

Riff Millar

Endpoint Configuration Engineer

Seattle, WA 98122

riff.millar@gmail.com

(206) 617-6098

Professional Summary

Seasoned IT Operations systems administrator and support analyst with twenty-five years of experience in the Microsoft Server System technology stack, with concentrations in automation, monitoring, and IT security.

Authorized to work in the US for any employer

Work Experience

IT Application Support Specialist Principal

Zimmer Biomet-Seattle, WA

July 2022 to September 2023

After converting from contract to full time employee of Zimmer Biomet:

Performed IT administrative activities related to the global delivery of Zimmer Biomet Connected Health services for the HoloLens Mixed Reality environment and the MyMobility mobile application platform.

Supported internal customers and end-users in the delivery and use of Mixed Reality applications and the MyMobility platform. Managed HoloLens Mixed Reality hardware through Azure AD, Intune mobile device management, and Microsoft Defender for Endpoints. Provisioned new devices into Azure AD tenant and managed device permissions via custom Intune configuration profiles and conditional access policies. Deployed internally developed Mixed Reality apps and security signing certificates to HoloLens devices through the Intune framework. Managed Azure Active Directory device and user accounts and permissions and conducted security access audits. Provisioned users with applicable Microsoft 365 cloud services licensing and conducted license allocation audits. Assisted in managing and maintaining the Connected Health Azure AD/Microsoft 365 tenant environment, including Office 365, Exchange Online, Microsoft Teams, Dynamics 365, SharePoint Online, Microsoft Defender O365/EOP, and the Microsoft Power Platform.

Created and administered clients and users in the MyMobility mobile application platform. Maintained and managed a hybrid Active Directory environment for MyMobility users and platform application servers including RWS Tridion Docs and Aprimo DAM. Administration of user accounts, permissions and app GUID generation using hybrid AD and custom SQL scripts.

Information Technology Services Specialist

Mainz Brady Group-Seattle, WA

November 2021 to July 2022

While under contract-to-hire for Zimmer Biomet:

Performed IT administrative activities related to the global delivery of Zimmer Biomet Connected Health services for the HoloLens Mixed Reality environment and the MyMobility mobile application platform.

Supported internal customers and end-users in the delivery and use of Mixed Reality applications and the MyMobility platform. Managed HoloLens Mixed Reality hardware through Azure AD, Intune mobile device management, and Microsoft Defender for Endpoints. Provisioned new devices into Azure AD tenant and managed device permissions via custom Intune configuration profiles and conditional access policies. Deployed internally developed Mixed Reality apps and security signing certificates to HoloLens

devices through the Intune framework. Managed Azure Active Directory device and user accounts and permissions and conducted security access audits. Provisioned users with applicable Microsoft 365 cloud services licensing and conducted license allocation audits. Assisted in managing and maintaining the Connected Health Azure AD/Microsoft 365 tenant environment, including Office 365, Exchange Online, Microsoft Teams, Dynamics 365, SharePoint Online, Microsoft Defender O365/EOP, and the Microsoft Power Platform.

Created and administered clients and users in the MyMobility mobile application platform. Maintained and managed a hybrid Active Directory environment for MyMobility users and platform application servers including RWS Tridion Docs and Aprimo DAM. Administration of user accounts, permissions and app GUID generation using hybrid AD and custom SQL scripts.

Client Systems Engineer

HomeStreet Bank-Seattle, WA

September 2017 to July 2020

Responsible for all software applications, operating system images, and security or maintenance updates deployed to internal client workstations through the System Center Configuration Manager framework, Active Directory OUs and GPOs, and Gitlab repository of PowerShell scripts for custom application deployments. Included deep integration and cross-team collaboration with other IT Tech Services system engineers and Security engineers for specialized application deployments including Cisco AMP for Endpoints (Advanced Malware Protection), Cisco AnyConnect VPN, and Cisco WebEx video conferencing, with single-point installation, configuration, and compliance monitoring. Single point of troubleshooting escalation for internal IT Help Desk technicians on customer technical support issues. Point of remediation for implementing client security and policy compliance for SOX, ISO and penetration testing certifications. Participated in quarterly failover, backup/restore and incident response validation drills.

Between September 2018 and September 2019, designed, engineered, and executed a full end-to-end SCCM automated operating system upgrade from Windows 7 to Windows 10 to over 1500 legacy client workstations, many of which had not had a hardware refresh in over five years. This self-service upgrade was initiated and performed in place from Software Center by the end user in their normal place of employment, across various HomeStreet offices, bank branches, and home loan centers, in multiple cities across four states including Hawaii. The upgrade of the OS also incorporated low level BIOS updates, hardware driver and firmware updates, and uninstallation of deprecated or superseded applications. Extensive PowerShell scripting was used inline to provide a custom upgrade user interface, perform pre-upgrade validation, and advanced error handling. The Windows 10 upgrade project was completed on schedule and under budget with less than a ten percent hardware replacement rate.

Also participated in multiple high profile projects, including an enterprise-wide upgrade from volume licensed Office 2010/2013/2016 to cloud licensed Office 365, retirement of Ivanti Secure Access Client and migration to Active Directory and Cisco AnyConnect, migration of corporate-owned and BYOD mobile device management from IBM MaaS360 to Microsoft Intune and Azure AD, migration of HomeStreet's Volunteer Portal to the YourCause SaaS platform, and volunteered engineering time to a donation project for the Kent Youth & Family Services organizations.

IT Operations Support Analyst

Tata Consultancy Services (TCS America)-Redmond, WA

November 2014 to February 2017

Microsoft, Windows Azure Livesite (WALS) Escort team: Real-time security analysis on elevated remote access to restricted, high-security Azure AD Fairfax (Government) environment to developers, to ensure secret data not exposed, accessed, or compromised via PowerShell or SQL commands. Participated in active Security Incident bridge conference calls to review, verify and mitigate suspected breaches.

Microsoft, Data Center Services - Microsoft Operations Center Remote Services (DCSMRS) team: Remote installation, patching, recovery, user access control, and configuration of operating systems, IIS websites, PKI certificate updates, storage, and network devices, to servers in multiple regional and global Microsoft data centers.

Laboratory Operations Manager

Experis Manpower-Bellevue, WA

February 2014 to August 2014

Microsoft, MSIT Identity & Access Management (IAM) Lab team: Redesign and restructure of lab's incomplete System Center Virtual Machine Manager (SCVMM) 2012 R2 environment, including redeployment of Hyper-V host servers and migration of existing VMs. Administration, monitoring and

maintenance of production services and test environment servers, and HP 3PAR storage area network (SAN).

Support Analyst II

Insight Global-Bellevue, WA

February 2012 to June 2013

Microsoft, Windows Phone Operations team: Administration, monitoring and maintenance of: Windows Phone Access IAM security roles including Active Directory OUs and GPOs, SharePoint resources, and NTFS access control lists; servers, disk arrays, network attached storage (NAS), Hyper-V servers and hosted Virtual Machines in multiple labs in production, pre-production and test environments; System Center Operations Manager monitoring services; IIS websites and servers including PKI certificate services; server backup/restore and incident response.

Lab Manager

Apex Systems-Bellevue, WA

November 2011 to December 2011

F5 Networks, International Technology Center & Presentation Lab team: Multiple rapid deployment lab services improvement projects, including implementations of: a lab inventory system; stand-up of an Active Directory domain with AD Sites and Services and DNS; Windows Server Update Systems (WSUS); File System Replication Manager (FSRM) software depositories; Remote Desktop Services (RDS) Roaming Profiles with folder redirection; related Active Directory OUs and GPOs for implemented services.

Support Analyst III

eXcell (a division of CompuCom Systems, Inc.)-Bellevue, WA

April 2008 to October 2011

Microsoft, US Core Platform MSN Test team: Through a library of PowerShell scripts, administration and maintenance of multiple VM environments via internal AutoPilot and Genesis deployment harnesses.

Microsoft, Xbox LIVE Tiki Lab team: Deployment of Xbox LIVE builds to multiple gated test environments, including System Center Virtual Machine Manager, Hyper-V servers and respective hosted VMs.

Microsoft, Kernel Test team: Administration, maintenance, and kernel-level triage of daily automated regression test lab.

Software Test and Lab Engineer

Microsoft-Redmond, WA

December 2005 to April 2008

Microsoft, Windows Assistance & Support Technologies team: Redesign and restructure of test lab and its hosted production services, including migration from custom deployment scripts to federated Windows Test Technologies (WTT) deployment and testing automation harness for better Agile testing cadence, implementing Active Directory OUs and GPOs for hosted services, centralized WSUS, and automated server backup schedules including offsite tape storage rotation, and sole point of support and incident response.

Education

AA, incomplete in Dramatic Arts

Skagit Valley College - Mount Vernon, WA

September 1988 to January 1991
