

Professional Summary:

- ✓ **Full Stack Developer** with over **6+ years** of experience in analysis, design, implementation and testing of Object Oriented Applications in Client/Server environments using Java/J2EE.
- ✓ Experience in all phases of Software Development Life Cycle including, Analysis, Design, Development, Integration, and Implementation (SDLC).
- ✓ Experience with development frameworks like **spring (IOC, MVC, Security, AOP, Annotations, Tag libraries, DAO), Spring Boot.**
- ✓ Experience in working with **Spring Modules** like **Spring Core, Spring MVC, Spring Boot, Spring Batch** and **Spring JPA.**
- ✓ Experience in developing applications using **Spring Framework**, worked on different **spring modules** like **core container module, application context module, Aspect oriented module (AOP Module), JDBC Module, ORM Module** and **web module.**
- ✓ Experienced in Middleware persistence framework like **Hibernate/JPA, JDBC, iBatis** for **mapping Java POJO classes/Objects** with database and using **Hibernate Query Language (HQL).**
- ✓ Experience in designing professional **UI** web applications using front-end technologies like **HTML5, DHTML, CSS3, JavaScript, Angular.js, XML, DHTML, XHTML, JQuery, AJAX, JSON, Flash** and Hybrid Web Development.
- ✓ Experience with **Node.JS** platform, npm, grunt and gulp, bower, forever.
- ✓ Experience with **Java 17** features like Lambda expressions, Streams, filters, pipelines, Optional Interfaces, etc.
- ✓ Experience with **Java 11/8** features like Streams API, Default and Static methods in Interfaces, Lambda Expressions, Optional Class and Parallel Sort in Arrays.
- ✓ Experience on different **IDE's** like **Eclipse, Spring Tool Suite, NetBeans, Web Logic Workshop, and WSAD/RAD.**
- ✓ Experience in implementing Java EE design patterns such as **MVC, Singleton, Factory, Adapter, Service Locator Session Facade, DAO, DTO, and Business Delegate** in the development of Multi-Tier distributed Enterprise Applications.
- ✓ Hands on experience using messaging services like **JMS using Spring JMS** Template to implement Point-to-Point asynchronous messaging between applications using **IBMMQ, Rabbit MQ, Active MQ, Open JMS.**
- ✓ Experience in using **Amazon Web Services AWS.** Extensive experience focusing on services like **EC2, EBS, VPC, Cloud Watch, Cloud Front, Cloud Formation, IAM, S3, Amazon RDS, Elastic cache, SNS, SQS.**
- ✓ Experienced on developing and deploying applications on **JBoss, WebSphere, WebLogic, and Tomcat.**
- ✓ Extensive experience in writing **EJB** Session and Entity Bean classes.
- ✓ Experience with **JUnit and Log4j** in developing test cases and determining application functionality.
- ✓ Good experience in developing applications with **SOAP and RESTful** Web Services.
- ✓ Hands on experience with **MongoDB** Installation, Configuring, Monitoring and Designing Shared Environment.
- ✓ Experience in writing **SQL queries, PL/SQL stored procedures, Triggers** and **creating business tables.**
- ✓ Experienced in working in **AGILE** based development environment and participating in **Scrum** sessions.
- ✓ Possess excellent communication and Problem-Solving skills and the ability to work as a team member, as well as independently and adapt to new, evolving technologies and implement them in current projects.

Technical Skills:

Java/J2EE Technologies	Java 17/11/8, JSP, JDBC, JMS, JSTL, Java Beans, EJB
Web Technologies	HTML5, XML, XPath, AJAX, jQuery, CSS3
Methodologies	Agile, Waterfall, TDD
Web/Persistence Frameworks	Spring, Spring Boot, Hibernate
Bug Tracking Tools	BugZilla, Jira
IDE/Scripting	Eclipse, Node.js, Angular 14/12/10, Angular.JS, JavaScript, Bootstrap
Cloud Technologies	AWS, GCP
App servers	IBM WebSphere, Apache Tomcat, BEA Web Logic, JBoss
Databases/Tools	Oracle, SQL Server, DB2, My-SQL, PL/SQL Developer
Design/Version Control	SVN, GIT
Operating Systems	Windows, Linux, UNIX

Professional Experience:

Client: GM Financial, Forth Worth, TX.

Sep 2023 – Till Date

Title: Full Stack Developer

Roles & Responsibilities:

- ✓ Involved in various phases of **Software Development Life Cycle (SDLC)** of the application like Requirement gathering, Design, Analysis and Code development.
- ✓ Leveraged **Java 17** features, including lambda expressions, to facilitate seamless communication within the business layer and optimize database operations.
- ✓ Implemented **Java 17** features like Lambda expressions, Streams, filters, pipelines, Optional Interfaces, etc.
- ✓ Used **Spring Web MVC** framework for the applying **MVC** Implementation to the web application.
- ✓ Involved in Developing the Application using **spring MVC** Framework by implementing Controller, Service classes.
- ✓ Designed and developed Micro Services business components using **Spring Boot**.
- ✓ Designing and Developing **Micro-services** that are highly scalable, fault-tolerant using **Spring Boot**.
- ✓ Developed micro services with **spring Boot** and deployed into containers using **AWS instance** and **Docker**.
- ✓ Designed and developed **Micro services** using **REST** framework and **Spring Boot**.
- ✓ Designed and developed Micro services business components using **Spring Boot**. Consumed REST based Micro services with **Rest template based on RESTful APIs**.
- ✓ Developed **Hibernate** with Spring Integration as the data abstraction to interact with the database.
- ✓ Involved in creating and designing a database, and connect the database with **Hibernate (ORM)**.
- ✓ Involved in design, development, and implementation of front end part of the web application using **HTML5, CSS3, JavaScript, AJAX, JSON and Bootstrap**.
- ✓ Worked on UI web application by using latest UI technologies **Angular 14**.
- ✓ Developed Single Page Applications i.e. web applications using Typescript Such as **Angular 14** from starch, also developed web pages for different device like Mobile, Desktop using **Responsive Web Design and Bootstrap**.
- ✓ Developed **Node.JS** Readable and Writable streams to process the data from the external source of the application.
- ✓ Developed application using **Eclipse IDE** and deployed in Web Logic server.
- ✓ Designed and developed used **XSLT** transformation components to convert data from **XML** to **HTML**, Used **XML DOM API** for parsing **XML**.
- ✓ Involved in implementing the **JMS (Java messaging service)** for asynchronous communication.
- ✓ Used **Amazon Web Services (AWS)** like **EC2, S3, cloud watch** and **Elastic Bean Stalk** for code deployment.
- ✓ Created the **Docker containers** and **Docker consoles** for managing the application life cycle.
- ✓ Developed the middle tier using **EJBs**.
- ✓ Used **Log4J** for any logging purposes during the development of the application.
- ✓ Performed Unit Testing using **JUnit** and Functional testing to validate the code.
- ✓ Used **Jenkins** as the integration tool and improved scalability of applications on cross-platforms.
- ✓ Developed both **Restful and SOAP** web services depending on the design need of the project.
- ✓ Used **MongoDB** database concepts such as locking, transactions, indexes, Sharding, replication, schema design.
- ✓ Worked on **MySQL** database for maintenance, performance and tuning the server, and written rigorous Stored Procedures, and Triggers for event tracking.
- ✓ Followed **Agile** software development practice paired programming, Test Driven Development (TDD) and scrum status meetings.
- ✓ Coordinate with Business and Designer team to develop high level Business and Technical documents.

Environment: Java 17, spring, MVC, Micro Services, Spring Boot, Hibernate, HTML5, CSS3, JavaScript, Angular 14, Angular.js, Node.JS, Kafka, AJAX, JSON, Bootstrap, JMS, XML, AWS, Docker, Kubernetes, Git, Jira, EJB, Log4j, JUnit, Jenkins, SOAP, RESTful, MongoDB, SQL, Agile and Windows.

Client: Marquis Bank, Coral Gables, FL.

Jun 2022 – Aug 2023

Title: Full Stack Developer

Roles & Responsibilities:

- ✓ Analyzed user/business requirements, design and implementation plans by Interacting with business users/clients to gather requirements and inputs for project planning.

- ✓ Used **Java 11** features like stream and Lambda expressions.
- ✓ Maintained **Interface** compatibility and **concurrency** in the project using **Java 11** new features like default, static methods and Concurrency API.
- ✓ Designed and developed Application based on **spring Framework** using **MVC** design pattern.
- ✓ Used **spring framework** to achieve loose coupling between the layers thus moving towards Service Oriented Architecture (SOA) exposed through Restful Services.
- ✓ Designed and developed **micro services** based applications using **Spring Integration** and **Spring Boot** framework.
- ✓ Created **Spring Boot** with **Micro Services** utilizing **RESTful API**.
- ✓ Designed and implemented Product search Java **Spring boot** service to fetch the data from Elastic help of Elastic native queries. Used **Micro services** architecture with **Spring Boot** based service through **REST**.
- ✓ Involved in creating and Deployment of **REST API** and **Micro Services** in Java **J2EEE** using **Spring Boot**.
- ✓ Involved in the development of **java components** by using **Hibernate** and **spring** to persist the data in DB. Involved in **ORM mappings** for associations, Inheritance and fetching strategy, performing CRUD operations and managing second level cache using **Hibernate**.
- ✓ Worked with **Angular 12** to develop single page applications, worked with **Ngrx** for managing **Angular** applications.
- ✓ Enhanced legacy application by building new components in **Angular 12** and **typescript**.
- ✓ Used **Node.JS** for heavy **DOM** manipulation.
- ✓ Used **Eclipse IDE** to develop an application.
- ✓ Utilized **DOM**, **SAX parser** technologies in implementing **XML** parsing framework.
- ✓ Worked with **JMS** Connection Pool and the implementation of messaging using **Spring JMS** and **Message Queues**.
- ✓ Used **AWS (Amazon Web Services)** Deploying, managing and operating scalable and fault tolerant systems.
- ✓ Worked on creation of custom **Docker container** images, tagging and pushing the images.
- ✓ **EJB Session Beans** were used to process requests from the user interface and **CMP** entity beans were used to interact with the persistence layer.
- ✓ Monitored the error logs using **Log4j**.
- ✓ Written **JUnit** test cases for unit testing and load testing for various service codes.
- ✓ Continuous integration services are provided for software development using **JENKINS**.
- ✓ Developed both **Restful** and **SOAP** web services depending on the design need of the project.
- ✓ Developed enhancements to **MongoDB** architecture to improve performance and scalability. Collaborated with development teams to define and apply best practices for using **MongoDB**.
- ✓ Wrote **SQL queries** using **PL/SQL**, stored procedures and enhanced performance by running explain plans.
- ✓ Involved in **agile** development process following Test Driven Development Technique.
- ✓ Performed a thorough unit testing and resolved several data related issues before migration to production.

Environment: Java 11, spring, Spring Boot, Hibernate, MVC, Micro Services, RESTful, HTML5, CSS3, JavaScript, Angular 12, Angular.js, Node.JS, JMS, XML, AWS, Docker, Kubernetes, Git, Jira, EJB, Log4j, JUnit, Jenkins, SOAP, DOM, MongoDB, SQL, PL/SQL, Agile and Windows.

Company: Yash Technologies, Pvt, Ltd, India.

Jul 2018 – May 2022

Title: Java Developer

Roles & Responsibilities:

- ✓ Involved in System Analysis and Design methodology as well as Object Oriented Design and development using OOAD methodology to capture and model business requirements.
- ✓ Used **Spring MVC** framework for developing the application.
- ✓ Performed requirement analysis, design changes, development and maintenance of the components using **spring MVC**.
- ✓ Involved in the integration of **spring** for implementing Dependency Injection (DI/IOC). And develop the code for obtaining bean references in **Spring IOC** framework.
- ✓ Used **Hibernate** for data persistence.
- ✓ Integrated **spring** with **Hibernate**.
- ✓ Used **Eclipse IDE** to develop the application.
- ✓ Developed middleware business logic using Enterprise Java Beans.
- ✓ Developed **Core Java** components to develop the transaction report. Stored the dynamic data on to Collection Objects and used the predefined methods to perform all DB related operations efficiently.

- ✓ Used **JMS** for Asynchronous messaging.
- ✓ Worked on **XML Parsing (DOM/SAX), XML Schemas/DTD** and **XML Beans**.
- ✓ Worked on **SQL queries** to perform **CRUD** operations on the **MySQL** Database.
- ✓ Used **AGILE** methodology and participated in **SCRUM** meetings.
- ✓ Presented website mockups to clients to give them better visual of the end product and to ensure that all parameters were met.

Environment: Java, spring, MVC, Eclipse, Hibernate, JMS, XML, SOAP, SQL, Agile and Windows.
