WORK EXPERIENCE

AssistNow Inc.

Workday Technical Consultant

Aug 2018 - Present

- Spearheaded complex Workday integrations using **EIB and Core Connectors** to facilitate seamless data exchange across payroll, finance, and HR systems.
- Designed and implemented integrations **such as API-based, PECL + DT, CCW + DT, EIB, and Advanced Reporting**.
- Gathered and analyzed integration requirements from legacy systems, ensuring seamless data transfer and transformation.
- Drove design discussions for integration systems and hyper-care phase defect resolution with clients and vendors.
- Utilized Document Transformation (DT) to convert XML outputs and structure data for compatibility with external systems, **reducing data processing errors by 30%**.
- Configured domain security policies and security groups to enforce robust role-based access controls, ensuring data privacy within Workday HCM.
- Performed Workday upgrade testing in preview tenants for critical payroll integrations.
- Built custom reports, analytical dashboards, and EIB integrations while ensuring security compliance.
- Led tenant setup and configuration validation during Workday updates, ensuring stability and functionality of all integrations.

WORKDAY PROJECTS

Project 1

Workday Integration Consultant

Mar 2024 – Present

- Configured security groups and access permissions to safeguard sensitive HR and payroll data, aligning with organizational compliance and privacy standards.
- Built custom reports and analytical dashboards tailored to HR and payroll departments, supporting efficient monitoring of key metrics and reporting needs.
- Led PEGI and PICOE integrations for payroll data transfers, enhancing collaboration with third-party vendors while adhering to security protocols.

Project 2

Workday Consultant

Jun 2018 – Jul 2022

- Configured finance modules for efficient tracking of accounts payable and receivable, supporting financial health and compliance.
- Built Custom Reports, HCM Core Connectors, EIB integrations in Workday.
- Led the development of advanced reporting tools for financial performance monitoring, including real-time budget and revenue tracking.
- Designed role-specific access controls to safeguard financial records and ensure compliance, reducing unauthorized data access by 15%.

VOLUNTEERING/ACHIEVEMENTS

ChangingThePresent – Business Analytics Intern

Mar 2024 – Apr 2024

- Transformed Excel report data into actionable Tableau visualizations, meticulously tailored to fulfill specific business needs.
- Lead digital marketing strategies, utilizing Google Analytics 4 to boost brand presence and engagement.

Clark University – Graduate Teaching Assistant

Sep 2023 – Dec 2023

- Facilitated office hours, addressing student inquiries related to course content, assignments, and academic expectations.
- Built an automated gradebook in Excel with VBA, enabling sophisticated calculations of grades and attendance percentages.
