

SAI KUMAR ANCHURI

QA Engineer

(269) 210-9345 | [Email](#) | [Linkedin](#) | Tampa, FL 33647

SUMMARY

- **3 years experienced QA Automation Specialist** with extensive expertise in designing and implementing test plans, test cases, and strategies to ensure high-quality web, mobile, and healthcare applications.
- Expert in **Automation Testing** using **Selenium WebDriver**, **TestNG**, and **JUnit frameworks**, with hands-on experience creating scalable, maintainable **test scripts in Java, Python, and Groovy**.
- Skilled in **Database & API Testing** with a proven ability to validate data integrity using **SQL** and test **JSON/SOAP APIs** using **SOAP UI**, **Groovy scripts**, and **REST API** testing tools.
- Experienced in **CI/CD Processes** leveraging **Jenkins**, **Maven**, and **GitHub** to integrate testing into continuous development pipelines, ensuring efficiency, consistency, and seamless collaboration across teams.
- Versatile Problem-Solver with expertise in **performance testing using JMeter**, **cross-platform testing** with **Selenium Grid** and **Appium**, and **Agile methodologies**, ensuring comprehensive test coverage and reliable software delivery.

SKILLS

Languages:

Java, Python, Groovy, SQL

Automation Testing Tools & Frameworks:

Selenium WebDriver, TestNG, Junit, Appium, SOAP UI, Groovy Scripts, Jenkins, Maven, JMeter, Selenium Grid

API Testing & Web Services:

JSON API Testing, SOAP API Testing, REST API Testing

Database:

Oracle, SQL Server, MySQL, PostgreSQL

Performance Testing:

Apache JMeter, Load Testing

Version Control & CI/CD:

GitHub, SVN, Jenkins, Docker

Methodologies & Management Tools:

Agile (Scrum, Kanban), JIRA, Quality Center/ALM, TDD, FDD, BDD

Mobile Application Testing:

Appium, Device Logs

Cross-Browser/Cross-Platform Testing:

Selenium Grid, BrowserStack

Test Design & Execution:

Test Case Creation, Regression Testing, Functional Testing, GUI Testing, Usability Testing

Reporting & Metrics:

HTML reports, Maven, TestNG, Test Automation

Other Skills:

Data-Driven and Keyword-Driven Testing, Page Object Model (POM) Design Pattern, Continuous Monitoring and Issue Analysis, Strong Analytical and Problem-Solving Skills

EXPERIENCE

CITIUS TECH, USA

Software QA Engineer

| Sep 2023 – Till Date

- Developed and implemented test plans, cases, and strategies to ensure high-quality healthcare applications and data systems.
- Created & maintained automated test scripts to improve efficiency & consistency across testing workflows, ensuring scalable testing operations.
- Utilized Selenium with Java to create, execute, and maintain automated test cases for web-based healthcare applications.
- Conducted comprehensive database testing by SQL, ensuring accurate data storage, retrieval, and consistency within critical healthcare systems.
- Developed & executed performance test scripts by JMeter, focusing on HTTP/HTML & JDBC to ensure system scalability and responsiveness.
- Leveraged Jenkins to automate test execution, ensuring seamless integration of testing into continuous development & deployment process and maintained test scripts, related resources in GitHub, facilitating efficient collaboration & version control across QA team.
- Worked closely with developers, business analysts, and end users to define requirements, design test criteria, and ensure user acceptance.
- Tracked & analyzed testing performance metrics, defects, and outcomes, providing actionable insights to improve system quality and reliability.

ENCODE TESTERS, India

QA Engineer

| Aug 2019 – Jul 2021

- Designed and executed automated test cases using Selenium WebDriver and Java in JUnit/TestNG frameworks, ensuring robust testing coverage for web-based applications.
- Performed comprehensive testing in an Agile environment, participating in daily stand-ups, sprint planning, and pair programming to deliver quality software within 2 or 4-week sprints.
- Used Jenkins for continuous integration, managing automated test execution & monitoring builds for consistent deployment processes.
- Performed cross-browser and cross-platform testing on various devices using Appium for mobile apps and Selenium Grid for web apps.
- Conducted backend testing using Oracle/SQL, validating data accuracy, integrity, and seamless integration within applications.
- Tested JSON and SOAP APIs using SOAP UI and Groovy scripts by developing and executing test cases to validate functionality, reliability, and performance.
- Created custom reports for test automation coverage using Maven, delivering actionable insights to stakeholders in HTML format.
- Worked with development & business teams, clarifying requirements, mapping business scenarios to test cases, facilitating issue resolution.
- Documented and managed test cases in tools like JIRA and Quality Center, logging and tracking defects, and contributing to the successful resolution of issues.

EDUCATION

Masters in Computer & Information Science, Saint Leo University – Tampa, FL, USA

| Jul 2023
