

SUNMY JOSEPH

TECHNICAL BUSINESS ANALYST

Email: sunmyjay@gmail.com

PROFESSIONAL SUMMARY:

With over 9 years of experience as a Technical Business Analyst and 11+ years of overall professional experience, I have successfully led over 30+ projects, resulting in a 20% increase in operational efficiency and a 15% reduction in costs for multiple organizations. My expertise spans requirements gathering, technical specifications, system integrations, stakeholder management, process optimization, and system implementation, driving data-driven decisions and business growth. I specialize in bridging the gap between business needs and technical solutions, utilizing a strong analytical mindset, attention to detail, and a collaborative approach to delivering impactful technology solutions.

SKILLS:

Project Management Tools: Trello, Jira, Asana, Monday.com, Microsoft Project, Wrike, ClickUp, Basecamp, Smartsheet

Collaboration & Communication Tools: Slack, Microsoft Teams, Zoom, Google Meet, Confluence, SharePoint, Skype for Business, Webex, Miro

Business Analysis Tools: Microsoft Visio, Balsamiq, Lucidchart, Figma, Miro, Axure RP, Gliffy, Enterprise Architect

Requirements Gathering & Documentation: User Stories, Use Cases, Business Process Modeling, Functional Specifications, GAP Analysis, BRD (Business Requirements Document), FRD (Functional Requirements Document), Stakeholder Interviews

Data Analysis & Visualization: SQL, Excel, Power BI, Tableau, Google Analytics, R, Python, Data Mining, Data Modeling, SAS, SPSS, Domo, Alteryx

Development & Programming: HTML/CSS, JavaScript, Python, SQL, API Integration, XML, JSON, Node.js, React, Angular, Git, GitHub, RESTful APIs, SOAP APIs, Web Services

System Design & Integration: UML, BPMN, Systems Integration, Data Mapping, ETL, RESTful APIs, SOAP, Microservices, Cloud Technologies (AWS, Azure, GCP), DevOps, Docker, Kubernetes

EXPERIENCE:

Deloitte

Role: Technical Business Analyst

Apr 2023 – Present

- Led comprehensive requirements gathering and analysis for large-scale projects, collaborating with cross-functional teams to align business objectives with technical solutions.
- Implemented a data management system using ETL and cloud technologies (AWS, Azure), optimizing workflows and accelerating data retrieval processes.
- Analyzed complex datasets with SQL, Excel, and Tableau, delivering actionable insights that boosted client-facing team efficiency and performance.
- Created detailed Business Requirement Documents (BRDs) and System Specifications, ensuring effective communication between stakeholders and development teams.
- Spearheaded User Acceptance Testing (UAT), resolving 40+ issues before production deployment, ensuring smooth rollouts and high-quality releases.
- Led Agile methodologies, managing sprints, planning sessions, and retrospectives, achieving a 98% sprint completion rate.
- Directed the cloud migration of legacy systems to AWS and Azure, reducing operational costs by 18% and improving scalability.
- Integrated API-based solutions to improve system interoperability, reducing manual tasks by 25% and enhancing data flow.

Molina Healthcare

Role: Technical Business Analyst

Feb 2021 – Mar 2023

- Collaborated with cross-functional teams to gather, analyze, and document business requirements for key healthcare systems, improving claim processing time.
- Led the implementation of technical solutions that streamlined operational workflows, increasing departmental efficiency and reducing manual tasks.
- Designed and executed comprehensive UAT (User Acceptance Testing) strategies across departments, achieving high success rates for new system implementations.
- Translated complex business needs into clear technical specifications for IT development teams, facilitating the successful launch of major system enhancements to improve operational processes.
- Utilized SQL and data analytics tools to extract, analyze, and report on key business metrics, helping identify trends that supported data-driven decisions and improved business outcomes.
- Delivered consistent project management support by coordinating deliverables, timelines, and resources for multiple initiatives, ensuring on-time project delivery.

- Ensured compliance with healthcare regulations (HIPAA) by collaborating with legal and compliance teams to align system features with industry standards and requirements.

CVS Healthcare

Role: Technical Business Analyst

Feb 2017 - Jan 2021

- Analyzed business requirements and translated them into technical solutions for CVS Healthcare projects, improving system efficiency.
- Collaborated with business stakeholders, IT teams, and project managers to define system requirements, enhancing project delivery times.
- Utilized SQL and data analysis tools to extract and process large datasets, improving data accuracy across clinical and operational databases.
- Created detailed documentation, including functional specifications and user stories, ensuring alignment between technical teams and stakeholders.
- Streamlined manual processes by automating data entry, decreasing manual effort by 50% and increasing data accuracy by 35%.
- Provided data-driven insights through advanced tools like Tableau and Power BI, optimizing resource allocation and cutting operational costs by 10%.
- Directed user acceptance testing (UAT) for system updates, leading to a 98% success rate post-deployment for over 50 major updates.

Medfirst Consulting Healthcare Staffing

Role: Epic Credentialed Analyst

Jul 2015 - Jan 2017

- Coordinated Epic credentialing for healthcare professionals, ensuring accurate and timely completion of all onboarding documentation for clinicians.
- Managed Epic user account creation, updates, and troubleshooting, maintaining an error-free record for users across multiple healthcare facilities.
- Collaborated with project managers to ensure Epic system configurations were tailored to client needs, improving workflow efficiencies.
- Conducted Epic training sessions for end users, boosting adoption rates and reducing user-reported issues post-training.
- Supported Epic implementation and system optimization for healthcare organizations, contributing to successful go-lives with minimal system downtime.
- Coordinated Epic user access and security protocols, ensuring 100% compliance with healthcare regulations and industry standards.

Technology Times

Role: Project Manager

Dec 2013 - Jun 2015

- Managed and delivered multiple technology projects, overseeing all phases from initiation to completion, ensuring on-time delivery.
- Led a cross-functional team of developers, designers, and engineers, ensuring smooth collaboration and timely project completion.
- Implemented Agile methodologies (Scrum), improving team efficiency and reducing project cycle time.
- Coordinated with clients and stakeholders to gather project requirements, ensuring alignment between business needs and technical capabilities.
- Developed and maintained detailed project plans, including timelines, resource allocation, and risk management strategies, using Microsoft Project and JIRA.
- Oversaw project budgets, managing an average project budget of \$500K, and successfully reduced project costs by 12% through efficient resource management and process optimization.

EDUCATION:

Olabisi Onabanjo University (O.O.U)

BSC Political Science, Political Science and Government

2000 – 2005

CERTIFICATIONS:

Epic Credentialed Trainer – Best Practices LLC

Certified Medical Coder (CMC) – Medical Coding Academy

Project Management Professional (PMP) – International Organization for Project Management™ (IO4PM™)

Scrum Master Certified (SMC) – International Scrum Institute™

Business Analyst Certification – International Organization for Project Management™ (IO4PM™)

Microsoft Certified Azure DevOps Engineer (AZ-400) Microsoft

Certified: Azure AI Fundamentals

AWS certified cloud practitioner (CLF-CO2)
