PROFESSIONAL SUMMARY

- Having strong experience in **Software Development Life Cycle (SDLC)** from collecting **Business requirements, Analysis, Design, Development, Testing, documenting** features, and maintenance.
- Hands-on experience working with design patterns such as **Model-View-controller (MVC), Singleton design pattern** web services such as **RESTful**.
- Proficient in developing dynamic and interactive **web applications** using **ASP.NET Web Forms** framework.
- Skilled in data binding techniques with **Web Forms**, including **connecting to various data sources** such as databases, XML, and web services, and manipulating data to render dynamic content on web pages.
- Ample expertise as a Full-stack web developer, proficient in utilizing a wide array of web development technologies such as **HTML5, CSS3, Material UI, JavaScript, Node, React, Angular, Redux, REST API and MongoDB**.
- Proficient in working with libraries **Styled-Component in CSS, Material UI and bootstrap**.
- Expertise in developing a front-end library using **Storybook** for the **reusability** of components across applications.
- Solid Experience in understanding **Virtual DOM** and **Real DOM** structure in UI rendering. Solid Experience in writing **unit tests and integration testing** using **Enzyme(react), Jest, Mocha, Jasmine, Mockoon Playwright, Cucumber, Cypress**.
- Experience working with **React hooks and Redux** for state-management of components in React-based applications.
- Strong experience in writing unit tests using **React Testing Library, Jest, Enzyme**.
- Strong skill set in Core Development using **Web API, C#, Windows Services, ASP.Net, Web Services, ADO.Net, VB.Net, VB6, .Net framework (4.5, 4.7.1, 4.8 versions), .Net Core 5/6/7/8, Ajax, SQL Server**.
- Object Oriented Programming in Software Development Life Cycle using Microsoft **.Net Framework, .Net Core 5/6/7/8, ASP.NET, C#, VB.NET, ADO.NET**.
- Leveraged **Vite** for building and deploying modern web applications with frameworks like **React**.
- Proficient in **C# programming language** and its ecosystem, including **.NET Framework, .NET Core, and .NET5/6/7**.
- Solid experience in Developing **back end** using **.Net, .Net Core** and implemented its features like **functional interfaces, default methods, SOLID principles, Entity Framework, LINQ**.
- Developed APIs and microservices to integrate AI models with applications using **FastAPI, Flask, or Django**.
- Leveraged dependency injection in **Blazor** and **ASP.NET Core** to create modular, testable, and maintainable codebases.
- Solid experience in designing and implementing **RESTful API's** with **ASP.NET web API** and **ASP.NET Core Web API**.
- Optimized application performance by utilizing **asynchronous programming** and reducing resource overhead in **WPF** applications. Adept with **NUnit** in writing test cases to increase code coverage, debugging, troubleshooting to identify issues and resolve to improve system performance and quality.
- Grounded in **RDBMS** concepts and in working with **Oracle, PostgreSQL, and MY SQL, SQL, Database**, and has experience with **NoSQL databases** like **MongoDB**.
- Skilled at crafting database elements like tables, **stored procedures, Views, indexes, triggers, user defined functions** in **PL/SQL** and within **SQL** database.
- Implemented **Splunk** Enterprise Security (ES) to monitor, analyze, and respond to security incidents effectively.
- Deploying and operating AWS specifically **IAM, S3, terraform** and **cloud watch** using **AWS console** and AWS command line interface.
- Proficient in utilizing Amazon Web Services (AWS) with focus on services like **Lambda, S3, EC2, CloudWatch, CloudFront, and Elastic Cache**.
- Experience in **Docker** and **Kubernetes** to manipulate the container images and scale the microservices as needed.
- Extensive experience in **debugging** applications using **React DevTools, Kibana, and CloudWatch** logs.
- Collaborated with cross-functional teams to deliver AI-driven solutions that align with business objectives and timelines.
- Participated in **code reviews, Stake Holders meeting, SRUM OF SCRUM'S** for discussing **production issues**.

TECHNICAL SKILLS

Programming Languages: C#, VB.Net, VB6, Java, JavaScript, TypeScript, Python, C, C++.

.Net Technologies: .Net Core, .Net 5/6/7/8 ASP.NET core, Entity Framework (ORM), LINQ, MVC framework, ADO.NET, LINQ to SQL, NUnit.

Front-end: HTML, CSS, React, React Hooks, Context API, Redux, Styled-Components, Angular (versions 2 to 12), Redux, NgRx, Rxjs, Protractor, Jest, React Testing Library.

Databases: SQL Server, PostgreSQL, MySQL, Oracle, MongoDB, Snowflake.

Other: Data Structures, OOPS, ETL, REST API, Bitbucket, GIT, Kanban, Jira, SDLC, MVC, Micro Services, Linux, Jenkins, Eclipse, Microsoft Visual Studio, IntelliJ, XML, JSON, Kibana, IIS, SSRS.

PROFESSIONAL EXPERIENCE

MetaMetrics Inc, Durham, NC.

May 2024 – Present

Software Engineer III

- Designing and developing single page applications using **React.Js** and **Redux** ensuring cross-browser compatibility.
- Implemented providers with the **React Context API** to manage global state and shared resources efficiently.
- Utilized **React.js** concepts such as **components, props, state management**, and **hooks** to develop modular UI components.
- Worked with **useMemo** for eliminating recalculations of unchanged states by caching provider values.
- Contributed to performance improvement by 30% by automatically eliminating duplicate API calls using **useQuery**.
- Designed and developed **responsive user interfaces** for web applications, ensuring a seamless experience across desktops, tablets, and mobile devices and worked with UI/UX designer on creating design mockups using **Figma**.
- Regularly updated and audited **npm** packages to ensure compatibility, security, and optimal performance.
- Developed and maintained custom **npm scripts** for automating tasks such as **linting, testing**, and **deployment**.
- Integrated **Context API** with **React hooks**(useContext, useReducer) to build modular and reusable components.
- Designed and implemented **component-level styling** using **Styled Components**, ensuring modularity and reusability across React applications. Customized **ESLint** rules to align with team-specific best practices and project requirements.
- Developed **n-tier** applications in **Agile/scrum** methodology using **C#, .Net core, ASP.Net, MVC 4.5.2**.
- Extensively used **LINQ** and **ORM** tools like **Entity Framework** to exchange data between web applications and database objects. By using Entity Framework **Code First Migrations**, was able to accomplish the task in a relatively easy way.
- Implemented Dependency Injection, Entity Framework 6, Token based authorizations and Resource based authorizations.
- Designed and implemented **Azure-based solutions** using services such as **App Services, Azure Functions, Azure SQL Database, Azure Blob Storage, and Azure Kubernetes Service (AKS)**.
- **Deployed and managed scalable EC2 instances** to support production environments, ensuring optimal performance, cost-efficiency, and high availability. Involved in Design of database, create complex queries and tables and writing stored procedures using **SQL** and **TSQL**.
- Actively participated in **Agile ceremonies** such as daily stand-ups, sprint planning, retrospectives, and backlog grooming to ensure project alignment with team goals and timelines.
- Tech Stack: React, React Redux, JavaScript, TypeScript, HTML, CSS, C#, .Net 5/6/7/8, XAML, LINQ, TFS, WCF, AWS, Jenkins, Agile.

Insurity LLC, Morrisville, NC.

May 2023 – Jun 2024

Senior Developer

- Worked on integrating **RESTful APIs** with **React** applications using libraries like Axios or Fetch API to fetch and manipulate data from server-side resources asynchronously.
- Enhanced user experience with React lifecycle methods leveraged **React Hooks** for refactoring and reducing code by 30%.
- Worked with **useNavigate** and **useLocation** hooks to navigate between routes and access routing information.
- Custom templates include couple of static **HTML** pages for mobile and desktop knockout views as items templates that will serve as client-side view in **MVVM** pattern.
- Developed and maintained **ASP.NET MVC** applications using Telerik's Telerik UI for MVC, ensuring high-quality, responsive user interfaces and efficient data management.
- Utilized **LINQ** and **ORM** tools like Entity Framework to exchange data between web applications and database objects. By using Entity Framework Code First Migrations I could accomplish this task in a relatively easy way.
- Leveraged **Ember Data** and **JSON API** to efficiently manage application state and server interactions, improving API response times.
- Optimized **Ember.js** applications by implementing **lazy loading, tree shaking, and code splitting**, reducing bundle size by **40%**. Created event driven Web Forms using **ASP.NET** and implemented form validation using Validation controls and Custom validations and jQuery was written for Client-side validations.
- Effectively used **ASP.NET** security infrastructure for **authenticating** and **authorizing** user access as well as performing other security related tasks using **C#.NET**. Worked on **Swagger UI** for testing the restful services.
- Created Cache Memory on Windows Azure to improve the performance of data transfer between **SQL Azure** and **WCF** services.
- Developed RESTful APIs and integrated seamlessly into **Blazor** applications, ensuring smooth data flow between client and server.
- Configured **Vite** for seamless integration with environment variables to manage different build environments effectively.
- Implemented Test Driven Development (TDD) using **NUnit** Framework for unit testing and ability to load, explore and execute tests.
- Designed and developed dynamic, visually rich **desktop** applications using **WPF** and **MVVM** architectural pattern for maintainable and scalable solutions.
- Optimized Box API queries to handle large datasets, reducing search time and minimizing API call errors due to rate limiting
- Conducted a thorough assessment of existing infrastructure and developed a detailed **migration roadmap**, reducing downtime and ensuring seamless **transition to Azure**.
- Actively exploring the potential of **generative AI** to drive innovation in text, image, and data synthesis.
- Efficiently collaborated with the **Release Management** Team in doing **builds** and **deploying code** into various environments like **DEV/QA/UAT/Prod**.
- Tech Stack: **.Net, VB.NET, VB 6.0, ASP.NET, .NET Core, C#, ADO.NET, React, HTML, CSS, JS, SQL, Share Point, TFS, Jenkins**.

Sr Full Stack Engineer

- Implemented a responsive and user-friendly frontend using **React** and **TypeScript**, and designing reactive components based on user roles.
- Reduced code complexity by integrating context providers into a centralized provider wrapper for streamlined app configuration.
- Worked on React hooks like **useState**, **useEffect**, **useContext**, and **useNavigate** and user created hooks.
- Developed reusable, modular **Svelte** components with **TypeScript** interfaces for improved code organization and reusability.
- Worked on **UI/UX** designing for Admin dashboards and documents edit components in web application using **Figma**.
- Effectively used **ASP.NET** security infrastructure for authenticating and authorizing user access as well as performing other security related tasks using **C#**.
- Successfully integrated **Telerik UI** controls into ASP.NET applications, enhancing user interfaces with advanced, customizable grid, charting, and data visualization components.
- Developing user interface for users with **Telerik UI**, **MVC**, **entity framework** and performing operations on user data with **LINQ** and **PostgreSQL**.
- Experience writing testing frameworks like **xUnit**, **MSTest**, or **NUnit** for unit testing and **Moq** for mocking dependencies.
- Implemented **structured data (schema markup)** to enhance search visibility with rich snippets and featured results.
- Managing file uploads in **AWS** and configuring these files to application UI with **AWS Lambda functions**.
- Implemented secure APIs with **JWT** authentication and used **Blazor** for interactive front-end development with .NET.
- Solid Experience in using version control management tools such as **GIT**, **Bitbucket**, and **GitLab**.
- Conducted code reviews and managed pull requests in Bitbucket, ensuring adherence to code quality standards and project guidelines.
- Tech Stack – **React**, **Angular**, **TypeScript**, **.Net core**, **VB.NET**, **C#**, **HTML**, **CSS**, **JavaScript**, **PostgreSQL**, **SQL**, **GIT**, **Azure DevOps**, **Octopus**, **TFS**.

GlobalLogic, Noida, India.

July 2019 – Dec 2021

Senior Software Engineer

- Integrated legacy system with **.NET Core** application, utilizing **WCF** and **RESTful APIs**. Migrated critical functionalities, resulting in 45% less maintenance effort and improved system performance.
- Applied **useSearchParams** for filtering books by categories, authors, dates, allowing users to generate dynamic, URL-based content views. Worked on code refactoring for healthcare application from CSS to SASS.
- Created prototypes with component-based rendering using webpack bundler and babel transpiler.
- Designed and implemented responsive desktop applications using WPF and MVVM architecture to ensure maintainability.
- Building UI, ASP's, backend components for insurance policy life cycle using **.Net**, **ASP.Net**, **JavaScript**, **HTML** and **SQL**.
- Integrated dependency injection frameworks like Unity to decouple components and improve testability in **WPF** applications.
- Developed **multi-threaded applications** for Embedded Linux using **POSIX APIs**.
- Optimized **low-power embedded systems**, reducing power consumption by 40%.
- Working with **SQL** and **SSRS** tools for reporting the data related to the policy rates. Unit testing individual components for verifying functionality. Utilized code-splitting and lazy loading techniques in **Svelte** projects to enhance page performance.
- Implemented **RESTful APIs** using **ASP.NET Web API**, enabling seamless integration between multiple systems and improving data exchange **efficiency by 25%**.
- Implemented scalable microservices architecture using **.NET Core** and **Docker**, enabling service discovery and load balancing with **Kubernetes** which improved application availability and reduced downtime by 70%.
- Integrated **SCORM** and xAPI standards for seamless **LMS** deployment and tracking of learner progress.
- Tech Stack - **.Net**, **ASP.NET**, **C#**, **ADO.NET**, **VB.NET**, **SQL**, **HTML**, **CSS**, **React**, **Typescript**, **JavaScript**, **Svelte framework**, **ETL**, **Bootstrap**.

Atos, India.

May 2018 – Jun 2019

Software Engineer

- Part of web development team and worked on creating reusable components using **ReactJS**.
- Utilized the **props-based styling** approach to dynamically style components based on their state, such as hover effects, active states, and conditional rendering.
- Worked in a team for developing admin tracker for employee timesheets using **React** and **SQL as POC**.
- For POC, worked on designing scripts for Database storage, and worked on UI components.
- Worked on developing login module for Internal application. Designed the UI for the module using **React**, creating DB scripts for Authentication.
- Utilized **JavaScript (ES6+)** and **Typescript** for UI Components in React and Angular for seamless user interface for clients.
- Collaborated with a team of experienced developers to develop and maintain web applications using **C#**, **ASP.NET**, **SQL Server**, and **MVC**.
- Tech Stack – **TypeScript**, **React**, **C#**, **ASP.NET**, **REST API**, **SQL**, and **AWS**.

Education

Masters in Computer Science – University of Central Missouri

GPA – 3.8

Bachelors in Computer Science – JNTUK

GPA – 3.4
