Automation & Customization	Flows , Custom Objects , Validation Rules , Formula Fields , Approval Processes
Salesforce Development	Apex , Lightning Web Components (LWC) , SOQL , SOSL
Integration	REST / SOAP APIs
Testing	Manual Testing , Automation Testing , Selenium , TestNG
Agile & DevOps	Git , CI/CD , VS Code

Experience Summary

Project 1 :

Project Title : Medical Equipment Manufacturing System
 Duration : January 2023 – till date
 Role : Salesforce Administrator / Developer
 Employer : Modern Solutia LLC.

Responsibilities:

- Developed and optimized **Apex triggers, classes, and test classes** to implement business logic and ensure high code coverage.
- Developed **Apex methods** to handle complex server-side logic, such as data retrieval, processing, and validations.
- Developed **SOQL** queries to fetch data from salesforce.
- Developed and executed **Unit tests** to achieve 95% code coverage and meet Salesforce deployment requirements.
- Designed and developed **custom Lightning Web Components** to provide a seamless user experience.
- Integrated **LWC** with **Apex controllers** to process server-side logic and fetch data efficiently.
- Enhanced user experience with responsive designs using **SLDS**(Salesforce Lightning Design System).
- Handled a variety of **administrative** tasks in Salesforce, including user management, data entry, system configuration, and workflow automation to ensure efficient operation and optimal performance of the platform

Project 2:

Project Title : Billing Management System
Duration : January 2021 – December 2022
Role : Salesforce Administrator
Employer : Modern Solutia LLC

Responsibilities:

- Assisted in **configuring and managing Salesforce Sales and Service Cloud**.
- Developed **validation rules** to enforce required fields, prevent duplicate records, and restrict invalid data entry.
- Administered **profiles, roles, sharing settings**, and ensured data security.
- Created **email-to-cases, automated-response, assignment rules**, email alerts and templates for Lead and Case Management.
- Configured **Profile-based IP address restrictions**, Organization-wide IP Address restrictions and Profile-based login hour restrictions.
- Customized Salesforce to fit Client's Requirements by creating **custom objects, fields, and page layouts**.
- Successfully imported, updated, and deleted **large datasets** using **Salesforce Data Loader** to streamline data management.
- Designed and optimized **Reports and Dashboards** to provide real-time insights and enhance data-driven decision-making.
- Automated repetitive tasks using **Salesforce Flows, Approval Processes**, and Workflow Rules, improving productivity and reducing manual effort.
- Supported **end-user training** and documented best practices.

Project 3:

Project Title : Inventory Management
Duration : March 2013 - February 2015
Role : QA Automation Engineer
Employer : Crescent TechnoSoft

Responsibilities:

- Design, develop, and maintain automated test scripts using tools like Selenium, TestNG.
- Understanding and Analyzing Test Requirements
- Contribution to Test Plan Documentation

- Deriving Test Scenarios, Documenting Test Cases and Collecting Test Data for Functional Testing.
- Creating Test Batches, Executing Test Cases and Reporting Defects.
- Tracking Defects, Selecting Test Cases for Re-Test & Regression Testing.
- Sanity Testing, Re-Test & Regression Testing on modified Software Builds.
- Collecting Test Metrics and Documentation.
- Updating Test Cases and Test Data.
- Tracking Changes, Preparing Reports and Updating Documents.
- Team Communication and Customer Communication.

Project 4:

Project Title : Pharmacy Management System
 Duration : January 2011 - February 2013
 Role : QA Manual Engineer
 Employer : Crescent TechnoSoft

Responsibilities:

- Reviewing and analyzing software requirements, functional specifications, and user stories.
- Developing detailed test plans, test cases, and test scenarios based on project requirements.
- Identifying test data requirements and ensuring test environments are properly set up.
- Executing functional, regression, system, and user acceptance tests manually.
- Work closely with developers, product owners, and business analysts to clarify requirements.
- Assisting in **User Acceptance Testing (UAT)** by guiding end-users in validating business requirements.
- Perform **sanity and smoke testing** in production environments to ensure a smooth release.
- Providing detailed test execution reports, highlighting defects, risks, and test coverage.

ACADEMIC PROFILE:

- Bachelors in engineering (Computer Science) **from Kongu Engineering College, India**
 Secured **79%** in aggregate – First Class with Distinction
