Objective

CompTIA Certified Security Analytics Professional with a solid foundation in cybersecurity principles. Seeking to leverage my education and certifications to safeguard organizational data and systems, ensuring optimal security and risk management practices.

Education

Associate Degree in Cybersecurity (In Progress)

Gateway Technical College, Kenosha, WI – *Named on Dean's List*

Expected Graduation: Fall 2025

Certifications

- **CompTIA CySA+** – Expertise in threat detection, data analysis, and vulnerability management
- **CompTIA Security+** – Proficient in threat management, cryptography, identity management, and risk identification
- **CompTIA Network+** – Knowledgeable in network architecture, operations, security, and troubleshooting
- **CompTIA A+** – Foundation in IT operational roles, including hardware, software, and network troubleshooting
- **Google Cybersecurity Certification** – Security foundations, network security, incident response, and Python/SQL fundamentals
- **TestOut CyberDefense Pro** – Hands-on security skills through labs and simulated environments.

Hands-on Experience, Projects & Job Simulations

- **Implemented secure configurations** on Cisco switches/routers
- **Deployed secure firewalls** and created ACLs with PFSense
- **Configured Intrusion Prevention Systems** and group policies in Windows Server environments using Active Directory
- **Executed simulated on-path and DDoS attacks** using open-source tools like Burp Suite and Nping
- **Analyzed network traffic** and packets for attack indicators with Wireshark
- **Performed vulnerability scanning** using OpenVAS, Nmap, and Nessus
- **Conducted email analysis** to identify threats using DKIM and SPF verifications
- **Analyzed security logs** in Windows and Linux environments for Indicators of Compromise (IOCs)

Mastercard Cybersecurity Virtual Experience

- Analyzed and reported security threats (phishing) as an analyst for Mastercard's Security Awareness Team
- Identified cybersecurity gaps and implemented tailored security training for business areas

Commonwealth Bank Cybersecurity Job Simulation

- Developed fraud detection strategies and leveraged Splunk for data visualization and cybersecurity analysis

PwC Switzerland Cybersecurity Job Simulation

- Gained expertise in integrated defense strategies and risk assessment
- Conducted risk assessments, delivering actionable security recommendations

5 Additional Virtual Internships with Forage

- Gained hands-on experience in cybersecurity with companies worldwide, focusing on threat detection, incident response, vulnerability scanning, risk assessments, and data analysis

Past Employment

Parts Specialist

Kenosha Nissan | Kenosha, WI
July 2022 – Present

- Assisted customers with parts identification, pricing, and repair documentation
- Created and managed parts lists based on Nissan TSBs

Sales and Purchasing Representative

Lakeview Motors | Oak Creek, WI
June 2019 – July 2022

- Obtained Wisconsin automotive sales and purchasing licenses
- Ensured compliance with state laws and maintained sales records

Production Team Lead

Connected Technologies Solutions | Menomonee Falls, WI
Feb 2018 – May 2019

- Led a team of 8 in the production of 3D printers and kiosks

Security Guard

Allied Universal Security | Kenosha, WI
June 2016 – Feb 2018

- Implemented security controls and exceeded client expectations

Skills

- **Security Tools:** Wireshark, Burp Suite, Nmap, Nessus, OpenVAS, Splunk, PFSense
 - **Network Management:** Cisco, Active Directory, TCP/IP, DNS, VPN, Firewalls
 - **Operating Systems:** Windows, Linux (Ubuntu, Kali)
 - **Programming & Scripting:** Python, SQL, Bash
 - **Cybersecurity Concepts:** Risk Management, Threat Intelligence, Incident Response, Vulnerability Management
-
