

Sai Manoj Vishal Budartha

Java Full Stack Developer

Location: Pennsylvania, USA | Mail: manojvishal25@gmail.com | Ph: 412-370-3569 | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Java Full Stack Developer with 5+ years of experience in designing, developing, and deploying robust and scalable enterprise applications.
- Proven expertise in developing and implementing microservices architectures, RESTful APIs and user-friendly front-ends using Java, Spring Boot, Spring Cloud, Angular, React and AWS.
- Strong understanding of object-oriented programming principles, design patterns and agile methodologies.
- Experienced in all phases of the software development lifecycle from requirements gathering and analysis to design, development, testing and deployment.
- Passionate about delivering high-quality, user-centric solutions that meet business objectives and exceed expectations.

TECHNICAL SKILLS

Programming Languages:	Java, JavaScript, TypeScript, HTML5, CSS3
Frameworks:	Spring Boot, Spring Cloud, Angular (16, AngularJS), React.js, Hibernate, JPA
Frontend Technologies:	Angular, React.js, Redux, Bootstrap, CSS3
Backend Technologies:	Spring Boot, Spring Security, RESTful APIs, GraphQL
Database Technologies:	MySQL, Redis, RDS, DynamoDB, Liquibase
Cloud Platforms:	AWS (S3, Lambda, RDS, EC2, DynamoDB, API Gateway)
CI/CD Tools:	Jenkins, GitHub Actions
Containerization Tools:	Docker
Infrastructure as Code (IaC):	Terraform, Ansible
Testing Frameworks:	JUnit, Mockito, TestNG
Monitoring and Logging:	ELK Stack (Elasticsearch, Logstash, Kibana), Log4j, VisualVM, SLF4J
Development Methodologies:	Agile Scrum
Version Control Systems:	Git, GitHub
Build Tools:	Maven
Visualization Tools:	JProfiler, Log4j
Payment Gateway Integration:	Razorpay, PayU
Design Patterns:	Singleton, Factory, Observer
API Testing Tools:	Postman, SOAP UI
Other Tools:	JIRA, Eclipse, IntelliJ IDEA, JProfiler
Operating Systems:	Windows, Linux, Mac iOS

PROFESSIONAL EXPERIENCE

Morgan Stanley – PA

Aug 2023 – Present

Full Stack Developer

- Optimized database queries and implemented Redis caching, resulting in a 35% improvement in application performance for high-volume banking transactions.
- Reduced build and deployment cycles by 40% through the integration of Jenkins CI/CD pipelines with Docker, ensuring seamless delivery of banking applications.
- Enhanced API response times by 25% by redesigning RESTful APIs and integrating GraphQL for more efficient data fetching in banking dashboards.
- Increased team productivity by 30% through the automation of testing and deployment workflows using GitHub Actions, eliminating repetitive manual tasks.
- Architected and deployed microservices using Spring Boot and Spring Cloud, ensuring scalability for managing millions of customer records.
- Developed dynamic and responsive user interfaces using Angular 16 and React.js with Redux, improving user satisfaction in online banking portals.
- Ensured application security by implementing Spring Security and JWT, protecting sensitive financial data from unauthorized access.
- Integrated AWS services such as S3, Lambda, RDS, DynamoDB and API Gateway to enhance the scalability and reliability of cloud-hosted banking applications.

- Utilized Hibernate and JPA for efficient ORM and streamlined database interactions in financial transaction systems.
- Automated infrastructure provisioning and configuration using Terraform and Ansible, reducing setup time by 50%.
- Monitored application logs and performance metrics using the ELK Stack, enabling proactive resolution of issues and minimizing downtime.
- Performed comprehensive load testing and performance profiling using JProfiler and VisualVM, ensuring scalability under high user load.

Bitinfocom Technologies – India

Jul 2020 – Jul 2022

Full Stack Developer

- Spearheaded the development of a microservices-based architecture, achieving a 40% improvement in application scalability and responsiveness to user demands.
- Successfully deployed applications on AWS, optimizing resource allocation to achieve a 25% reduction in hosting costs while maintaining service reliability.
- Developed robust RESTful APIs using Spring Boot, ensuring seamless communication between back-end services and front-end applications.
- Implemented comprehensive user authentication and authorization protocols using Spring Security, significantly bolstering application security and user data protection.
- Created dynamic and responsive user interfaces utilizing Angular, HTML5, CSS3 and Bootstrap, enhancing the overall aesthetic and functionality of the e-commerce platform.
- Leveraged Hibernate ORM for optimized database interactions, ensuring efficient data persistence and retrieval processes.
- Conducted rigorous unit testing with JUnit and Mockito, ensuring high code quality and reliability through automated testing frameworks.
- Integrated third-party payment gateways such as Razorpay and PayU, facilitating secure and efficient transaction processing for users.
- Employed Docker for application containerization, ensuring consistent development, testing, and production environments across teams.
- Managed version control using Git, collaborating effectively with team members through GitHub to streamline code reviews and feature integration.
- Monitored application performance and logs using Log4j, facilitating proactive debugging and optimization of application features.
- Worked closely with QA teams to ensure thorough testing and validation of new features, maintaining high standards of software quality.

Smart AI – India

May 2018 – Jun 2020

Java Developer

- Worked on the design and development of a high-performance banking application utilizing Spring Boot and Spring Cloud, resulting in a 40% reduction in system complexity.
- Implemented robust RESTful APIs with advanced security measures using Spring Security, enhancing application security by mitigating 35% of potential vulnerabilities.
- Designed and optimized database interactions using Hibernate and Spring Data JPA, achieving a 50% improvement in query performance.
- Created responsive and user-friendly frontend interfaces using AngularJS and Bootstrap, enhancing the overall user experience.
- Implemented and maintained CI/CD pipelines using Jenkins and Docker, resulting in a 60% reduction in deployment time. Actively collaborated with cross-functional teams using Agile Scrum methodology to deliver high-quality projects.
- Developed comprehensive unit and integration tests using JUnit and Mockito, achieving 85% test coverage.
- Implemented Log4j and SLF4J for advanced logging and monitoring capabilities, enabling proactive issue identification.
- Managed database migrations and schema updates using Liquibase, ensuring data integrity and consistency.
- Leveraged AWS services (EC2, S3, RDS) for cloud infrastructure management and deployment.
- Implemented and utilized design patterns (Singleton, Factory, Observer) to ensure robust and maintainable software architecture.

EDUCATION

Master of Data Science - Duquesne University, Pittsburgh, PA, USA.

Bachelor of Computer Science – Jawaharlal Nehru Technological University, Hyderabad, India.
