

Qualifications Summary

Cybersecurity Analytics and Operations graduate from Penn State University. Four years in this challenging program along with two years of internship experience fueled a passion for innovation and developed a solid foundation in cybersecurity, software engineering, and data analytics. In my internship I established a track record of delivering projects ahead of schedule, showcasing strong leadership, problem-solving, and adaptability skills. Eager to expand knowledge in cybersecurity, machine learning, AI, and data science through challenging opportunities.

Cybersecurity Analytics & Operations

- ♦ Strong academic background in Cybersecurity with a focus on Application Development.
- ♦ In-depth coursework in machine learning, defense, penetration testing, and comprehensive Information Science and Technology studies.

Machine Learning & Data Analysis

- ♦ Experience with TensorFlow, Artificial Neural Networks, Anaconda, Jupyter, Spyder, and Rstudio.
- ♦ Engaged in a research study on Linux scripting and developed a hunting application showcasing software design and coding skills.

Programming & Scripting

- ♦ Proficient in Java, JavaScript, Python, R, HTML, and CSS programming languages.
- ♦ Skilled in Linux command line scripting, relevant for automating machine learning processes.

IT Operations & Emerging Technologies

- ♦ Managed IT tasks, assisted in secure data migrations, and implemented remote guarding technology.
- ♦ Initiated development of an equipment tracking website, demonstrating software development and adaptability to emerging tech trends.

Professional Experience

W.R. Hickey's Beer Distributor, State College, PA Beer Runner/Promoter September 2021 - May 2024

Sold product through a drive-up tunnel, ran the register, and conducted in-bar promotions to help sell our brands. In this part-time position during college I learned customer relations, problem solving skills, time management, and customer service. I was consistently given more responsibilities due to my hard work and quick learning.

- One of few employees trusted to run the register and validate legal patronage.
- Conducted many in-bar promotions leading to higher sales and knowledge of our assigned brands.
- Worked 20-30 hours a week while completing my degree.

Black Knight Security, Pittsburgh, Pennsylvania IT Intern, June 2022 - August 2023

Executed IT operations, enhancing problem-solving abilities critical for machine learning initiatives. Facilitate secure and efficient data migration processes. Adapted and integrated remote guarding technologies, showcasing agility in response to evolving tech landscapes. Spearheaded development of an asset tracking platform, underscoring proficiency in software engineering. Supported system administration tasks and contributed to cybersecurity measures, reinforcing the protection of digital assets.

- Completed a data migration project two months ahead of schedule by streamlining the current process while maintaining accuracy.

- Assisted in the implementation of a new Remote Guarding system and helped build out the SOC.

Overnight Supervisor, *June 2023 - July 2023*

Supervised security operations during a high-profile event, demonstrating effective leadership and organizational capabilities. Ensured team adherence to safety protocols and efficient response to incidents. Provided exemplary customer service, resolving concerns, and maintaining a secure environment throughout the night.

- Received daily commendations from clients for outstanding performance and reliability.
- Progressed from entry-level roles to multiple higher positions within the company, demonstrating fast growth.
- I learned a lot about teamwork and how to manage a group of people in a way that accomplishes the goal at hand.

Education

Bachelor of Science in Cybersecurity Analytics & Operations (*focus on Application Development*)

Pennsylvania State University, University Park, PA

- Took part in Penn State's THON, which is the largest student run philanthropic organization in the country. It raises money for children with cancer through a yearly event. Within THON I helped raise money and attended team meetings as well as the THON event.
- Was a participant in a research study designed to teach Linux and command line scripting. I learned a lot of useful scripting knowledge as well as got an in depth understanding of the Linux environment.

Certifications

- NSA Center of Academic Excellence Certification
- Currently working on CompTIA Security+ Certification - Expected completion by February 2025
