<https://www.linkedin.com/in/sai-kiran-p/>

Lead Full Stack Developer with more than 10 years of experience in developing various web applications using JavaScript, TypeScript, Java, Micro Services, React JS, Angular JS. Adept in handling all the phases of SDLC i.e., from requirements gathering to development to deployment. Best at transforming the business requirements into technical solutions.

EXPERIENCE SUMMARY:

- Strong experience as a **full stack web developer**, creating **Single Page Web** applications with **React JS, Angular JS** as front end and **Java, Spring, Node** as back end.
- Extensive experience in developing Front-end Application using **JavaScript, TypeScript, jQuery, HTML5, CSS3** and **AJAX** and building vibrant UI.
- Leveraged modern Typescript tools like **TSLint / ESLint, Prettier, Webpack** for efficient code quality checks and builds.
- Implemented **Security best practices in JavaScript** such as input sanitization and XSS prevention to safeguard applications from common vulnerabilities.
- Used modern JavaScript **ES6+** features such as arrow functions, template literals, destructuring, async / wait for cleaner and more efficient code.
- Employed JavaScript performance optimizations **like lazy loading, debouncing and throttling** to improve page load times.
- Integrated external APIs using **AJAX and the Fetch API** to retrieve data dynamically improving the user experience without page reloads.
- Used **CSS grid, CSS flexbox**, and **Media queries** to do **responsive web design** that fits all users and devices from desktop to tablet and mobile phone.
- Experienced in Server-Side programming using **Node.js** and **NPM** modules like **Express.js, CORS, BODY-parser, Mongoose**, and **Json Web Token (JWT)**.
- Proficient in developing Single Page Application (SPA) using **Angular JS** and **React.js**.
- Experienced in writing test cases using **Karma, Jasmine, Jest**.
- Created Single page applications with React using **Hooks, Redux** for global state management and using react state object with **lifecycle methods** for component's internal state management. Used **react - router** for routing.
- Built and maintained **reusable React Components** and styled them using **styled-components**, ensuring modular and maintainable code.
- Improved application performance by using **React.memo** and **useMemo** for optimization and component re-renders.
- Utilized **Next.js** for server side rendering to improve **SEO** and application performance.
- Expertise in open source library **Semantic UI, Material UI**.
- Experienced in database systems like **MySQL, SQL Server, Oracle** and NoSQL database like **MongoDB**.

- Experienced in using **Java Spring JPA** with **Hibernate** to integrate **Oracle, SQL Server** into back end web applications and performing **CRUD** and aggregation operations on database.
- Good experience on Apache **KAFKA as Producer and Consumer**.
- Extensive knowledge on **Java SE** including **Collection, Threading**, and Core Java.
- Good experience on **Java EE** technologies such as **Servlet** and **JDBC**.
- Strong programming skills in designing and implementation of multi-tier applications using web-based technologies like **Spring Boot**.
- Skilled with Spring Core such as **Dependency Injection, Annotations**, and **Configurations**.
- Extensively worked on **Spring JDBC, Spring Hibernate ORM**, and **JPA**.
- Strong experience using **MAVEN 3.0** Build System.
- Good experience in developing applications with **RESTful Web Services**.
- Good understanding of **Spring Security**.
- Good experience in developing applications with **Spring Reactive** and **Java8** programming.
- Experience in implementing **Redis** cache and improving RESTFUL API response time by 70%.
- Deployed and managed microservices on **Kubernetes** clusters, **Pivotal Cloud Foundry (PCF)**.
- Containerized applications using **Docker**. Created and maintained Dockerfiles and docker-compose configurations.
- Good Experience in designing and developing end to end business process management using **Appian, Bonita**.
- Integrated external systems and data sources with Appian using **web APIs and Rest Services**.
- Involved in all stages of Software Development Life Cycle (**SDLC**) as well as working in **AGILE** Methodologies based development environment, participating in sprint/iterations and **SCRUM** meetings.
- Expert in **SaFe** Methodology and able to handle the **PI Planning**.
- Strong in **taking and analyzing the requirements**, identifying the technical problems and solutions ahead of development for the business requirements.
- Experience in working with AGILE tools like **JIRA**. Creating the story, acceptance criteria, attaching the Figma Mock ups.
- Responsible in maintaining the code repositories using **GIT** through **Github, Gitlab** and **Bit Bucket**.
- Good idea in cloud computing - **Amazon Web Services (AWS)** and **Google Cloud Platform**.
- Strong experience in **Insurance, Tele Communications, Retail** and **Health Care** Domains

TECHNICAL SKILLS:

Web Technologies: HTML5/HTML, CSS3/CSS, JavaScript ES5/ES6, JQuery, AJAX, JSON, Node.js, React.js 18, Express.js, Angular 18, Type Script

Languages: JavaScript, Java, SQL, C, J2EE, SQL

Tools: Visual Studio code, Spring Tool Suite (STS), Eclipse, IntelliJ, JIRA, Figma

Version Control: GIT, GitHub, Gitlab, Bit Bucket.

Databases: Oracle, SQL Server, Mongo, Postgres

Frameworks: Spring, Spring Boot, Spring DAO, Hiberante (ORM), Spring Data JPA, Apache Kafka, Rabbit mq

WORK EXPERIENCE:

CVS Health, Charlotte, USA

Feb 2024 - Current

Responsibilities:

- **Led a cross functional team of 8 developers** in delivering scalable web applications ensuring on time delivery and high code quality.
- Developed and maintained single-page applications using **Angular, TypeScript, RxJs**.
- Implemented **NgRx** for robust state management and side effects handling.
- Configured **Angular Router** for navigation and applied lazy loading to optimize performance and reduce initial load time.
- Applied angular material and custom theming to deliver **responsive and accessible UIs**.
- Conducted unit and end to end testing using **Jasmine and Karma**.
- Developed another **React application with React 18** for Front End User Interface.
- Built the **functional and class based components** for the application.
- Used **JSX** to render HTML like syntax in JavaScript code.
- Fetched and integrated REST APIs for handling asynchronous data using **AXIOS**.
- Managed client side routing with **React Router** in Single-Page Application.
- Implemented **Redux** to resolve application's global state management
- Enhanced user experience with React's life cycle methods including **componentDidMount, shouldComponentUpdate, componentWillUnmount** etc.
- Efficiently developed the code by using the hooks like **useState, useEffect, useMemo, useCallback, useRef and useContext**.
- Created unit tests and conducted integration testing using **Jest and React Testing Library**.
- Used build tools like **webpack and Babel** for bundling and transpiling the code.
- Worked on latest **ES6 features** including let, const, and arrow function.
- Used **Docker** for containerization and **Jenkins** for CICD.
- Developed the backend server with **Spring Boot, Java 17** involving different layers of the application including **entity/model, DAO/repository, Controller, Service, Business, and Persistence**.

- Involved in creating and designing **POSTGRES** database, and connect database with **Spring Data JPA**.
- Configured the Authorization and Authentication for the API.
- Integrating **Swagger Open API** and **Actuator** in the API.
- Worked together with the cloud team in configuring **KAFKA** as producer and consumer in different environments.
- Developed micro services to process messages in the KAFKA cluster.
- Worked on reprocess failed messages in Kafka with offset id.
- Experience in **Kibana elastic search** to identify the kafka message and other api requests based on correlation id and get the payloads.
- Implemented **Redis** for caching frequently accessed data, reducing database load and improving api performance.
- Used **JUnit** testing with **Mockito** for quality assurance with code quality standard set at 80%.
- Developed **RESTful** API for front end API usages.
- Responsible for design and maintenance of the **Git** repositories.
- Participated in **SaFe Agile** methodology for application development and **SCRUM** meeting every day.
- Proposed **technical solutions** to the business requirements.
- Brainstormed the JIRA stories and refined the requirements during the **grooming sessions**.
- **Proposed designs ahead of development task** to make development easy and to ensure there are no problems in the development.
- Good experience in development with **OWASP** and **Accessibility** standards.

Environment: VS code, Git, HTML, CSS, JavaScript, React JS, JSX, Redux, Jest, Axios, Spring Boot, Java, Spring Data JPA, Junit, Log4j, Maven, Postgres, and Mac, Figma.

Persistent Systems Limited, Hyderabad, India

Senior Engineering Lead

May 2023 – December 2023

Responsibilities:

- **Managed a 12 Developer team** with multiple applications and technologies and responsible for on time deliveries, requirement gathering and design discussions.
- Developed server-side application with **Node JS, Type Script and Java Script**.
- Implemented **async/await, promises and Observables** to optimize performance in TypeScript applications.
- Utilized Typescript in combination with **Jest, Mocha** to ensure robust unit and integration tests.

- Worked on multiple TypeScript data grids with **filtering, sorting, client side and server side pagination**.
- Worked on multiple **Type Ahead and Search** functionalities involving large chunks of data in TS and JS.
- Practiced latest **ES6** features including let, const, and arrow function.
- Implemented **event driven architecture** and **state management** to enhance the performance and scalability of JavaScript applications.
- Created and maintained custom **TypeScript Types/Interfaces** to enhance code predictability and enforce business logic.
- Developed the backend server with **Spring Boot**, involving different layers of the application including **entity/model, DAO/repository, Controller, Service, Business, and Persistence**.
- Involved in creating and designing database, and connect database with **Hibernate (ORM)**,
- Involved in authentication process. Configured Spring for customized **JwtTokenProvider**, incorporated **JwtFilter**, yet not conflicting global **CORS** requirement.
- Involved in configuring KAFKA as producer and consumer.
- Developed micro services to process messages in the KAFKA cluster.
- Worked on reprocess failed messages in Kafka with offset id.
- Experience in **Kibana elastic search** to identify the kafka message and other api requests based on correlation id and get the payloads.
- Used **JUnit** testing for quality assurance.
- Developed **RESTful** API for front end API usages.
- Started the front end application with **React** and used **state object React Class Component** for general stateful management.
- Implemented **redux** to resolve application's global state management
- Enhanced user experience with **React's** life cycle methods, including **componentDidMount, shouldComponentUpdate, componentWillUnmount**, etc.
- Used React 16.8's new feature **Hooks** to rewrite/re-factor front-end application.
- Developed the web application with the newest **React** features centralized with **Hooks**.
- Used **axios** for http requests and attached Bearer token for secure usage of API.
- Used **node** for quick development.
- Replaced React class component with functional component. For stateful management, replaced with new Hooks like **useState, useEffect, useReducer, and useRef**.
- Developed and streamlined various business processes using **Bonita and Appian**.
- Implemented business rules using **Appian's business rule engine** to automate decision making and to improve consistency of process across various flows.
- Experience in building infrastructure using AWS Cloud Development Kit.
- Used various CI/CD tools like Jenkins, Ansible, CloudFormation, BitBucket.
- Responsible for design and maintenance of the **Git** repositories.
- Participated in **SaFe Agile** methodology for application development and **SCRUM** meeting every day.
- Good working knowledge on AWS Serverless Architecture.

- Actively reviewed team's work, pull requests, processes and enhanced them in order to improve team's efficiency, speed and quality.

Environment: VS code, TypeScript, Git, HTML5, CSS3, JavaScript, React.js, React Hooks, SpringMVC, Spring Boot, J2EE, Hibernate 4.x, Kafka, Junit, Log4j, Maven, SQL Server, and Windows 10.

Verizon Data Services India Pvt Ltd, Hyderabad, India

Engr II – Software Development

August 2018 – May 2023

Responsibilities:

- Developed multiple full stack applications with **JavaScript, React, Angular and Type Script**.
- Used JavaScript performance optimizations like **Lazy Loading, Debouncing**.
- Used **TSLint/ESLint, Prettier and webpack** for quality check and builds.
- Worked on multiple JavaScript data grids with **filtering, sorting, client side and server side pagination**.
- Developed the back-end with **Spring Boot** involving different layers of the application such as entity/model, DAO/Repository, Controller Service.
- Involved in managing the relational databases like **Oracle, PostgreSQL** with **Hibernate ORM**.
- Developed micro front end using **Angular JS** improving load time and user experience.
- Implemented **two-way data binding, custom directives and dependency injection** to build scalable components in angular application.
- Optimized the performance of Angular JS apps by reducing **watchers, lazy loading modules and managing digest cycles**.
- Integrated Angular JS to consume the **backend Restful APIs**.
- Wrote unit tests using **Karma and Jasmine** for the angular application.
- Migrated Java and React JS apps to **Kubernetes** from **PCF**.
- Developed the front end application with React JS.
- Implemented **AWS Lambda, S3, DynamoDB, AWS CLI**.
- Good knowledge on event driven and distributed architectural design patterns.
- Implemented the **Redux** to resolve application's global state management.
- Handled **Jenkins** and **CICD** pipelines for build and deployment processes.
- Responsible for the maintenance of **GIT repositories** for version control and collaboration.
- Worked in Agile methodologies for different projects especially **SaFe**.

- Participated in the business discussions and converted the business requirements into usable software solutions.
- **Lead the team of 5 members** and helped the team in surpassing all the challenges.
- Handled **all the phases of SDLC**.

Environment: VS code, JavaScript, TypeScript, Git, Spring, Spring Boot, J2EE, Hibernate 4.x, Junit, REST, Maven, SQL Server, React JS, Angular JS, HTML5, CSS3, STS, AWS.

Infosys Limited, Chennai, India

Senior Systems Engineer

March 2014 – August 2018

Responsibilities:

- Worked in various development, maintenance and support projects using **Java/J2EE** for development.
- Developed the applications using Spring Boot and **Micro Services**.
- Used **Spring MVC** and **Hibernate** in multiple projects.
- Developed **Restful APIs** for front end usage.
- Implemented **Junit** test cases for quality assurance.
- Tested the APIs using the Postman tool.
- Developed front end web pages with HTML5, CSS and **Java Script, jQuery** and **AJAX**.
- Resolved production related issues quickly by trouble shooting.
- Suggested modification for the project growth by analysis and evaluation of performance results.

Environment: Eclipse, SVN, JavaScript, Spring MVC, Spring Boot, J2EE, Hibernate, Junit, Maven, Oracle, jQuery, AJAX, HTML5, CSS3.

EDUCATIONAL QUALIFICATIONS:

- I had completed my **B. Tech** from Gudlavalleru Engineering College with an aggregate of **72.84%** in Computer Science and Engineering.
- I had completed my **+2 education** from Sri Srinivasa Junior College, Vuyyuru with an aggregate of **95.5%**
- I had completed my **SSC** from Vijaya Sai E.M School, Vuyyuru with an aggregate of **84.5%**
