EXPERIENCE

Ember Development — *Software Developer*

SEPTEMBER 2017 - PRESENT

Managing the vetting and hiring process of new developers. Overseeing the development and deployment of hundreds of custom software solutions. Working with clients to design and perfect their ideas. Leading up to 5 development teams working on several projects at once.

Italian Express, Glendale Heights — *Manager*

NOVEMBER 2018 - JUNE 2019

JANUARY 2022 - DECEMBER 2024

Handling training and supervising new employees to ensure effective onboarding and performance. Addressing customer complaints promptly to achieve high levels of satisfaction leading to a 10% increase in ratings. Managing the inventory, including ordering and restocking as needed. Managed the transition to a new POS system with third-party integrations for delivery and new hardware for the kitchen and front of house.

Stellar Development — *Software Developer*

JUNE 2019 - DECEMBER 2021

Actively maintained multiple series of custom game modifications, up to 25 at a time, using Java. Created bots that handled software licenses, server giveaways, along with user moderation using Node.js. Created a web server and CRM for employees to create and manage invoices using Stripe, made with Node.js, Express, and SQLite. Implemented automated invoice creation, increasing employee productivity by 25%.

PROJECTS

RD Exam Review — *Mobile Application*

Built a mobile app to help users study for the Registered Dietitian state exam using React Native (Expo), TypeScript, and Firebase. The app includes practice tests, flashcards, and a review section to make studying more effective and organized. I handled everything from UI design to setting up Firebase for real-time data and user authentication, creating a smooth, personalized experience across devices.

Online Board Game — *Multiplayer Web Game*

Developed a real-time multiplayer board game using React, Express, and Socket.io, enabling seamless gameplay and live interactions between users. Implemented dynamic game states, responsive UI, and real-time server-client communication. Handled 500+ concurrent users at launch with minimal latency fluctuations (<1%) and sustained 99.9% server uptime.

TECHNICAL SKILLS

JavaScript, TypeScript, Node.js, Java, Python, SQL, HTML, CSS, C#

Git, GitHub, npm, React, React Native, Redux, REST, JSON, MySQL, MongoDB, PostgreSQL, PuTTY, Jest
