PROFESSIONAL SUMMARY

Detail-oriented and skilled Data Analyst with experience in developing, implementing, and managing ETL processes for data integration and transformation. Proficient in QlikSense, SQL, ETL tools, Excel, VBA and relational databases, with a strong ability to troubleshoot data processing issues and ensure data quality. Adept at collaborating with cross-functional teams, optimizing workflows, and supporting cloud-based data integration projects. Familiar with data warehousing, big data technologies, and scripting languages. Looking to contribute my skills in a dynamic and remote environment.

Technical Skills

- **Databases:** MS SQL Server (2019/2017/2016/2014/2012), Oracle, Sybase Server, Azure SQL Database
- **Data Warehousing:** Star and Snowflake Modeling, ETL (Extract, Transform, Load) Processes, Data Mapping
- **Programming Languages:** T - SQL, Python, R, ASP.NET, DAX (Data Analysis Expression), MDX (Multidimensional Expression)
- **BI Tools:** Power BI, SQL Server Integration Services (SSIS), SQL Server Reporting Services (SSRS), SQL Server Analysis Services (SSAS), Tableau, QlikView, QlikSense
- **Data Analytics:** Advanced Excel (Pivot Tables, Charts, Macros, VLOOKUP), Data Cleaning, Data Migration, Statistical Analysis
- **Cloud Services:** Microsoft Azure, Azure SQL Database, Azure Data Factory, Azure Storage, Azure Data Lake, AWS
- **Tools & Packages:** SQL Server Management Studio (SSMS), Azure Portal, SQL Server Enterprise Manager, Visual Studio.NET, SQL Server Data Factory (ADF), Business Intelligence Development Studio (BIDS), TOAD, ERWIN, RStudio
- **Operating System:** Windows 10/8.1/8/7, Windows Server 2012/2008/2003, UNIX
- **Web Technologies:** HTML, Java Script, XML, Xpath
- **Project Management:** Agile, Waterfall, SDLC, JIRA

PROFESSIONAL EXPERIENCE FISEC Global INC

FISEC Global INC | *Data Analyst*

Dec 2023 - Present

- Collaborated with cross-functional teams to translate business requirements into actionable data insights, delivering visual dashboards that facilitated decision-making.
- Performed data validation and troubleshooting in QlikSense to ensure the accuracy and reliability of all reports and analyses.
- Developed reporting dashboards in QlikSense, conducting data mining to analyze customer purchase behavior and provide insights for marketing strategies.
- Created Python scripts for data preprocessing, including missing value imputation, label encoding, and feature engineering to enhance predictive model performance.
- Designed custom Excel-based forecasting tools using VBA, providing critical insights that supported strategic planning and improved decision-making.
- Optimized SQL queries to extract and manipulate data, improving data retrieval speed by 30% and ensuring efficient reporting.
- Leveraged Java libraries and frameworks to process real-time and batch data, significantly improving processing speed and reducing data latency.
- Integrated data from SQL databases, Excel, and APIs into QlikSense to ensure seamless and up-to-date reporting across various data sources.
- Built optimized QlikSense data models by following best practices, reducing redundancy and improving query performance.
- Automated ETL processes to extract, transform, and load data, cutting report generation time by 30% and minimizing manual errors.
- Worked with cross-functional teams to integrate Java-based data engineering solutions with data lakes, databases, and warehouses, ensuring smooth data flow.
- Developed AWS-based data storage solutions, ensuring security, scalability, and availability across S3, RDS, and Redshift platforms.
- Implemented big data processing solutions using AWS EMR, Apache Spark, and Hadoop, optimizing processing time and enhancing data scalability by 30%.

Aurionpro | *BI Administrator/Engineer*

Feb 2019 - Jun 2022

- Developed custom QlikSense extensions using JavaScript and APIs to deliver tailored solutions for business needs. Managed complex data models in Excel and VBA, improving cross-functional team efficiency.
- Conducted data analysis to identify key trends and insights that contributed to strategic decision-making across departments. Designed interactive dashboards in QlikSense to make complex data accessible to non-technical stakeholders.
- Automated tasks with VBA macros, reducing manual effort by 40%, which resulted in significant time savings. Enhanced dashboard performance by optimizing QlikSense scripts and managing large datasets effectively.
- Utilized advanced Excel functions to ensure accurate reporting and minimize manual data manipulation.
- Supported data quality initiatives by cleansing and validating data, ensuring reliability for analysis. Presented insights through data storytelling, simplifying complex concepts for key stakeholders.
- Streamlined reporting processes by developing custom Excel templates and dynamic QlikSense dashboards. Built real-time dashboards to monitor key metrics and A/B test results, improving performance analysis.
- Collaborated with marketing to analyze campaign data, utilizing segmentation and cohort analysis to enhance strategies. Queried MySQL databases and used Python for data validation, detecting inconsistencies.
- Designed A/B tests to validate new UI features, calculating sample sizes and testing assumptions. Performed statistical analysis using R to uncover insights for increasing click-through rates and sales.
- Executed Exploratory Data Analysis (EDA) with QlikSense and Python, identifying trends for actionable insights. Developed scripts to store data in Hadoop HDFS, improving data integration from AWS S3 and MongoDB.

- Implemented machine learning models like Decision Trees and Logistic Regression to predict revenue, aiding marketing in strategy development. Communicated findings using PowerPoint, QlikSense, and Jupyter Notebooks.
- Defined ETL mapping specifications, enhancing data accessibility by designing processes to load data into Data Warehouses. Integrated legacy system data into new data marts, improving reporting capabilities.
- Developed PL/SQL procedures to ensure data integrity and optimize processing efficiency. Led the implementation of ETL best practices, boosting team productivity by 50% and consistently meeting deadlines.

ADDITIONAL PROJECT Western Illinois University Macomb, USA

Western Illinois University | Loan Approval Analysis

- Analyzed 15,000+ loan approval records with advanced data science techniques in R, uncovering trends and insights that enhanced predictive accuracy by 18% and reduced loan processing time by 25%.
- Achieved a 15% improvement in model accuracy by normalizing data for neural network, linear regression, and logistic regression.
- Implemented predictive models including neural networks, logistic regression, and linear regression, resulting in a 20% increase in accuracy for forecasting loan approval probabilities.
- Enhanced stakeholder understanding of trends by 30% through informative data visualizations using R packages like ggplot2.

EDUCATION & CERTIFICATIONS University of Western Illinois, USA

University of Western Illinois, USA

Masters, applied Statistics & Decision Analytics

Sreenidhi Institute of Science and Tech, India

Bachelor of Technology, Electronics and Computer Engineering
