Professional Summary

Full Stack Java Developer with 3 years of experience in designing and implementing scalable enterprise applications using Java, Spring Boot, and Angular. Demonstrates a visionary approach to leveraging AWS and microservices architecture for innovative solutions, while excelling in SQL optimization and database performance enhancement. Adept at navigating all phases of the Software Development Life Cycle with a focus on delivering impactful, high-quality software solutions.

Experience

AB Tech Solutions LLC

Boston, MA

Java Full Stack Developer

2024 Jan-Present

- Developed RESTful Microservices using Spring Boot and Java.
- Gained hands-on experience with Amazon Web Services (AWS), including EC2, S3, RDS, Elastic Load Balancer, IAM, and CloudWatch.
- Experienced in Implementing Kafka-based messaging systems to handle real-time data streaming and processing, improving system responsiveness and data throughput.
- Assisted in the integration of Kafka for handling real-time financial data streams, supporting the transition from monolithic to microservices architecture.
- Designed and normalized database tables, optimized SQL queries, and enhanced database performance through indexing and query optimization.

Config Technologies

Pune, India

Java Full Stack Developer

2021April-2022September

- Oversaw all stages of the development lifecycle, from requirements gathering, design, and development, to testing, deployment, and production support, ensuring a seamless delivery for both backend and frontend components.
- Utilized Core Java concepts, including OOP principles, Arrays, Strings, Exception Handling, Collection Framework, Multithreading, Serialization, and I/O streams, to develop and deliver robust software solutions.
- Worked on optimizing Kafka configurations to handle high-throughput scenarios in financial data processing, improving overall system performance.
- Implemented Spring and J2EE-based Boot framework for application development, developed application on Spring framework by utilizing its features like dependency injection, Spring Beans, spring data, Spring AOP, Spring Security, Spring JDBC, spring boot, spring batch.
- Used spring annotations mechanism to create RESTful applications.
- Utilized Git for effective version control, following best practices in branching and merging to facilitate team collaboration.

Skills

Programming Languages	Java, Python, Java Script, HTML, CSS, SQL
Frameworks	Spring, Spring Boot, Kafka, Angular.js, React.js, Node.js, Django, Flask, Express.js
Databases	MySQL, PostgreSQL, MongoDB.
Cloud Technologies	AWS (EC2, S3, Lambda, Dynamo DB, SQS, SNS, CloudWatch)
IDE'S and Version Tools	IntelliJ IDEA, Eclipse, VS code, git

Education

University Of Massachusetts Lowell

Lowell, MA

Master of Science - Computer Science

2022 September – 2024 May

CGPA: 3.8/10

Lovely Professional University

Phagwara, India

Bachelor of Technology in Computer Science and Engineering

2018 June – 2022 May

CGPA:3.6/10

Certifications

AWS Certified Cloud Practitioner
Object Oriented Programming Using Java by Ebox
