

Michael Scafate

PROFESSIONAL SUMMARY

I am an experienced full stack software developer with a background in management. I have a bachelor's degree in computer science from the University of Maryland Global Campus where I graduated with magna cum laude honors. I have a Strong foundation in object-oriented programming, systems design, and performance optimization. I am skilled in backend development using Java and C++ for systems-level and embedded development. I have experience working with international logistics systems at FedEx. I am committed to writing secure, efficient, and maintainable code with an emphasis on reliability and performance.

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, SQL, TypeScript, Python, Groovy

Frameworks/Technologies: Spring Boot, JPA, Maven, Git, Jenkins, REST APIs, CI/CD

Databases: PostgreSQL, MySQL, Oracle, MongoDB, DB2, Firebase

Cloud/DevOps: Docker, Jenkins, SonarQube

Concepts: OOP, Microservice Architecture, Real-Time Systems, Embedded Systems, Secure Coding, Multithreading

Operating Systems: Windows, Linux, Android

PROFESSIONAL EXPERIENCE

FedEx – Remote

10/22 – 11/24

Full Stack Developer

Worked with a team of developers in an Agile environment to fix problems and produce applications to help coordinate and facilitate package and shipment movements across the U.S/Canadian border.

- Developed RESTful APIs for secure and efficient data exchange.
- Developed scalable microservices to support backend architecture
- Developed and maintained responsive user interfaces
- Wrote clean, efficient, and maintainable code adhering to best practices and coding standards.
- Designed and optimized database schemas using PostgreSQL
- Implemented authentication and authorization systems using Okta
- Improved system reliability and performance through effective caching and load balancing strategies.
- Maintained and developed CI/CD pipelines to deploy applications to test and production environments.
- Conducted code reviews and mentored junior developers to ensure quality and knowledge sharing.

FedEx – Remote

04/22 – 10/22

L3 Application Support Engineer

Supported the Transportation Management System (TMS) app for FedEx. Maximized application availability and performance through proactive monitoring and communication with teammates and developers to prevent and correct bugs and issues

- Minimized loss of productivity by diagnosing/fixing problems and communicating with affected users in a timely manner
- Increased the efficiency of learning and problem solving for other employees by documenting details of various systems and procedures for solving problems

COOK SYSTEMS – Remote

02/22 – 04/22

FastTrack Developer Bootcamp

- Implemented a RESTful Web Service that mocks the backend of twitter by using various endpoints that use HTTP requests to create, modify and delete user profiles, send and delete tweets, follow and unfollow other users etc.
- Developed 3 data types: User, Tweet, and Hashtag that follow relationships outlined by a database schema/ERD supported by PostgreSQL.
- Utilized Spring Boot and JPA to program controllers and services that handle the HTTP requests, backend validation and logic and convert data between the API and its database models (onion architecture)
- Tested, troubleshooted, and debugged API functionality in Postman until project requirements were achieved
- Collaborated with a team and increased team efficiency by providing instruction and leadership to team members when needed.

Environment: Java, Spring Boot, JPA, PostgreSQL, PGAdmin, Postman, Git, Eclipse, Maven

Eric Costello Campaign for City Council – Baltimore, MD

03/20 – 04/21

Field Director

- Maximized operational efficiency by managing teams of staff members and volunteers during fundraisers, canvassing and other campaign events
- Produced clear and concise updates on campaign progress to upper management by acquiring and organizing information on polling, fundraising, and constituent complaints.
- Increased manpower by interviewing candidates for roles in the campaign
- Allocated manpower by creating work schedules for campaign operations while working within the time constraints of each of the staff members

EDUCATION

Cook Systems FastTrack Java Program – Memphis, TN

02/22 – 4/22

Concentrated Java Frameworks and developer tools training

University of Maryland Global Campus – Adelphi, MD

08/18 – 05/21

Bachelor of Science: Computer Science

Honors: magna cum laude
