

SAIPRATHAP P

Senior DevOps Engineer

📞 +1 (913) 370-9174 ✉️ saiprathapreddy199@gmail.com 🌐 [LinkedIn](#)

OBJECTIVE

- Senior DevOps Engineer with over Six years of experience in designing, implementing, and optimizing cloud infrastructure and CI/CD workflows across automotive, finance, e-commerce, and banking sectors. Expertise in **AWS**, **Azure**, and **GCP**, coupled with strong skills in **Terraform**, **Kubernetes (AKS/EKS)**, **Docker**, **Jenkins**, and **Ansible**. Proficient in **microservices orchestration**, **infrastructure as code (IaC)**, and **monitoring solutions** like **Prometheus**, **Grafana**, and **ELK Stack**. Dedicated to implementing **DevSecOps best practices** to enhance availability, scalability, and compliance. Eager to contribute deep cloud expertise and automation capabilities to foster innovation and operational excellence in a dynamic DevOps environment.

PROFILE SUMMARY

- DevOps/Cloud Engineer with 6+ years of experience in **cloud infrastructure, automation, and CI/CD pipeline management** across **AWS**, **Azure**, and **GCP**.
- Expertise in **Infrastructure as Code (IaC)** using **Terraform**, **AWS CloudFormation**, **Pulumi**, and **ARM Templates** for automated cloud resource provisioning.
- Strong proficiency in **CI/CD automation** using **Azure DevOps**, **GitHub Actions**, **Jenkins**, **GitLab CI/CD**, and **Bamboo**, improving deployment efficiency.
- Skilled in **containerization and orchestration** with **Kubernetes (EKS, AKS, GKE)**, **Docker**, **OpenShift**, and **Docker Swarm** for microservices deployment.
- Hands-on experience in **configuration management** using **Ansible**, **Puppet**, and **Chef**, automating infrastructure provisioning and system updates.
- Expertise in **cloud security, identity management, and compliance** using **IAM**, **RBAC**, **Azure Security Center**, **AWS KMS**, and **DevSecOps tools (SonarQube, Checkmarx, Aqua Security, Snyk)**.
- Strong knowledge of **networking and security concepts**, including **VPC**, **Subnets**, **Load Balancers**, **DNS**, **CDN**, **VPNs**, and **Firewalls** for securing cloud environments.
- Experience in **monitoring, logging, and observability** with **Prometheus**, **Grafana**, **ELK Stack**, **AWS CloudWatch**, and **Datadog** for proactive issue resolution.
- Proficient in **database management** with **SQL Server**, **MySQL**, **PostgreSQL**, **DynamoDB**, **MongoDB**, **Cosmos DB**, and **Redshift**, optimizing data performance.
- Hands-on experience in **serverless computing** with **AWS Lambda**, **Azure Functions**, **Step Functions**, and **Logic Apps** for event-driven automation.
- Successfully **migrated on-premises applications to cloud platforms**, optimizing performance, scalability, and cost efficiency.
- Well-versed in **Agile and DevOps methodologies**, collaborating with cross-functional teams to enhance automation, improve deployment frequency, and reduce downtime.

Education

Northwest Missouri State University

Masters in Computer Science

Missouri, USA

Certifications

- AWS Certified: DevOps Engineer Professional
- Microsoft Certified: DevOps Engineer Expert

Technical Skills

- Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, ECS, EKS, CloudFormation), Microsoft Azure (Azure DevOps, Virtual Machines, Blob Storage, Functions, AKS), Google Cloud Platform (GCP).
- Containerization and Orchestration:** Docker, Kubernetes (EKS, AKS, GKE), OpenShift, Docker Swarm.
- Infrastructure as Code (IaC):** Terraform, AWS CloudFormation, Pulumi, ARM Templates, Azure Resource Manager (ARM).
- CI/CD Tools:** Jenkins, GitLab CI/CD, Azure DevOps Pipelines, GitHub Actions, Bamboo, AWS CodePipeline.
- Version Control Systems:** Git (GitHub, GitLab, Bitbucket), SVN, Azure Repos.
- Configuration Management:** Ansible, Puppet, Chef, SaltStack.
- Scripting and Automation:** Python, Bash, PowerShell, Groovy, YAML.
- Monitoring and Logging:** Prometheus, Grafana, ELK Stack, AWS CloudWatch, Datadog, Azure Monitor, Log Analytics.
- Networking and Security:** VPC, Subnets, Security Groups, Load Balancers, DNS, CDN, Firewalls, VPNs, IAM, KMS, Secrets Manager, ADFS, Azure AD.
- Database Management:** MySQL, PostgreSQL, SQL Server, DynamoDB, Cosmos DB, MongoDB, Redshift, BigQuery, Oracle.
- Build and Artifact Management:** Maven, Gradle, Nexus Repository, Artifactory.
- DevSecOps Tools:** SonarQube, Checkmarx, Aqua Security, Snyk, AWS Security Hub, Azure Security Center.
- Cloud Automation and Serverless:** AWS Lambda, Azure Logic Apps, Step Functions, Azure Automation Scripts.
- Workflow Orchestration:** Apache Airflow, AWS Step Functions, Azure Data Factory.

Experience

Master Card	May 2024 – Present
<i>Senior DevOps Engineer</i>	<i>New York, USA</i>
- Designed and automated the CI/CD infrastructure on Azure for a distributed payment gateway system, focusing on pipeline scalability, environment consistency, and compliance automation - Developed robust Azure DevOps pipelines for .NET applications, streamlining build, test, and deployment stages across multiple environments - Integrated DevSecOps principles into .NET delivery workflows by embedding security scans, policy checks, and gated approvals within Azure DevOps pipelines - Managed AKS-based container orchestration to deploy and scale production-ready microservices with zero-downtime release strategies - Configured Azure Monitor and Application Insights for centralized logging, telemetry, and real-time system diagnostics - Secured cloud infrastructure using Azure Security Center and Key Vault, ensuring adherence to internal standards and external compliance requirements - Built and validated disaster recovery workflows with Azure Backup and Site Recovery to support high availability and business continuity - Facilitated adoption of emerging Azure tools and DevOps practices through onboarding sessions, documentation, and proof-of-concept implementations - Partnered with developers, QA engineers, and architects to align infrastructure automation with sprint planning and agile delivery cycles.	
(TCS) Kemper	Sep 2022 – Jun 2023
<i>DevOps Engineer</i>	<i>Hyderabad, India</i>

- Handled DevOps for the **claims intake and validation modules** of Kemper's insurance platform, focusing on **CI/CD automation, infrastructure provisioning, and cloud security** for customer-facing services
- Developed and maintained **GitLab CI/CD pipelines** to automate deployment of microservices supporting claims workflow
- Deployed and operated **Kubernetes clusters** to manage scalable, multi-environment application lifecycles for policy data processing
- Automated routine operational tasks using **Bash** and **Python** scripts, including **deployment automation, service health checks, and backup validation**
- Collaborated with cross-functional teams to resolve live issues, streamline rollbacks, and minimize production downtime during peak traffic windows
- Applied industry-standard **cloud security practices**, enforcing encryption, IAM roles, and container vulnerability scanning
- Introduced **Terraform-based IaC workflows** for consistent, reusable infrastructure templates aligned with project lifecycle demands.

(Virtusa) Lloyds Banking Group

Aug 2019 – Sep 2022

DevOps/Cloud Engineer

Chennai, India

- Supported the continuous integration and delivery infrastructure for **retail banking applications**, including modules for **account provisioning, loan servicing, and digital documentation**
- Led enhancements to **Jenkins-based CI/CD pipelines**, improving deployment reliability and enabling more efficient release cycles
- Administered **Kubernetes clusters** and managed **Docker container orchestration** across development, QA, and production environments
- Automated provisioning and configuration of cloud infrastructure in **AWS** using **Terraform** and **Ansible**, increasing environment consistency and reducing manual overhead
- Set up and maintained **monitoring dashboards** with **Grafana** and **Prometheus** to support real-time performance tracking and alerting
- Streamlined collaboration by integrating **Slack notifications** with CI/CD systems to provide immediate feedback on builds and deployments
- Performed regular **security and compliance audits**, ensuring cloud environments met internal controls and external regulatory standards
- Actively contributed to **Agile development cycles**, including sprint planning, retrospectives, and cross-functional team collaboration.

Parle Products

Jun 2018 – Jun 2019

Cloud Engineer

Chennai, India

- Delivered infrastructure automation and CI/CD support for large-scale supply chain and inventory management systems, leveraging AWS services to manage EC2 deployments, automate backup strategies, and optimize application reliability across distributed warehouse nodes.
- Implemented and managed cloud solutions within **Amazon Web Services (AWS)**, optimizing operational cost and efficiency for large-scale food production systems.
- Engineered and maintained robust **cloud infrastructure**, ensuring high availability and fault tolerance for critical business applications.
- Automated various cloud operations using **AWS CloudFormation** and **AWS Lambda**, reducing the manual intervention required for deploying and managing resources.
- Developed security protocols and disaster recovery plans to ensure data integrity and compliance with industry regulations.
- Collaborated with software development teams to deploy scalable applications optimized for the cloud, improving deployment agility and system scalability.
