SUMMARY:

Results driven **Data Analyst** with 6+ years in SQL, Python, and ETL pipelines with a strong foundation in requirement gathering, data analysis, and delivering insights through BI dashboards in cross-functional environments.

SKILLS:

Programming: SQL, Python, Spark, Scala

Databases: MySQL, MS SQL, NoSQL, PL/SQL

Data Manipulation & Visualization: Pandas, NumPy, Matplotlib, Seaborn, ggplot2, Tableau, Power BI, Looker, Advanced MS Excel

Tools & Cloud Platforms: Git, GitHub, DBT, Databricks, Snowflake, Azure, GCP.

WORK EXPERIENCE:

Data Analyst, Truist (Financial Analytics / Risk & Fraud Analytics)

October 2022 – Present

- Developed and optimized complex **SQL** scripts for financial portfolio analysis, reducing processing time by **30%** and improving **data integrity** across reporting systems.
- Built and maintained **Power BI** dashboards and **SSRS** reports for **financial risk and fraud analytics**, boosting senior management visibility by **40%**.
- Engineered **ETL** pipelines using **SSIS** and **SQL Server**, automating ingestion from Excel, Oracle, and Snowflake into data warehouses.
- Employed **Python (Pandas, NumPy)** for cleansing and transforming financial data, leading to **99% accuracy** in quarterly financial reporting.
- Conducted data reconciliation for loan accounts using **Excel and SQL**, improving **compliance reporting accuracy** by **25%**.
- Collaborated with compliance teams on **financial crimes and fraud detection**, contributing to **risk mitigation initiatives** across multiple portfolios.
- Integrated datasets from Snowflake and SQL Server into **Power BI**, enabling dynamic reporting and drilldowns for compliance audits.
- Created **ad-hoc reports and dashboards** to support urgent regulatory needs, accelerating decision timelines by **30%**.
- Supported projects involving **regulatory compliance and sanctions screening**, working closely with cross-functional legal and risk teams.
- Developed **Big Query POCs** to evaluate scalability of GCP tools for fraud analytics and migrated select ETL logic for testing.

Data Analyst, Lithia Motors Inc (Retail Analytics)

July 2021 – September 2022

- Developed complex SQL queries and stored procedures to support Power BI reporting, improving data accessibility by **30%**.
- Automated ELT pipelines using **Python** and **Snowflake's SnowSQL**, reducing manual intervention by **40%**.
- Enhanced report performance and accuracy by optimizing SSIS packages and aligning data models with business logic.
- Implemented **row-level security** and scheduling mechanisms in **Power BI**, ensuring **data confidentiality** and freshness.
- Delivered paginated reports using **Power BI Report Builder**, streamlining business KPIs for multi-location retail analysis.
- Explored **Big Query** vs. **Snowflake** performance for **ETL** pipelines, supporting cloud vendor evaluations and proof-of-concept testing.

Data Analyst, Ryder System Inc (Logistics & Supply Chain Analytics)

October 2020 – June 2021

- Designed and deployed interactive **Tableau dashboards** using Cross Maps and Heat Maps, enhancing logistics visibility by **35%**.
- Created SSIS packages and scheduled jobs to automate ETL for supply chain KPIs, improving refresh reliability by **25%**.
- Leveraged **Big Query** for exploratory analysis of shipment delays, contributing to cloud tool assessments for real-time analytics.
- Used **Python** to clean logistics datasets, eliminating redundant values and enabling accurate delay tracking.
- Collaborated with **Agile Scrum** teams to deliver rapid insights into operations, shortening feedback loops from weekly to daily.

Data Analyst, Envision Physician Services (Healthcare Analytics)

September 2019 - September 2020

- Developed **SSIS** jobs and **T-SQL** scripts to automate healthcare reporting, reducing manual data prep time by **30%**.
- Built **Power BI** dashboards tracking patient billing and claims KPIs, enhancing audit readiness.
- Built and orchestrated **ETL pipelines in Azure Data Factory**, extracting data from OLTP systems and loading to Azure Data Lake and Power BI, improving refresh reliability by **25%**.
- Used **Python and SQL** for ETL processes integrating billing data from **Excel, legacy systems, and SQL Server**.

SQL SSIS Developer, Pinnacle Technologies (India)

July 2018 - June 2019

- Created **Tableau dashboards** with custom drilldowns and complex visualizations for multi-source data insights.
- Designed **SSIS** packages to automate reporting workflows, cutting turnaround time by **20%**.

EDUCATION:

Master of Science in Computer Science | University of North Texas

August 2019 - May 2021

Bachelor of Technology in Computer Science | CVR College of Engineering

August 2015 - May 2019
