

RIYA RAKHOLIYA

Software Developer

857-395-8126 | riya.r@itjobinbox.com | MA | [LinkedIn](#)

SUMMARY

Software Developer with 3+ years of experience specializing in full-stack development using various technologies, including Java, JavaScript, C#, and Python. Proficient in Agile, SDLC, and Waterfall methodologies, with a robust background in frameworks such as Spring Boot, ReactJS, and Django. Expertise in cloud solutions with AWS, comprehensive database management with MySQL, PostgreSQL, and NoSQL, and proficient use of development tools like Git, Maven, and Jenkins. Adept at driving project completion through effective problem-solving and team collaboration, delivering high-quality software solutions that meet complex business requirements.

SKILLS

Methodology: SDLC, Agile, Waterfall
Languages: C, C++, Java, JavaScript, TypeScript, Python, C#, Core Java, Java8, SQL
Frameworks/Library: Spring MVC, Spring Boot, Spring Security, Microservices, JSF, Hibernate, JPA, ReactJS, Django
IDEs: NetBeans, IntelliJ IDEA
J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC
Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, JSON, XML
Cloud Technologies: AWS
Application Server: Apache Tomcat, Web Sphere
Databases: MySQL, PostgreSQL, NoSql
Build /Other tools: UML, MS Visio, Maven, Gradle, Jenkins, Junit
Version Control Tools: Git, GitHub
Operating Systems: Windows, Linux

EDUCATION

Masters in Information Technology University of Massachusetts Boston, MA	Sep 2022 – May 2024
Bachelor of Computer Engineering Gujarat Technological University, Ahmedabad, India	Sep 2017 – May 2021

EXPERIENCE

ServiceNow, MA - Software Developer	Oct 2023 – Current
- Spearheaded Agile development processes, streamlining collaboration across multidisciplinary teams and ensuring timely project deliverables. - Engineered microservices using Spring Boot, enabling scalable and efficient system performance to handle increasing traffic demands. - Designed and developed intuitive user interfaces with ReactJS, significantly enhancing the end-user experience. - Administered PostgreSQL databases, focusing on optimization and ensuring seamless data operations across applications. - Implemented cloud-based solutions on AWS, ensuring high availability and cost-effective resource management for critical projects. - Devised robust testing strategies with JUnit, enhancing application reliability and streamlined debugging processes. - Managed source code and version control workflows using GitHub, fostering a seamless integration pipeline through Jenkins.	
Microtech Outsourcing Services LLP, Ahmedabad-India - Software Developer	Jun 2020 – Jun 2022
- Designed, developed, and deployed scalable software solutions using Java and SQL, resulting in a 25% increase in application efficiency. - Enhanced POS system functionality, increasing transaction processing speed by 30% and improving data security measures. - Implemented microservices architecture, ensuring system scalability and performance, improving system uptime by 15%. - Utilized Docker and Kubernetes for containerization and orchestration of applications, streamlining deployment processes. - Developed and integrated RESTful APIs using Spring and Spring Boot, facilitating seamless communication between various system components. - Established CI/CD pipelines using Jenkins, enabling automated build, test, and deployment processes. - Performed rigorous unit testing using JUnit to identify and rectify defects, leading to a 30% improvement in application quality and a reduction of post-release issues by 25%.	
Orion Technolab, India - Software Developer	Nov 2019 – Jun 2020
- Developed RESTful APIs with Java 8 and Spring MVC, enhancing backend functionality and enabling seamless integration with external systems. - Transitioned the frontend stack from JavaScript to TypeScript, improving maintainability and reducing runtime errors. - Built dynamic and interactive web pages leveraging JSF and Bootstrap, delivering polished, responsive applications. - Configured and deployed applications on Apache Tomcat, ensuring smooth production rollouts and minimal downtime. - Strengthened application quality by implementing thorough test cases using JUnit and mock testing frameworks like Mockito. - Enhanced database operations by streamlining MySQL queries, improving system performance during peak loads. - Created detailed UML diagrams to visualize and document system designs, simplifying communication across engineering teams. - Coordinated cross-functional code reviews and mentoring sessions, fostering team-wide improvements in code quality and engineering practices. - Developed end-to-end system designs using MS Visio, effectively bridging communication gaps between technical and non-technical stakeholders.
