

Robert Brown

Senior .NET Engineer

brownrobertdev@gmail.com

HOUSTON, TX 77080

SUMMARY

Accomplished software developer with over 10 years of experience in developing web and Windows applications using modern technologies like .NET Core, React.js, and Angular. Proficient in microservices architecture, OOP, and database design. Skilled in automation testing with Selenium and building CI/CD pipelines. Experienced with AWS and Azure cloud services, GitHub, TFS, and Agile methodologies.

HIGHLIGHTS

- Developed Single Page Applications (SPA) with React.js and Angular (6+).
- Extensive experience with Object-Oriented Programming (OOP) and Design (OOAD) using C#.
- Designed and developed Microservices using .NET Framework and ASP.NET Core.
- Created rich UI applications with WPF, Silverlight, and XAML programming.
- Built dynamic web applications using Angular6,7,8, jQuery, JavaScript, HTML5, and CSS3.
- Proficient in SQL Server: queries, stored procedures, triggers, views, SSIS, and SSRS.
- Developed automation scripts and tests using Selenium and implemented CI/CD pipelines.
- Strong knowledge of AWS (EC2, RDS, DynamoDB, S3, CloudWatch) and Docker.
- Experience with GitHub, Azure, and Team Foundation Server (TFS) for version control and project management.
- Provided application configuration support for FACETS and ensured HIPAA compliance.
- Demonstrated expertise in Agile software development and SDLC planning.
- Skilled in setting up AEM/CQ5 using Maven.

EDUCATION

Texas State University
BS in Computer Science
August 2008 – September 2012

TECHNICAL SKILLS

- **Operating Systems:** Windows (10, 8, 7)
- **Programming Languages:** C, C++, C#, SQL
- **Web Technologies:** ASP.NET, HTML, XML, JSP, XML Web services, WCF, SOAP, JavaScript, jQuery, AngularJS
- **Scripting Languages:** JavaScript, jQuery, AngularJS
- **Cloud Services:** AWS (EC2, RDS, Dynamo DB, S3, CloudWatch)
- **.NET Frameworks:** NET Framework, .NET Core, ASP.NET Core, ASP.NET, ADO.NET, C#.NET, LINQ, WPF, MVVM, WCF, MVC, Blazor.
- **Databases:** SQL Server, MySQL, MS Access
- **Reporting Tools:** SSRS, Crystal Reports
- **Servers:** Windows, Microsoft IIS

EXPERIENCE

Senior Software Engineer (.Net Backend)

May 2019 – Present | IBM | Remote

Responsibilities:

- Integrated ERP applications, managing both Managed Services and Professional Services.
- Integrated architecture with NetSuite for managing business finances, operations, and customer relations.
- Developed Microsoft Dynamics CRM integrations with ConnectWise, SharePoint, and reporting using REST API.
- Built a custom domain-driven microservices architecture using ASP.NET Web API and HTTP protocol.
- Implemented CRUD operations using HTTP services to call Web API methods and tested functionality with Swagger.
- Developed N-tier architecture for presentation, business, and data access layers using C#.NET.
- Implemented client-side interfaces using React JS and various bootstrap components, creating stable components and SPA using React-Router.
- Worked on data extraction, translation, and loading into servers using SSIS and SSRS.
- Managed source control and CI/CD pipelines using TFS, Python, and Bash scripts.
- Developed and deployed microservices using REST and AWS services (EC2, S3) for identity management.
- Automated testing with Selenium WebDriver and Grid, customized tests with C# scripts, and implemented Agile/Scrum methodology for project management.

Senior .Net Developer

September 2017 – May 2019 | Amazon | Houston, TX

Responsibilities:

- Upgraded legacy applications using WCF Services to Angular applications with RESTful APIs.
- Gathered requirements and translated them into technical specifications.
- Developed full-stack applications using AngularJS, ASP.NET Core Web API, and Entity Framework.
- Published web applications to Azure, utilizing database-first approach with Entity Framework.
- Created and tested RESTful Web API services with Swagger, implementing CRUD operations.
- Developed client-side applications using React JS and Angular, integrating with backend services.
- Utilized jQuery AJAX and UI components for dynamic functionality and user interactions.
- Implemented unit testing with Jasmine and Selenium WebDriver, customized with C# scripts.
- Configured Azure App Insights for monitoring and troubleshooting.
- Employed Agile/Scrum methodologies and TFS for code management and version control.

Environment: .NET C#, ASP.NET MVC5 (RAZOR Engine), LINQ, Visual Studio Management, Fiddler, HTML5, CSS3, Bootstrap, Entity Framework (EF), Web API, Windows 10, jQuery, Mozenda, Team Foundation

Full Stack Engineer

July 2015 – September 2017 | Microsoft | Houston, TX

Responsibilities:

- Utilized code-first approach to design databases in the .NET environment with C# in ASP.MVC5.
- Designed and developed web applications using Web API with AngularJS and Entity Framework.
- Implemented routing for Single Page Applications (SPA) using AngularJS and ng-view in HTML5.
- Performed client-side validation using AngularJS Custom Form Validation.
- Applied database normalization techniques to create efficient T-SQL tables with redundancy contingency triggers.
- Created SPAs using AngularJS routing and MV* development patterns, leveraging Controllers, Services, and Factories with dependency injection.
- Used AngularJS ng-repeat for displaying tabular data and implemented CRUD operations with sorting, filtering, and paging.

- Integrated jQuery AJAX and UI components to call Web APIs and implement dynamic user interactions.
- Wrote LINQ queries and lambda expressions for CRUD operations.
- Employed Action Filters for user authorization and forms authentication for user authentication.
- Conducted Web API tests using Fiddler web debugging proxy.
- Implemented Continuous Integration and Continuous Development (CI/CD) using Azure DevOps and Octopus deployments.
- Designed responsive user interfaces with CSS3, HTML5, and Bootstrap.
- Performed automated data scraping using Mozenda and various scraping tools for database integration.

Environment: C#, ASP.Net, Visual Studio, MVC, JavaScript, jQuery, HTML, XML, CSS, SQL SERVER, WCF, WPF, Bootstrap, SOAP UI Web services, SSRS, Ajax, LNIQ, ADO.net.

Junior Software Engineer

January 2013 – June 2015 | Foodsmart | Austin, TX

Responsibilities:

- Gathered requirements from Business Analysts and converted them into technical specifications.
- Maintained and supported web application design and development.
- Developed View Models to manage data flow between models and views.
- Prepared documentation for design and code modules.
- Automated and streamlined critical business functions in the Facets system, including member enrollment, premium billing, claims processing, and customer service.
- Integrated FACETS database with .NET applications using Trizetto Integration Solution and provided configuration support.
- Created views, partial views, and middle-tier modules using MVC architecture in ASP.NET MVC with C#.NET.
- Developed user stories and implemented validation using JavaScript and Razor view engines.
- Designed web applications using Web API with AngularJS and leveraged Entity Framework for database interactions.
- Implemented client-side and server-side functionalities using AngularJS, including SPA routing, validation, and CRUD operations.

Environment: C#, ASP.Net, Visual Studio, MVC, JavaScript, jQuery, HTML, XML, CSS, SQL SERVER, WCF, WPF, Bootstrap, SOAP UI Web services, SSRS, Ajax, LNIQ, ADO.net.
