

PROFILE:

- With 2 years of experience as a Process Expert in Telecommunication Systems, I possess in-depth knowledge of telecom processes and their supporting systems.
- As a process-oriented data analyst, I have a strong track record in interpreting and analyzing health data to gather valuable feedback from stakeholders, aiming to improve process efficiency and effectiveness.

PROFESSIONAL EXPERIENCE:

Data Analyst, NumPy Ninja

May 2024 - Present

Visual Story-teller skilled at creating insightful representations from datasets for soliciting feedback from the stakeholders and incorporating the same to enhance efficacy of processes.

1. Worked with clinical dataset designing a KPI dashboard (Length of stay, throughput etc.) for ICU Sepsis patients using Tableau calculated field, Level of Detail (include, exclude, fixed), filters, parameters, sets which will help to improve ICU operational efficiency by 30%.

2. Determined SIRS using advanced Tableau visualization feature and created a dashboard for the identified SIRS patients' using vitals - HR, temperature, Respiration and clinical parameters - PaCo2 and WBC, thus helping the stakeholders to identify and monitor patients more susceptible to the further stages of Sepsis.

3. Analyzed the role of demographic parameters with respect to sepsis which helped in inferring that patient' in the higher age bracket (65+) especially males have a longer length of stay and are more vulnerable to sepsis as compared to females.

4. Identified the dominant biomarkers - WBC, Platelets, base Excess and lactate which plays a significant role in the incidence of Sepsis by using concepts of advanced Tableau like Dual axis, Blended axes, control charts, spark line charts,

funnel charts, pareto charts, correlation charts in addition to basic charts like Bar plots, Box plots, scatter plots, heat map and thus requires regular monitoring by the clinicians.

5. Built a data pipeline to analyze maternal ultrasound data, discovering a 30% increase in preeclampsia linked to high Visceral Fat: Subcutaneous Fat ratios.
6. Used PostgreSQL for data transformation and Power BI for modeling and visualizations.
7. Explored the relationship between maternal fat, BMI, and Preeclampsia using SQL and PowerBI.
8. Visualizations revealed the influence of Waist-to-Hip Ratio on delivery mode and complications
9. Used python pandas / NumPy library for data cleaning, data wrangling and missing data analysis.
10. Adept in Python visualization libraries like matplotlib and seaborn for deriving insights through exploratory data analysis.
11. Data preparation from relational database using PostgreSQL by using SQL queries.
12. Determined the SOFA scores and Apache scores for the sepsis dataset and analyzed and visualized the same in Tableau/Power BI.
13. Involved in the process of implementation of Agile Methodology using Scrum with the help of tools like Jira.

Tata Consultancy Services, Chennai - 2012 - 2014
Telecom Process Expert • Full-time
Client Name : Talk Talk telecommunications service ,
London, UK

Responsibilities:

- Investigating failed orders and processes them within SLA.
- Assigning failed order list to team and follow up to complete them on time.

EDUCATION

Google Data Analytics Certified in
Coursera 2024

Masters in Business
Administration(Finance)

Madras University (Chennai) 2011 -
2014

Bachelor's in Computer Application
Madras University (Chennai) 2008 –
2011

Skills

- Tableau
- PostgreSQL
- Python
- MS Excel
- Power BI
- Jira

Other Working Experience

VOLUNTEERING & LEADERSHIP

Tamil Jersey School • 2023 - Present

Teacher, Jersey City, NJ

Huntington Learning Center (Part -Time)

Tutor - Present

- Reporting weekly and monthly deck to the client to showcase the order fallout percentage.
- To work on high level escalated issues by the customer with lesser turnaround time
Investigating on the customer's new, change of ownership or disconnection request and rectify the error and process the order to complete its purpose.
- I have handled Internal IQMS activity and successfully showcased the project audits with NIL observations.
- I have been a spec for learning and development for the team and coordinated with the learning
- team for the training and updated learning of the team.
