

EDUCATION**Auburn University at Montgomery**

Master of Computer Science

- Curriculum Focus: Data Structures, **PYTHON**, **C++**, advanced Database, and Network Systems.

Montgomery, Alabama

Expected: May 2025

Osmania University

Bachelor of Science, Mathematics, Physics, and Computer Science

- Dean's Merit Scholarship, Dean's List

Hyderabad, India

September 2020

WORK EXPERIENCE**Solvd Inc****Java Test Automation Intern**

Remote, USA

August 2024-December 2024

- Learn relevant **SOFTWARE DESIGN** principles and best practices. Technologies used include **JAVA**, Spring Boot, **SQL**, Carina, and TestNG.
- Developing skills to identify and fix issues in both code and tests.
- Gaining experience with **GIT** for managing code versions and collaborating with team members.

Wipro Limited**MuleSoft Developer**

Hyderabad, India

February 2021-July 2023

- Developed API's that interact with **IBM MQ** Queues, **REDIS OBJECT**, external **SOAP**, and System API's.
- File transfers between **SFTP** and **FTP(S)**- Mainframe. Developed scripts for migrating data from **ORACLE DB** tables to **REDIS OBJECT** with 100% success rates with the help of **JSON** and **XML**
- Hands-on experience on Building interfaces on any **ESB** platform. Experience in Core Java, Messaging (**JMS**), **WEB API: SOAP, REST**, and authentication methods such as **OAuth** and **SAML**
- Involved in complete Integration Development including, **DESIGN, DEVELOP, IMPLEMENTATION, TESTING** and Maintenance with **AGILE METHODOLOGY**
- Maintaining Technical **DESIGN DOCUMENTATION** and testing the project using **POSTMAN** and deploying it in **CLOUDHUB**
- Connected with different architects via verbal and written communication for solving the design issues for the project and supported the testing team to test the complete code successfully
- Worked on enhancements and bug fixes to existing **MULESOFT** applications. Hands-on experience with open source and agile development tools such as **GITHUB** or **SVN**, and **MAVEN**
- Together with **ARCHITECTS**, I designed and implemented solutions, handling all MuleSoft documentation and **UNIT TESTING**.

Airtel**Software Engineer Intern**

Hyderabad, India

May 2020 – August 2020

- Engineer production-quality code to deploy these **SOLUTIONS** in a serverless, **MICROSERVICES** architecture.
- Enhance testing platforms, improve **TEST AUTOMATION**, and foster software craftsmanship.
- Monitor and evaluate the performance of our solutions and solve the problems!
- Engage in **TEST-FIRST DEVELOPMENT**, Test Driven Development
- CLOUD** development using cutting-edge technologies and **INTEGRATIONS** with Airtel.

ACADEMIC PROJECTS**Brain Tumor Detector using CNN and VIT**

- This project deals with such a system, which uses computer-based procedures to detect tumor blocks and classify the type of tumor using a Convolution Neural Network Algorithm for MRI images of different patients.
- Identification of brain tumors in magnetic resonance imaging (**MRI**) is a complex and demanding process due to its various forms, different locations, and scanned image **PIGMENTATION**. It aims to segment brain tumors using a widely used **CNN** (convolutional neural network) model and a newer approach using **VIT** (vision transformers) models.
- Comparisons between both models are conducted to uncover the pros and cons of each model concerning the dataset.

LEADERSHIP**Voice 4 Girls****Field Coordinator**

Hyderabad, India

April 2019 – June 2019

- Led financial literacy initiatives aimed at enhancing the economic empowerment of girls.
- Orchestrated programs addressing peer pressure, empowering young girls with skills to navigate social challenges.

SKILLS & INTERESTS

- Skills: Java, Data Weave 2.0, RAML 2.0, C++, SQL
- Certificates: MuleSoft Certified Developer
- Languages: English (fluent), Telugu (native), Hindi (Fluent), and Oriya (Fluent)
- Interests: Reading, Chess, Volleyball, Badminton, Basketball
