

Professional Summary

Having 9 +years of professional Software Development Experience with strong Object-Oriented Analysis, Designing and Programming skills with extensive experience including 6+ years in Salesforce.com CRM and Force.com platform with proficiency as a Developer and Administrator. 3 years of experience in Java/J2EE Technologies. Experience in Administration, Configuration, Implementation, Lightning, and support experience with Salesforce platform. Customized existing Visualforce to align with Salesforce new Lightning UI experience.

- Created multiple Lightning Components, added CSS and Design Parameters that makes the Lightning component look and feel better.
- Used Salesforce Lightning Design System (SLDS) for developing Lightning Components, Actions, Event and Server-Side Controller.
- Creating Lightning Components and used Salesforce SLDS to convert existing Visualforce pages to lightning components.
- Created Apex methods for the lightning controller and helper methods to perform DML operations on the case records.
- Used refined global search in Lightning by developing Apex classes and Controllers. Hands on experience in developing and customizing Salesforce.com applications using Apex classes, Apex Triggers, Visualforce, Page Layouts, Sharing Rules, S-Controls and migration tools.
- Strong experience in SFDC development using Apex classes, Triggers, Components, Reports, Force.com IDE, Eclipse with SOQL and Force.com plug-in.
- Proficient in salesforce administrative and development related tasks creating Users, Roles, Profiles, Visualforce pages, Validation Rules, Custom Reports, Workflows, Email Alerts, Reports and Dashboards, Page Layouts and Business Processes.
- Good experience in Salesforce.com Development by developing the presentation layer in Visualforce and business login in the Apex Programming by creating/ using the Classes, Triggers, Standard Controllers, Custom Controllers, Controller Extensions, S-Controls and Web Services API.
- Experience in implementing Security/Sharing rules, Configured permission sets, Field level Security, Record level Security and resource monitoring.
- Good understanding of Software Development Life Cycle (SDLC) and Agile with expertise in Requirement gathering, Analysis, Designing, Development and Testing.
- Used SOQL & SOSL with consideration to Governor Limits to get the customer information from different accounts.
- Experience in deployments of Apex and Visualforce pages across DEV, Test/QA and Production instances.
- Experience in integration of Salesforce.com applications with other applications with an emphasis of the Web Services/XML and other integration tools.
- In-depth knowledge of CRM processes like Sales, Marketing, Customer Service and Customer Support, Business processes, Customer Portal, Partner Portal which were used improve the business processes using Salesforce.com.

Skills

Salesforce Technologies	SalesForce.com, Force.com, Sales Cloud, Service Cloud, Experience Cloud, LWC, Lightning components, Apex Language, Apex Classes/Controllers, Apex Triggers, SOQL, SOSL, Visual Force Pages/ Component, s-Control, Rest API, Soap API ,Apex Web Services, Partner WSDL & Enterprise WSDL, Work Flow and Approvals, Dashboard, Einstein Analytics , Change Sets, GitHub, DevOps CI/CD practices.
Salesforce Tools	Force.com IDE (Eclipse), AJAX Tool Kit, Force.com API tools (Data Loader), Force.com Explorer, Force.com Platform
ETL Tools	Data Loader, Salesforce-to-Salesforce
Languages	Apex, C/C++, Java, J2EE, HTML, XML, CSS.
Database	SQL Server 2008, Oracle, MySQL.
Web	HTML, XML, CSS, JSP, JavaScript, WSDL, SOAP.
Tools	MS Office, Adobe Photoshop, MS Excel, Silverlight, Eclipse IDE,AWS
Web Servers	IBM WebSphere 4.x/5.x, Apache Web Server, Tomcat 6.x
Platforms	UNIX and Windows (NT/2000/XP/Vista/7)

Work History

Salesforce Lightning Developer/Admin

Toyota Motors North America – Plano, TX, USA

10/2023 to Present

(Worked remotely from Canada until [Nov/2024], now based in the USA.)

Duties & Responsibilities:

- Developed and implemented custom Lightning Web Components (LWCs) for intuitive event management, including detailed event display and search, attendee history tracking, and user-friendly registration forms with seamless post-save redirects, enhancing user experience and data accessibility.
- Integrated third-party applications using REST APIs, facilitating smooth data exchange between Salesforce and external systems, enhancing overall system functionality.
- Developed custom Apex REST services to expose live and upcoming event data, allowing third-party systems to retrieve and filter event information in real time.
- Developed Apex triggers to automate key processes, including preventing duplicate speaker bookings and sending attendee email confirmations.
- Created reusable utility classes for efficient error logging and consistent error handling across the application.
- Implemented batch jobs for managing and deleting old event records to ensure optimal database performance.
- Configured roles and profiles to manage access control and permissions for different user roles.
- Set up sharing rules and visibility settings to control data access for specific objects.
- Implemented field-level security to safeguard sensitive data.
- Created custom objects and configured relationships to support event management workflows.
- Set up custom fields and validation rules to ensure accurate data entry and integrity.
- Implemented validation rules to enforce business logic and prevent data entry errors.
- Developed unit tests for Apex classes and triggers, ensuring 90%+ code coverage for reliability.
- Created detailed documentation for components, covering purpose, usage, and setup for easy maintenance.

- Configured community profiles and permissions to manage user access and security.
- Customized community pages with key components to enhance user engagement and interaction.
- Improved user experience by adding branded elements for better navigation and interface.
- **Environment:** Salesforce.com, Apex, Lightning Web Components (LWC), Apex Triggers, REST API, Batch Apex, Custom Objects, Custom Fields, Validation Rules, Reports & Dashboards, Data Security & Sharing Rules, Profile & Permission Set Configuration, Security Controls, Service Cloud, Community Cloud, Data Loader, Sandbox, Salesforce Lightning, Change Sets, GitHub, DevOps CI/CD practices

Salesforce Developer/Admin

09/2022 to 02/2023

Commonwealth of Kentucky –Kentucky, USA

Duties & Responsibilities:

- Created Objects and fields, Relationships and Record Types, Page Layouts, Profiles and Assignments Rules.
- Involved in Design and development of Workflow Rules, Triggers, Validation Rules, and other customizations with Salesforce.com.
- Experienced in creating service cloud workflows like Key customer case notification and notifying relevant people in a high priority case.
- Personalized the user interface for each user or user group so customers are presented with the precise information they need using Customer portal.
- Worked extensively in customization of Service Cloud Console by embedding Visualforce pages in custom console components, highlight panel and interaction log.
- Developed Visualforce Pages, Visualforce Custom Controllers Components, Advanced Search Functionality, Custom Objects, Analytic Snapshots, Tabs, Tags and Components.
- Assist with project implementation and control monitoring process related to quality assurance (QA) and user-assisted testing (UAT).
- Used SOQL & SOSL with consideration to Governor Limits to get the customer information from different accounts.
- Experience in Salesforce.com data structures like Data Entry and usability, Reporting, Data Migration and App Integration.
- Implemented various Custom Reports and deployed them for different business user levels.
- **Environment:** Salesforce.com platform, Apex Language, Flow, Visualforce Pages, Data Loader, S-Controls, HTML, Java Script, Apex Triggers, Web Services, Reports, Custom Objects, Custom Tabs, Email Services, Security Controls, Service Cloud, Sandbox data loading, Change Sets.

Salesforce Admin/Developer

06/2021 to 09/2022

Toyota Motors – Plano, TX, USA

Duties & Responsibilities:

- Designed, developed and deployed Apex Classes, Controller Classes and Apex Triggers, packages for various functional needs in the application.
- Designed, developed and deployed Apex Classes Extension Classes to support Visualforce pages development, Test Classes for Unit testing and Apex Triggers for various functional needs in the application.
- Experienced in leveraging Sales Cloud functionality including Account Planning, Sales Forecasting, Opportunity Management and Lead Management.

- Worked extensively in customization of Service Cloud Console by embedding Visualforce pages in custom console components, highlight panel and interaction log.
- Managed the implementation of single sign on for Salesforce and simplifying the login process and significantly improving user management.
- Experience in Salesforce.com data structures like Data Entry and usability, Reporting, Data Migration and App Integration.
- Involved in Setting up or create Admin options, User Interface, organization-wide defaults, role hierarchy, workflows and workflow rules.
- Experienced in working on a Lightning Component to create a My Licenses page where the customer can directly select their particular account and generate licenses without involving Customer Support.
- Proficient in Sales cloud implementation, Service cloud modules, Salesforce lightning and Chatter.
- Knowledge on new release of lightning components and Lightning App Builder.
- Experience in Importing leads and contacts, modifying price lists, particularly if there are a lot of promotions and limited-time offers and changing delegation and escalation paths to account for absences or extended travel.
- Developed Visualforce Pages, Visualforce Custom Controllers Components, Advanced Search Functionality, Custom Objects, Analytic Snapshots, Tabs, Tags and Components.
- Assist with project implementation and control monitoring process related to quality assurance (QA) and user assisted testing (UAT).
- Implemented Marketing Sales, Customer Service, Call Center & Support Administration with Service Cloud.
- Involved in coding for modules for all the Sub-Application of the CRM application which involves extending existing SFDC standard components using Apex, VisualForce and other utilities.
- Worked on various salesforce.com standard objects like Campaigns, Leads, Accounts, Contacts, Opportunity, Forecast, Cases, Reports and Dashboards.
- Designed, and developed the Custom objects, Validation rules, Page layouts, Custom tabs, Components, Visualforce Pages that suit to the needs of the application.
- Worked with AppExchange to use managed packaged apps for improving application features.
- Increase functionality by installing AppExchange apps to enable Customer Service Surveys.
- Performed detailed analysis of business and technical requirements and developed the Apex classes using other Platform based technologies like Visualforce, Force.com IDE.
- On the basis of the organizational needs, developed and configured various Reports for different user profiles.
- Maintained data cleanliness and accuracy by adding custom validation rules, custom formulas, reports and dashboards.
- **Environment:** Salesforce.com platform, SAML 2.0, Service cloud, Quotes, Service Cloud, Sales Cloud, Role Hierarchies, Sharing Rules, Email Templates, Oracle, Reports, Dashboards, Custom Objects, Custom Tabs, Email Service, Security Controls, Change Sets, GitHub, DevOps CI/CD practices

Salesforce Admin/Developer

08/2019 to 06/2021

American Airlines – Fort Worth, Texas, USA

Duties & Responsibilities:

- Implemented SFDC CRM to deliver various reports in departments of Sales, Administration and Marketing etc.

- Created Objects and fields, Relationships and Record Types, Page Layouts, Profiles and Assignments Rules.
- Involved in Design and development of Workflow Rules, Triggers, Validation Rules, and other customizations with Salesforce.com.
- Experienced in creating service cloud workflows like Key customer case notification and notifying relevant people in a high priority case.
- Personalized the user interface for each user or user group so customers are presented with the precise information they need using Customer portal.
- Increased the visibility of costs incurred during manufacturing processes by developing a cost accounting module that integrated into the existing ERP.
- Implemented Marketing Sales, Customer Service, Call Center & Support Administration.
- Developed data migration scripts and also implementing data cleansing tools.

- Created Custom Objects and defined lookup and master-detail relationships on the objects and created junction objects to establish many-to-many relationship among objects.
- Used Metadata API within Salesforce to access workflow rules and picklist fields.
- Developed custom pages using Apex, Visualforce and controllers for customized UI of application work flow.
- Worked as a Salesforce Chatter APP with the organization and regularly participated in the meetings and chatter community.
- Developed various Visualforce pages to manage sales plan call sheets within Salesforce, capturing prep data and call activity.
- Implemented various Custom Reports and deployed them for different business user levels.
- Implemented escalation rules, automatic case generation and their escalation to call center representative, and generated email alerts for quick issue resolution.
- **Environment:** Salesforce.com platform, Apex Language, Visualforce (Pages, Component & Controllers), Pages, Data Loader, S-Controls, HTML, Java Script, Apex Triggers, Web Services, Reports, Custom Objects, Custom Tabs, Email Services, Security Controls, Service Cloud, Sandbox data loading, Eclipse IDE Plug-in.

Salesforce Administrator

09/2017 to 03/2019

Patni Computers – Hyderabad, India

Duties & Responsibilities:

- Performed various activities as part of the project like gathering information, analyzing the information, and documenting the functional and non- functional requirements.
- Then after, implemented the requirements on Salesforce.com platform and Force.com IDE Plug-in using Eclipse.
- Worked with various salesforce.com objects like Accounts, Contacts, Leads, Campaigns, Reports, and Dashboards.
- Additionally, developed various Custom Objects, Tabs, Components and Visual Force Pages.
- Created various users along with the creation of specific roles, profile and appropriate Permission sets for them.

- Created and deployed several Reports using salesforce.com platform along with the development of custom objects.
- Developed Apex Classes, Controller Classes and Apex Triggers for various functional needs in the application along with the test classes for them.
- Responsible for addition of pick list values, modification of page layouts, and also creation of email templates using VisualForce.
- Created and maintained documentation on processes, application configuration, and training material for users and provided ongoing support.
- Used sandbox for testing and then migrated the code to the deployment instance.
- **Environment:** Force.com IDE, Force.com Sandbox, Import Wizard, Apex, Controllers, Custom objects, Reports, Visual Force Pages, Apex Triggers.

Java Developer

08/2013 to 09/2016

Syntel – Pune, India

Duties & Responsibilities:

- Involved in various stages of the project life cycle primarily design, implementation, testing, deployment and enhancement of the application.
- Involved in the creation of Use Cases, Class Diagrams and Sequence Diagrams for analysis and design of application.
- Designed and developed web pages using JSP, HTML and used JavaScript for clientside validation.
- Responsible for testing of application on various levels like integration and System testing by utilizing various methodologies.
- Worked on the development of various web applications based on the client needs.
- Responsible for maintenance and production support of the application documented design and functional aspects of the application.
- Record technology solutions involving user needs documents, user manual design decisions and executive summaries across projects.
- Responsible for proactively monitoring performance, diagnosing problems and tuning queries and databases.
- Developed data model and stored procedures.
- Developed user interface screens, and administrative screens using JSP and JavaScript to perform checking and validation at Client's side.
- Developed new java code and executed new features through business requirements.
- Extensively used SQL to generate stored procedures and functions to use with Java.
- **Environment:** Java Servlets, JSP, JavaScript, XML, CSS, HTML, Apache Tomcat, JDBC, Oracle 10g, SQL.

Education

M.Tech: Computer Science	2013
Amity University	
MSC: Computer Science	2010
MDU University	
BSC: Non-Medical	2008
MDU University	

Certifications

- Salesforce.com Certified AI Specialist Certificate
- Salesforce.com Certified AI Associate Certificate
- Salesforce .com Certified JavaScript Developer I
- Salesforce.com Certified Platform Developer II
- Salesforce.com Certified Platform Developer I (401)
- Salesforce.com Certified Force.com Administrator (ADM 201)
- Salesforce Cohort Participation 2024(Data Cloud Cert Prep)
