Education

Masters in Information Systems

Wilmington University, New Castle, DE

August 2023 - Dec 2024

GPA: 3.8/4

Bachelors of Technology in Information Technology

Bharat Institute of Engineering and Tech, Hyderabad, Telangana

September 2017 - May 2021

GPA: 3/4

Experience

Multiplier Solutions, India | Software Application Developer

October 2021 - June 2023

- Collaborated with top healthcare companies to gather data on over 70,000 doctors from various web sources, resulting in a 30% improvement in data acquisition efficiency.
- Led the development of a platform for data extraction, processing, manipulation, and organization, reducing data processing time by 40%.
- Created automation scripts to streamline repetitive tasks, increasing operational efficiency by 35%.
- Engineered Python APIs that achieved seamless data integration across five diverse systems, enhancing real-time data accessibility and reliability while reducing manual entry errors by 30% within the first quarter of deployment.
- Designed and developed analytics dashboards using Python, Highcharts.js, Power BI, and Microsoft Excel to present key insights and trends.
- Developed a chatbot using Dialog flow to provide automated responses and assistance to users.
- Created data cleaning scripts in Python to clean and organize raw data extracted from the web.
- Built multiple dashboards in Looker Studio to effectively visualize and present datasets.

Technical Skills

Languages: JavaScript, HTML5, CSS3, Bootstrap, jQuery, Python

Frameworks: React, Flask, Django, Node JS

Databases: MySQL

Tools: Git, Npm, **Others:** Data structures and Algorithms, Python, Flask, Object oriented design, Debugging, Rest APIs, AJAX, DOM, JSON, Postman

Projects

Web Scrapping Application | HTML, CSS, JavaScript, Python, Python Flask, Python Selenium, SQL

- Web scraping Application is a Python flask-based application where users have different roles and responsibilities (User based login system like admin, user). This application gets live data from Twitter, LinkedIn, YouTube, Google My Business (GMB) and other doctor-based websites. This application uses RDS SQL server of AWS to store the data and hosted in EC2 instance. **Link - https://github.com/SainathReddy3155/products_dashboard_images/**

HR Ticket Resolving Application | HTML, CSS, JavaScript, jQuery, Python Flask, SQL

- Engineered a ticket resolution platform that streamlined communication between employees and HR, resulting in an average of 300 tickets processed monthly, with a 95% notification accuracy rate for ticket status updates.

Analytics Dashboard | HTML, CSS, JavaScript, jQuery, Python Flask, Highchart Js ,SQL

- Analytics Dashboard is python-based application which is used to check the analytics of the users in different kind of charts (pie, line, bar, map etc.). Admin can perform CRUD operations and manipulate the data on a daily basis.

Dialog flow chatbot | Dialog flow, Python, API(Third Party Apis)

- Dialog flow chatbot using the service provided by the google cloud and hosted the chatbot in WhatsApp using third party API's.
