturers, developers, and vendors. Develop and implement solutions to package and deploy software applications and processes to user desktops and enterprise servers. Create custom scripts and .NET applications to support the requirements of large-scale software deployments. Perform intensive regression testing to operating systems and software applications for interoperability and performance metrics.
July 2003 to Dec 2011 Richmond, Virginia	Business Systems Analyst Senior <u>Chesterfield County Public Schools</u> Primary responsibilities include Windows server deployments, Windows Active Directory domain management, Blackberry Enterprise Server administration, domain group policy changes, Microsoft SCCM 2007 and associated software application repackaging for use with unattended software deployments. In addition, responsibilities include scripting various functions for the daily administration of the Windows domain covering 70 county-wide sites that support over 76,000 user accounts, 23,000 Windows workstations and roughly 500 Windows servers, both physical and virtual. Responsible for the transition of production servers into a VMware vSphere environment, reducing the physical server footprint and improving disaster recovery capabilities.
Richmond, Virginia July 1997 to April 2002	Business Systems Analyst V <u>SunTrust Bank</u> HP-UX UNIX administrator responsible for banking systems related to automotive dealer to bank transactions, Captaris RightFAX server administrator used throughout the Merchant Services division for desktop fax solutions as well as administering SQL Server 2000.
Richmond, Virginia Aug. 1993 to July 1997	Database Administrator <u>Crestar Bank</u> A member of the Merchant Bank Card Acceptance division overseeing credit card authorization programming and related hardware distribution to merchant account holders. SQL 7 database administrator, merchant product fulfillment and customer relations help desk.
Richmond, Virginia Feb. 1990 to May 1993	Systems Analyst <u>Marketplace Systems Group</u> B2B help desk technician assisting clients with issues related to MSG's Point-of-Sale software built around NCR hardware platforms. Later moved into application development of back-office systems and onsite system rollout support for Victoria's Secret at their corporate offices in Columbus, Ohio.
