

SAMPSON WHITNEY

South Hadley, MA 01075 | (413) 351-1400 | sawhitney54@gmail.com

SECURITY ARCHITECT

Experienced architecture and security professional with a proven track record of success in high stakes-industries including Government, Banking, Military, Manufacturing, Healthcare, and Insurance. Possesses strong work ethic and desire to learn. Vast experience in 365/Azure, Cybersecurity, Networking, Windows Server OS, Hyper-V, and VMWare. Always looking to increase performance, security, and continuity throughout the entire network.

SKILLS

- 365/Azure: O365 Admin | Entra ID | Exchange | SharePoint | OneDrive | InTune/EndPoint Manager | IaaS (VM, Storage, Networking) | PaaS (SQL, Web Apps) | Virtual Desktops | Compliance/Purview | IAM/RBAC | PIM/JIT | Conditional Access | Purview.
- Networking: Local Area Network (LAN) | Wide Area Network (WAN) | VLAN | TCP/IP | Virtual Private Network (VPN) | Layer 3 Routing | Public DNS | Wireless Solutions | NextGen Firewalls | WAF | Load Balancers.
- Software/Services: VMware vSphere | Hyper-V | Office 365 | Exchange Server | SQL Server | PowerShell | RDS Farms/Terminal Services | Active Directory | Group Policy | DNS | DHCP | Ticketing, Asset Management, and RMM suites.
- Security: Email Encryption and Spam Filtering | AntiVirus | EDR, MDR, XDR suites | SIEM | Backup and Recovery | Disaster Recovery solutions | Okta and Entra ID identity and access management (IAM) platforms for SSO/MFA | ManageEngine PAM360.
- Operating Systems: MS Windows (7, 8, 10, 11) | MS Server (2008R2, 2012, 2012R2, 2016, 2019, 2022) | Linux (RedHat, CentOS, Ubuntu) | Unix (HP-UX).
- Hardware/Systems: Servers/HCI (Dell, HPE) | SAN/NAS (HPE, Dell EMC, Synology, QNAP) | Switches (Cisco, HPE, Aruba, Dell) | Firewalls (Fortigate, Meraki, SonicWALL, Palo Alto, SophosXG) | VoIP (Cisco, Mitel, Teams, RingCentral) | Fax/Printers (Dell, HP, Brother, Lexmark, Xerox).
- Compliance: HIPAA | PCI DSS | CMMC | ISO27001 | FedRAMP | NIST | DFARS | GDPR | SOC2 | MA CMR.17 | DISA STIGs | CIS Benchmarks.

EXPERIENCE

Kaman Corporation

2022–Present

Manager IT Security Architecture

Working full time as Manager of IT Security Architecture for Kaman Corporation since November 2022. Manage planning and implementation of secure architecture changes (hardware, software, network, SaaS, Azure/365, etc). Security liaison to all international divisions.

- Corporate Subject Matter Expert in implementation of Industry 4.0 and CMMC (NIST 800-171)/DFARS initiatives.
- Lead authority on development and implementation of network segmentation for OT, IoT, HVAC, Security networks.
- Identify, mitigate, and resolve system security and information security vulnerabilities.
- Lead authority on secure product development and acceptance by government.
- Prepare comprehensive security reports, identifying exceptions and areas needing correction or improvement.
- Present and discuss security initiatives with management and the Executive Board.
- Assist in the development of long-range security plans by identifying risks in various programs and entities, evaluating the risks and setting priorities.
- Assist with security through entire DevOps CI/CD pipelines and ensure SDLCs meet Governance, risk, and compliance (GRC) standards.
- Provide consultative advice to management.
- Assist the Director of Cybersecurity with various reviews, investigations and audits as assigned.

Paragus Strategic I.T.**2017-2022****Network Administrator**

- Worked full-time as a Network Manager for Paragus Strategic I.T. since November 2017. Major job roles include network monitoring, patching and updates, compliance, network security, and business continuity.
- Actively audited security and compliance throughout the network.
- Heavily involved in project planning and implementation. Project work includes, but is not limited to firewall and switch configurations, server and virtualization roll outs, active directory and file server overhauls, network security and compliance audits, remote desktop server farms, AzureAD and SharePoint/OneDrive migrations, Azure VMs and infrastructure, Google Workspace administration, and backup and disaster recovery solutions.
- Heavy involvement with O365/Azure, ESXi, Active Directory, SonicWALL firewalls, public DNS, PRTG monitoring, and compliance (PCI, HIPAA, MA CMR.17).

360 Federal Credit Union**2012 – 2017****IT System Administrator**

- Worked part time for 360 Credit Union since August of 2012 and full time as of October 2012. Started as part time help desk support and moved into a full-time system administrator role.
- Learned various computer systems and tasks that are the back bone to the credit union's technical infrastructure. Supplied technical support and diagnosis to various employees and branches.
- Set up, configured, and maintained the Credit Union's Microsoft Hyper-V, High Availability server environment with multiple host servers, storage area networks (SAN), and fail over clustering.
- Actively managing and maintaining the Active Directory infrastructure, Windows Server Update Services (WSUS), and firmware for various systems and hardware. Performed computer imaging and configuration. Oversaw windows XP to 7 conversions due to the end of Microsoft's support for XP. Installation of various software and hardware.
- Performed Cisco IP phone system conversion and various Cisco switch configurations, along with maintaining Cisco Call Manger and Unity Voicemail systems. Spearheaded backup and disaster recovery utilizing Unitrends Backup and Recovery and Avamar Backup and Recovery systems. Configured and maintained the institutions antivirus, firewall, and security suite Trend Micro OfficeScan, maintain, update, and monitor job automation schedules and scripts vital to the core database of the credit union.

EDUCATION**Branford Hall Career Institute, Springfield, MA****Computer Network Management Certificate**

- Successfully completed classes Computer Support Technology, Microsoft Office I, Microsoft Office II, User and Application Support, Desktop Operating Systems, Support Operating Systems, Network Operating Systems, Network Infrastructure, Network Security, and Ethical Hacking.

Springfield Technical Community College, Springfield, MA**Computer Systems Engineering Associates Degree****Completed Microsoft Courses:**

- 10215 - Implementing and Managing Microsoft Server Virtualization.
- 20411 - Administering Windows Server 2012.
- 20412 - Configuring Advanced Windows Server 2012 Services.
