

SAIDA JAY

BUSINESS ANALYST

Email: jaysaidaa@gmail.com | Phone: +1 (832) 496-2442 | Location: Houston, Texas

PROFESSIONAL SUMMARY:

As a Business Analyst with over 7 years of experience, including expertise in Supply Chain, I specialize in translating business needs into actionable solutions, driving process optimization, and delivering data-driven insights to support organizational growth. I have a strong track record of collaborating with cross-functional teams, gathering and documenting requirements, and managing project life cycles. Skilled in data analysis, process mapping, and stakeholder engagement, I excel at identifying inefficiencies and implementing strategic solutions to enhance business operations and improve decision-making.

TECHNICAL SKILLS:

Business Analysis: Requirements Gathering, Process Modeling, Gap Analysis, Data Analysis, Use Case Development

Supply Chain Management: Inventory Management, Demand Planning, Vendor Management, Logistics Optimization, SAP SCM

Project Management: Agile Methodologies, Scrum, Jira, Trello, Kanban, MS Project

Data Analysis & Reporting: Microsoft Excel, Power BI, Tableau, SQL, Alteryx, Data Visualization, Data Mining

Collaboration & Communication: Slack, Microsoft Teams, Zoom, Confluence, Cross-functional Team Collaboration

Process Improvement: Lean Six Sigma, Kaizen, Root Cause Analysis, Process Mapping, Workflow Automation

PROFESSIONAL EXPERIENCE:

CDW

Business Analyst

Jan 2023 – Present

- Coordinated with stakeholders to understand business requirements, ensuring seamless alignment between business objectives and technical solutions.
- Conducted process mapping and workflow analysis to identify inefficiencies and recommend improvements to streamline business operations.
- Facilitated workshops and meetings with business users to gather detailed requirements, translating them into clear, actionable documentation for development teams.
- Managed and prioritized project backlogs, collaborating with product owners to ensure timely and effective delivery of business solutions.
- Worked closely with IT and business teams to ensure the successful implementation of system enhancements, ensuring minimal disruption to day-to-day operations.
- Led the development and documentation of Business Requirements Documents (BRDs) and Functional Requirements Documents (FRDs), ensuring alignment between stakeholders and technical teams across 3 major projects.
- Conducted detailed data analysis using SQL and Excel to identify process bottlenecks, providing actionable insights that improved process efficiency by 20%.
- Utilized Tableau and Power BI to create 10+ interactive dashboards, enabling executives to track key performance metrics and make data-driven decisions in real-time.
- Facilitated stakeholder meetings and presentations to ensure clear communication of business needs, contributing to a 30% improvement in project delivery timelines.

Morgan Stanley

Business Analyst/ Scrum Master

Jan 2020 – Jan 2023

- Collaborated with cross-functional teams to address business risks and requirements, ensuring alignment with operational goals and stakeholder expectations.
- Provided expert guidance on business analysis-related matters, including process optimization, requirements gathering, and solution implementation.
- Assisted in the preparation and documentation of business cases and project proposals, ensuring accuracy and completeness in all required documentation.
- Developed and conducted training sessions for employees on business analysis best practices, fostering a culture of continuous improvement across the organization.

- Engaged in monthly meetings with stakeholders and project teams, facilitating smooth project progress and maintaining strong relationships with business leaders.
- Guided the team in following Agile practices and Scrum ceremonies, improving team collaboration and project delivery timelines by 20%.
- Developed and maintained detailed business analysis reports and dashboards using Microsoft Excel and Power BI, delivering real-time insights to senior management.
- Acted as a liaison between the development team and stakeholders, ensuring clear communication and alignment of project goals, leading to a 30% improvement in stakeholder satisfaction.
- Conducted internal assessments and gap analysis on business processes, identifying and mitigating 10+ operational inefficiencies per quarter.
- Provided business process training to 50+ employees, increasing team knowledge and reducing process errors by 20%.

Intel

Supply Chain Business Analyst

Jan 2018 – Dec 2019

- Conducted regular supply chain risk assessments and gap analysis, providing actionable recommendations to optimize efficiency and enhance overall supply chain management.
- Managed the documentation and reporting of supply chain performance metrics for internal and external audits, ensuring consistent preparation and readiness for inspections.
- Provided ongoing support for the development and execution of the company's supply chain strategy, ensuring adherence to industry regulations and internal operational policies.
- Collaborated with cross-functional teams, including Procurement, IT, and Logistics, to support supply chain initiatives and ensure seamless integration of business processes into operations.
- Performed periodic audits on key supply chain controls, ensuring compliance with internal and external regulatory requirements, contributing to the successful completion of a major audit for supply chain operations.
- Conducted and documented internal and external supply chain assessments, reducing audit preparation time by 25% through streamlined reporting procedures.
- Collaborated with business units to identify, assess, and mitigate risks associated with new supply chain projects, integrating best practices early in the project lifecycle.
- Supported the development and enforcement of supply chain policies, resulting in a 30% reduction in operational disruptions due to proactive policy implementation.

EDUCATION:

Bachelor of Business Administration

University of Houston Downtown, 2008
