

SAIKUMAR GURAJALA

Java Full Stack Developer

Location: Birmingham, AL | **Phone:** (659) 253-9563 | **Email:** Saikumargurajala6@gmail.com | [LinkedIn](#)

SUMMARY

- Java Full Stack Developer with 4 years of experience in designing, developing, and deploying scalable web applications.
- Proficient in backend development using Java, Spring Boot, and microservices architecture.
- Skilled in frontend technologies like React, Angular, and Vue.js for building responsive user interfaces.
- Experienced in implementing secure RESTful APIs with JWT and OAuth2 for authentication and authorization.
- Expertise in database solutions including PostgreSQL, MongoDB, and MySQL, with optimized schema design and queries.
- Knowledgeable in cloud platforms like AWS, Azure, and containerization tools such as Docker and Kubernetes.
- Hands-on experience in CI/CD pipeline configuration using Jenkins, GitLab, and other DevOps tools.
- Adept at working in Agile environments, collaborating with cross-functional teams, and delivering high-quality solutions.

SKILLS

- **Programming Languages:** Java, Python, TypeScript, SQL, JavaScript
- **Frontend Development:** HTML5, CSS3, React, Angular, Vue.js, Bootstrap, Material-UI, Tailwind
- **Backend Development:** Spring Boot, Spring Cloud, Node.js, Express.js, Django, Flask
- **Database Management:** MySQL, PostgreSQL, MongoDB, SQL Server, Redis, Hibernate, JPA
- **Version Control & CI/CD:** Git, GitLab CI, Jenkins, GitHub Actions, Bitbucket
- **Containerization & Orchestration:** Docker, Kubernetes, Docker Compose, Helm
- **Authentication & Security:** JWT, OAuth2, OpenID Connect, SSL/TLS, Role-Based Access Control (RBAC)
- **Cloud Platforms:** AWS (EC2, Lambda, S3, RDS, DynamoDB), Microsoft Azure, Google Cloud Platform (GCP)
- **API Management:** RESTful APIs, GraphQL, SOAP APIs, AWS API Gateway
- **Testing & Automation:** JUnit, Mocha, Chai, Jest, Cypress, Selenium
- **DevOps Tools:** Ansible, Terraform, Maven, Gradle, Prometheus, Grafana
- **Agile Methodologies:** Scrum, Kanban, Jira, Confluence, TDD, BDD
- **Miscellaneous Tools:** SonarQube, Postman, Swagger, Visual Studio Code, IntelliJ IDEA, Draw.io, Slack

WORK EXPERIENCE

PNC Bank

July 2024 – Present

Java Full Stack Developer

- Developed and deployed a customer portal using Spring Boot and React.js, improving user engagement and reducing page load time by 30%.
- Developed microservices architecture to improve system modularity, leveraging Spring Cloud for service discovery and configuration management.
- Created and secured RESTful APIs using JWT and OAuth2 for authentication and authorization, ensuring compliance with best practices.
- Built CI/CD pipelines with Jenkins, Docker, and GitLab, streamlining deployments and improving team productivity.
- Optimized PostgreSQL database queries to enhance performance, ensuring efficient data retrieval and processing.
- Participated in Agile processes, including sprint planning and daily scrums, to maintain alignment with project goals and deliverables.

Accenture

July 2021 - November 2022

Application Development Associate

- Developed and maintained backend systems using Spring Boot and Spring Cloud, ensuring seamless order processing and inventory updates.
- Designed dynamic and responsive user interfaces with Angular, enhancing user experience for order tracking and management dashboards.
- Utilized Kafka for asynchronous messaging between microservices, enabling reliable communication and improving system scalability.

- Created and optimized RESTful APIs to integrate with external services such as payment gateways and logistics providers.
- Improved database performance by optimizing PostgreSQL queries and leveraging Redis for caching frequently accessed data.
- Automated deployment pipelines using Jenkins and Docker, reducing system downtime during updates by 30% and improving release efficiency.
- Collaborated with cross-functional teams in an Agile environment, contributing to sprint planning, code reviews, and daily stand-ups to ensure project success.

Tatva Soft

January 2020 – June 2021

Software Developer

- Contributed to the development of full-stack web applications using Spring MVC and Hibernate, improving system response time by 25% through optimized database queries and efficient API design.
- Contributed to the development of full-stack web applications using Spring MVC and Hibernate for backend operations.
- Designed dynamic and responsive UI components with HTML5, CSS3, and JavaScript, enhancing user experience.
- Built data models and optimized queries for MongoDB and MySQL, ensuring efficient database operations.
- Integrated secure payment gateway systems and ensured compliance with security protocols like SSL/TLS.
- Conducted code reviews and implemented JUnit testing for consistent code quality.
- Collaborated with senior developers to troubleshoot and resolve application bugs, ensuring seamless system functionality.
- Participated in Agile methodologies, attending daily stand-ups and contributing to sprint planning sessions.

PROJECTS

Flight Delay Prediction Using Machine Learning

- Developed a machine learning model using Random Forest & Gradient Boosting to predict flight delays, improving accuracy by 15%.
- Preprocesses large datasets with Pandas and visualized key insights using Matplotlib and Seaborn.
- Designed an automated pipeline to handle data cleaning, feature engineering, and model evaluation for scalability.

Coffee Shop Management System

- Developed a full-stack web application using Vue.js for the frontend and Django for the backend.
- Implemented role-based access control (RBAC) for secure user authentication and authorization.
- Designed real-time order updates using WebSocket and integrated Stripe API for payment processing.
- Built a comprehensive reporting dashboard with Chart.js, enabling actionable business insights.

E-Commerce Platform

- Built an e-commerce solution using React.js, Express.js, and PostgreSQL for dynamic inventory management.
- Implemented server-side caching with Redis to improve performance and reduce response times.
- Used Terraform to provision and manage infrastructure on AWS, including S3, Lambda, and CloudFront.
- Designed a secure checkout system with OAuth2 for user authentication and third-party payment gateway integration.

EDUCATION

Master of Science in Computer Science

University of Alabama at Birmingham — GPA: 3.9

Bachelor of Science in Computer Science

Madanapalle Institute of Technology and Science, India — GPA: 7.34

CERTIFICATIONS

- **AZ-900: Microsoft Azure Fundamentals** — January 2022
- **Azure AI Fundamentals** — October 2022
- **Programming for Everybody (Python)** — May 2020
