

SACHIN PATIL

520-243-3504 · sachinpatil0819@gmail.com · <https://www.linkedin.com/in/sachinpatil3115> · Connecticut, USA

SKILLS

Programming & Tools: SQL, Python, R, SQL Server, MS Excel, Power BI, Tableau, DAX, Snowflake, AWS, DBT, BigQuery.

Technical Competencies: Pandas, EDA, Data visualization, Data Mining, Machine Learning, A/B Testing, Statistical Analysis, ELT/ELT, Data Modeling, Forecasting, Strategic Decision-Making, Business Optimization, KPI Development, Ad-hoc Reporting.

Cloud Computing Skills: AWS - S3, Glue, Kinesis, Firehose, Lambda, DMS, RDS, API Gateway, IAM, SQS, SNS.

EDUCATION

University of Arizona

Arizona, USA

MS in Information Science (Data Analytics & Machine-Learning) (GPA: 4.0)

Graduated: December 2024

WORK EXPERIENCE

Omdena

Remote, USA

Senior Data analyst

Jan 2024 - Current

- Designing and implementing scalable ELT data transformation pipelines using Python and SQL, ensuring high-quality datasets for forecasting and analytics, reducing data ingestion time and **enabling near-real-time insights** to improve predictive model accuracy.
- Led a team of 8 to integrate ESG risk data into geospatial platforms, by processing 150M+ records across 8 risk factors using ELT workflows. Conducted data wrangling and EDA to extract key features, enabling accurate risk factors projections for future decades.
- Managed a team of 5 to develop and execute a **data strategy and predictive modeling framework** addressing severe weather impacts, achieved disaster response accuracy of 89% through time-series forecasting models.
- **Managing end-to-end analytics processes**, collaborating with cross-functional teams to drive data-driven initiatives for project success.

LG Electronics Ltd.

Pune, India

Senior Data Analyst

July 2017 - December 2023

- Implemented **data-driven business strategies** through effective data interpretation and statistical analysis, achieved annual savings of over \$1M by reducing operational costs and enhancing resource utilization.
- Effectively **reduced product return rates by 30%** by identifying root causes through detailed data analysis and machine learning techniques, improving customer satisfaction and retention.
- Developed and implemented **sophisticated customer segmentation strategies** using SQL & Excel, markedly accelerating stock clearance rates and enhancing sales efficiency for 150+ SKU's.
- Conducted in-depth inventory analysis, utilizing advanced Excel techniques (Power Query, Power Pivot, X/V Lookup, Index), which resulted in a notable **12% revenue growth** by optimizing stock levels and minimizing overstock.
- Analyzed customer behavior using predictive models and analytics tools, **driving a 20% increase in ROI** through campaign optimization and trend identification that influenced marketing and product strategies effectively.
- Integrated Snowflake with AWS S3 **using event-driven Snowpipe for faster data processing**. Built robust **DBT pipelines** with macros and snapshots for historical tracking, transformations, and near real-time data accuracy **using SCD architectures**.
- Designed and developed a **unified Power BI dashboard**, applied data visualization and dashboard design principles to streamline business reporting, replaced multiple legacy reports and built ETL pipelines that saved over 100 man-hours per month.
- Streamlined **and optimized SQL query operations**, successfully reduced processing times by over 60%, enhancing overall database efficiency and response times for business-critical operations.
- Utilized SQL, advanced Excel, and Python (Pandas) to process and **transform large volumes of complex data** for data processing and analysis, successfully deploying quality projects, focusing on efficiency and accuracy in data handling.
- Architected scalable **batch and real-time data processing** pipelines using AWS Kinesis, Firehose, Lambda, Glue, and Snowpipe, enabling real-time data transfer and processing for critical business operations, ensuring efficiency and data-driven decision-making.
- Optimized ETL workflows and designed **scalable data models** in data warehouses, ensuring data quality for accurate insights.
- Implemented AWS-based data ingestion pipelines that integrated data from multi-account, **cross-region S3 sources**.
- Implemented event-driven triggers and robust authentication and authorization mechanisms (AWS IAM) to ensure timely, accurate, and secure data availability, significantly **enhancing downstream analytics efficiency**.

PROJECTS EXPERIENCE

Business Performance Analysis Platform (Power BI | Data Modeling | Excel | SQL | Dax Studio | ETL)

- Developed and optimized BI dashboards to deliver actionable insights across Marketing, Finance, Sales and Supply Chain, streamlined data workflows to reduce data-related costs by 20% and enabling strategic business decisions.

Sales Forecasting and Inventory Optimization (ETL | Snowflake | Time Series Forecasting | Python | Demand Planning)

- Implemented ETL pipelines to unify sales data in a Snowflake, built time series models (ARIMA, Prophet) in Python for accurate monthly sales forecasts. Reduced stockouts by 30% and excess inventory by 25% through inventory optimization.

Strategic Pricing Optimization and Market Impact Analysis (Python | A/B Testing | Statistic | Market Analysis)

- Analyzed pricing strategies for 30,000+ users of LG's premium OLED TVs via A/B testing in Python, driving a 12% revenue per user increase (\$ 0.5M quarterly boost). Enhancing profitability, optimizing ad spending, and expanding market share.
