Mohammed Fazul Haq

SUMMARY

Proficient SAP Integration Lead Consultant with extensive experience spanning 18+ years in SAP ERP, S4HANA, S4RISE, and B TP Integration suite, driving full life cycle implementations and delivering high-quality solutions. Demonstrated expertise in various SAP solutions including XI, PI, PO, ABAP, CPI-PI, CPI-DS, BTP Integration Suite, Ariba CIG, and MDM modules. Recognized for exceptional skills in designing and implementing A2A, B2B, B2C, and B2G integrations, with comprehensive knowledge of SAP Integration solutions. Adept computer systems analyst with a diverse industry background, possessing excellent communication, interpersonal, and architectural abilities. Proven ability to resolve complex technical issues, with a strong track record of delivering results-driven solutions.

EXPERIENCE

SAP Integration Lead Consultant

I3 GlobalTech Inc

Nov 2024 - Present, USA

SAP Senior CPI-PI & CPI-DS Consultant

Al Watania Information Systems

Oct 2023 – Nov 2024, KSA

SAP CPI & PI/PO Integration Lead

Tata Consultancy Services

Feb 2022 - Oct 2023, IND

SAP Integration Analyst

ITC InfoTech

May 2019 - Feb 2022, IND

SAP Integration HCI & DS Team Lead

Fujitsu

Dec 2017 - May 2019, UAE

SAP Integration Lead Consultant

Capgemini

Nov 2016 - Nov 2017, IND

SAP Integration Expert

Tech Mahindra

Dec 2014 - Oct 2016, IND

SAP Senior System Engineer

IBM-GBS

Aug 2008 - Dec 2014, IND

SAP Technical Developer

Future Comm Technologies

Jun 2005 - Aug 2008, IND

PROJECTS

Kenvue Inc, USA

I3 GlobalTech Inc • Nov 2024 – Present

- Orchestrated strategic collaboration with key stakeholders to define integration roadmaps, delineate project scope, establish industry-leading best practices, and elicit critical requirements, culminating in the delivery of tailored solutions that align seamlessly with organizational objectives and foster cross-functional synergy.
- Spearheaded the design and implementation of an extensive portfolio of SAP CPI/CI integrations, spanning S4HANA, LIMS, MES, BW4HANA, SuccessFactors, ensuring uninterrupted data flow, enhanced system interoperability, and the optimization of end-to-end business process orchestration.
- Engineered and deployed integration suite capabilities like AEM, APIM, B2B, IA and OC to seamlessly interconnect to third-party applications with SAP ecosystems, enabling robust data synchronization, streamlining operational workflows, omnichannel and enhancing business agility through the eradication of data silos.
- Executed comprehensive end-to-end testing and meticulous troubleshooting of SAP CPI/CI integrations, proactively identifying and resolving technical challenges to ensure unparalleled system reliability, operational uptime, and service excellence, thereby safeguarding business continuity and minimizing operational disruptions.

Saudi Irrigation Organization, KSA

Al Watania Information Systems • Oct 2023

- Facilitated strategic collaboration with stakeholders to articulate integration roadmaps, define project scope, establish best practices, and gather requirements, ultimately delivering solutions harmonizing with business objectives and driving organizational synergy.
- Conceptualized and implemented a comprehensive suite of SAP CPI integrations, encompassing S4HANA, ARIBA CIG, SuccessFactors, SCADA, ORACLE, MS DOT NET, SAP CX, SAP EAM, Eltezam, Yakeen, SARF, GSB, SFTP, and GIS, to ensure seamless data exchange, system interoperability, and optimized business process orchestration.
- Configured and managed SAP CPI interfaces, leveraging the CALM framework to streamline business processes, enhance system efficiency, and foster a culture of continuous improvement.
- Designed and developed sophisticated integration flows to connect third-party applications with SAP solutions, optimizing data synchronization, operational workflows and driving business agility through the elimination of data silos.
- Conducted rigorous end-to-end testing and troubleshooting of SAP CPI integrations, identifying and resolving issues, and ensuring high system

reliability, uptime, and overall service quality, minimizing downtime and maximizing business continuity.

Dupont Inc, USA

TATA Consultancy Services • February 2022

- Spearheaded the business requirement gathering process, fostering alignment with diverse stakeholders and actively contributing to the blueprint phase to ensure seamless project initiation.
- Designed and developed intricate integration workflows for CPI data integration and migration, leveraging expertise in Salesforce, Primavera, SAP PO, Derby, Mini Master, APO, Sphera MDM, and SharePoint integrations to drive business process optimization.
- Configured a range of adapters, including SFDC, SFTP, HTTP, IDoc, RFC, Mail, SOAP, REST, Advantco and Rojo, to facilitate seamless data exchange and ensure interoperability across disparate systems.
- I have taken the ownership on downloading, installing CPI-DS agent on server with the help of SAP Basis consultant.
- Integrated S4HANA and IBP with CPI-DS for data migration of sales orders, sales forecasting price, extracting customer master, vendor master and supply chain planning data using IBP standard templates and custom data flows.
- Created projects, task, destinations, data flows, mappings, schedule jobs and monitor the status of the end-to-end data load mechanism.
- Worked on e-commerce integrations for product catalog, order management, payments, customer service, marketing, and analytics between SAP Hybris and S4HANA systems using SPA CPI
- To create work orders in Primavera interface has to perform multiple activities (Read project, read WBS, update WBS and create WBS, Activity, UDF and Code) activities.

Philips, NL

ITC Infotech • May 2019

- Role and Responsibilities: Served as Team Lead/Business Analyst (TL/BA) and Single Point of Contact (SPOC) for SAP Process Orchestration (PO) integrations with Global Trade Services (GTS), SAP, and various legacy systems. Took ownership of solution design and development for complex integrated scenarios.
- Project Management: Engaged in Fiori, NWBPM, and Product Data Hub (PDH) effort estimation, project preparations, and workflow design in collaboration with Business Process Experts (BPE) and infrastructure setup for a complex integration project.
- Collaboration: Worked closely with client teams, stakeholders, SAP PO, and BASIS teams to establish a new landscape design for UK Brexit interfaces.
- Client Landscape Understanding: Gained a comprehensive understanding of the client's SAP landscape, non-SAP applications, ServiceNow approval processes, and the Architectural Review Board (ARB) and Review Control Board (RCB) processes.
- Interface Development: Developed SAP PO interfaces related to Order-to-Cash (O2C), focusing on design, mapping, and configuration in GTS, while applying mapping logic effectively.
- Configuration Expertise: Configured ALE/IDOC settings in a Java-only stack from the ground up for GTS integrations.
- Testing and Go-Live: Participated in Unit Testing (UT), System Integration Testing (SIT), User Acceptance Testing (UAT), and the go-live preparation process.
- Fiori and PDH Implementation: Worked on Fiori and PDH for product data creation, updates, and approval processes utilizing NWBPM.
- Cloud Services Integration: Implemented Business Rules Management (BRM) functionality, along with logging and tracing capabilities using Azure cloud services in NWBPM.

AGA Trading Company L.L.C, UAE

Fujitsu • December 2017

- Integration Lead and SPOC Role: Served as the Lead consultant and Single Point of Contact (SPOC) for SAP Cloud Platform Integration (CPI) with Process Integration (PI), Data Services (DS/ETL), and HANA Cloud Connector (HCC) integrations. Successfully redeveloped all PI/PO interfaces in CPI-PI, delivering the project on time. Took ownership of Purchasing CPI-PI and DS licensing, as well as the solution design and development of complex integrated scenarios.
- Hybrid Cloud Solutions: Provided solutions and implemented best practices for hybrid cloud solutions utilizing CPI-PI, CPI-DS, and HCC components. Managed all prerequisites, build, deployment, and configuration of end-to-end interfaces.
- Data Replication: Facilitated the replication of Article Master, Department, Promotions, and Sales data from S/4HANA to third-party integrations through Point-of-Sale interfaces.
- Migration Interfaces: Led the migration of interfaces from on-premises systems to the cloud platform, specifically transitioning from SAP PI to CPI-PI and CPI-DS. Gained expertise in design, mapping, and configuration in PI, applying effective mapping logic.
- Cloud Landscape Management: Took ownership of maintaining the CPI-PI cockpit and HANA Cloud Connector, establishing the cloud landscape with S/4HANA, Oracle, Synchron, and other legacy systems within the client environment.
- Collaboration with Stakeholders: Collaborated closely with clients, SAP Cloud teams, functional and technical teams, and other legacy SPOCs to integrate complex designs and configurations of interfaces.
- Integration Monitoring: Configured email alerts for all integrations to notify support consultants of successful and failed interface executions within the customer landscape.
- Application Integration: Integrated the CARS-ORBIT application with S/4HANA using SAP CPI-DS for batch interfaces, including 'Customer Receipts', 'GL Account Transactions', and 'Customer and Payments'.

General Electric, USA

Capgemini • November 2016

- SPOC Role: Served as Team Lead and Single Point of Contact (SPOC) for SAP Process Orchestration (PO) integrations, Web Methods migrations, and various legacy systems. Took ownership of solution design and development for complex integrated scenarios.
- NWBPM Solutions: Provided solutions for NWBPM design, managing all prerequisites, build, deployment, and configuration of end-to-end interfaces.
- Migration Interfaces: Led the migration of Order-to-Cash (O2C) related interfaces from Web Methods to SAP PO, gaining expertise in design, mapping, and configuration in Web Methods while effectively applying mapping logic.
- Custom Data Integration: Developed solutions for invoking custom data types in stored procedures using RESTful services with a Java Wrapper Class, ensuring compatibility with SAP PO's standard functionality to meet client requirements.
- Landscape Design Collaboration: Collaborated closely with the SAP PO and BASIS teams to establish a new landscape design for interfaces in China.
- CPI Licensing and Configuration Support: Assisted with CPI licensing, landscape setup, configuration, and development activities across various organizational projects.

- **Mentorship and Support:** Mentored the GE AMS support team to facilitate faster issue resolution and minimize SLA breaches.
- **Rosetta Net Integration:** Worked on Rosetta Net integration with SAP systems to implement supply chain processes, facilitating the exchange of product and materials data between SAP, Rosetta Net, and third-party business systems.
- **Business Rules Management:** Developed scenarios using Business Rules Management (BRM) to implement policies through rules compiler, preparing rule sets and decision-making tables for Human Resource Management Systems (HRMS) and financial applications.

Cambridge University Press, UK

Tech Mahindra • December 2014

- **Team Lead:** Assumed full ownership as Team Lead and Single Point of Contact (SPOC) for SAP PI and PO integrations, as well as various legacy systems. Collaborated closely with client consultants to develop solutions, design, and implement complex integrated scenarios.
- **Collaboration with Technical Teams:** Worked closely with SAP NW Basis and functional teams to identify and resolve system and technical gaps, ensuring system stability.
- **NW BPM Interface Development:** Developed NW BPM interfaces using NWDS for Human Resource Management System (HRMS) applications, specifically for travel and leave approval processes across the organization.
- **SAP PI Interface Review:** Conducted comprehensive reviews of SAP PI interfaces, including ESR standard bundles, industry standards and best practices, audit issues, areas for improvement, principal propagations, security mechanisms, and overall system streamlining processes.
- **CPI Solution Design and Configuration:** Designed solutions, managed installations, and configured Cloud Platform Integration (CPI) to successfully integrate with on-premises SAP HR/HCM applications.
- **SuccessFactors Integration:** Integrated SuccessFactors (Employee Central, Recruiting Management, Learning Management System, and Performance and Compensation Management) with on-premises systems using CPI, leveraging SuccessFactors APIs and OData APIs. Provided solutions for the implementation and integration of Payroll and Time Management modules.
- **Comprehensive Integration Solutions:** Integrated CPI with on-premises and legacy applications using SuccessFactors, OData, IDOC, and SOAP adapters, employing various message protocols to ensure seamless data flow.

Saudi International Petro Chemicals, KSA

IBM • November 2014

- **Client Engagement in Saudi Arabia:** Worked on-site in Saudi Arabia, assuming full ownership as the Single Point of Contact (SPOC) for the SAP PI integration module.
- **Integration of Cloud Systems:** Successfully integrated Cloud SAP ERP and CRM systems with legacy cloud systems, ensuring seamless data flow and operational efficiency.
- **Project Go-Live Contributions:** Played a pivotal role in the go-live activities for the IPC and MESH projects, contributing to their successful implementation.
- **Collaboration with Technical Teams:** Collaborated closely with SAP BASIS functional and technical consultants to gather comprehensive end-to-end requirements, ensuring timely delivery of project deliverables.
- **Database Management:** Took ownership of the SQL database, creating and transporting multiple tables in accordance with project requirements.

Beta pharma Arzneimittel GmbH, Germany

IBM • April 2012

- **Ownership and SPOC Role:** Assumed full ownership and served as the Single Point of Contact (SPOC) for SAP PI, PO integration, and Master Data Management (MDM) modules. Collaborated closely with client consultants to integrate numerous complex scenarios.
- **Collaboration with SAP NW BASIS Team:** Worked closely with the SAP NW BASIS team on PO installations enabled by HANA, actively participating in post-installation activities.
- **Complex Integration Scenarios:** Developed and implemented a robust integration scenario that connects the PHOENIX mailbox with SAP ECC systems using EDI, leveraging the SeeBurger Business Integration Suite and SAP XI/PI.
- **B2B Configuration:** Managed B2B configurations utilizing the SeeBurger adapter, including the configuration and post-installation setup of SeeBurger adapters.
- **Tax Compliance Integration:** Worked on advanced return processes for sales and purchases, implementing electronic tax return compliance with ELSTER 2.1 in Germany.
- **Integration with MES, LMS, and KRONOS:** Engaged in integrations related to SAP Manufacturing Execution Systems (MES), Learning Management Systems (LMS), and KRONOS, connecting various business systems within the DRL landscape.
- **Interface Design and Development:** Designed and developed interfaces between SAP and third-party systems, including Genpact and Proflow Integration.
- **SAP PI 7.4 Configuration:** Involved in both pre-installation and post-installation activities for SAP PI 7.4, configuring IDoc_AAE and SFTP adapters to ensure seamless data exchange.

Harley Davidson, USA

IBM • August 2008

- **Requirements Analysis and Technical Specification Design:** Analyzed functional specifications and gathered requirements by participating in Functional Design (FD) walkthroughs. Designed technical specifications for interfaces and ABAP objects.
- **Complex Data Type and Message Interface Design:** Developed numerous complex data types, message types, and both outbound and inbound message interfaces to meet project needs.
- **Message and Interface Mapping:** Created message mappings and interface mappings, utilizing node functions for data conversions in accordance with client requirements.
- **User-Defined Functions and RFC Lookups:** Designed user-defined functions and implemented Remote Function Call (RFC) lookups to enhance data processing capabilities.
- **Integration Directory Configuration:** Configured the integration directory by establishing integration scenarios, routing roles, receiver and interface determinations, receiver system endpoints, context objects, and communication parties and channels.
- **Adapter Configuration and Testing:** Configured and tested various adapters, including FILE, JDBC, and IDoc, as required by specific integration scenarios.

- Outbound ABAP Proxy Creation: Developed outbound ABAP proxies to facilitate seamless communication between systems.
- Process Monitoring: Conducted process monitoring using the XI monitoring tool (Runtime Workbench) for all interfaces to ensure optimal performance and issue resolution.
- ABAP ALV Report Development: Developed an ABAP ALV report that displays stock comparisons between HDE and CAT systems, providing valuable insights for inventory management.
- Project Documentation: Created SDMS, RTVM, and WPI documentation for the complete project, ensuring comprehensive project tracking and compliance.

RPG-Zensar, India

Future Comm Technologies • June 2005

- Functional Specification Analysis and Requirements Gathering: Analyzed functional specifications and gathered requirements by participating in Functional Design (FD) walkthroughs. Designed technical specifications for interfaces and ABAP objects.
- Complex Data Type and Message Interface Design: Developed a variety of complex data types, message types, and both outbound and inbound message interfaces to meet project specifications.
- Message and Interface Mapping: Created message mappings and interface mappings, utilizing node functions for data conversions in alignment with client requirements.
- Integration Directory Configuration: Configured the integration directory by establishing integration scenarios, routing roles, receiver and interface determinations, receiver system endpoints, context objects, and communication parties and channels.
- Adapter Configuration and Testing: Configured and tested various adapters, including SOAP, RFC, IDoc, and JDBC, as required by specific integration scenarios.
- Process Monitoring: Conducted process monitoring using the XI monitoring tool (Runtime Workbench) for all interfaces to ensure optimal performance and timely issue resolution.
- Technical System Configuration: Configured technical systems, business systems, products, and software components using the System Landscape Directory (SLD).
- High-Priority Ticket Management: Addressed high-priority tickets, monitored all interfaces, and implemented performance improvements to enhance system efficiency.
- ALE/IDoc Configuration: Managed ALE/IDoc configuration and created ABAP tables to facilitate integration between SAP and non-SAP applications.
- ABAP Development: Developed function modules, classical reports, and interactive reports in ABAP for Sales and Distribution (SD), Materials Management (MM), and Production Planning (PP) modules.

EDUCATION

Bachelor of Engineering | Electronics and Communication Engineering
