

Sawyan Prabha

ServiceNow Developer/Consultant

Sawyanprabha24@gmail.com

(614)787-6860 Columbus, Ohio

PROFESSIONAL SUMMARY

A highly skilled ServiceNow Developer with 7+ years of hands-on experience in designing, testing, implementing, and maintaining client-server applications. Specialized in custom application development on the ServiceNow platform (PaaS) with a focus on IT Service Management (ITSM), Service Catalog, CMP, CSM, HRSD, and complex workflow automations. Proven expertise in integrating ServiceNow with various tools and external systems such as Jira, Azure DevOps, and Cloud Management Platforms (CMP). Passionate about leveraging cutting-edge technologies like ChatGPT API to enhance user experience and process efficiency.

CERTIFICATIONS

- ServiceNow Certified System Administrator
- Certified ServiceNow Application Developer
- Virtual Agent Micro-Cert (ServiceNow)

CORE COMPETENCIES

ServiceNow Expertise	Custom application development, ITSM modules, Service Catalog, Integration, Incident, Problem, Change Management
Intermediate Experience	CSM,SAM ,HRSD,HAM,Portal widgets enhancements.
Integration Expertise	Integration with Jira, QuickChart.io, ChatGPT API, Azure DevOps (ADO), Cloud Management Platform (CMP)
Automation & Workflows	Flow Designer, Workflow, Business Rules, Client Scripts, UI Policies, Script Includes
Testing & Quality Assurance	Automated Test Framework (ATF), Test Planning, Execution, UAT Support
Cloud Technologies	Experience with AWS, Azure
Programming Languages	JavaScript, Angular JS, HTML/CSS
Agile Project Management	Jira, Azure DevOps, Scrum, SAFe Framework

PROFESSIONAL EXPERIENCE

Deloitte Touche Tohmatsu Limited

ServiceNow Consultant

November 2022 - September 2024

- ServiceNow Customization: Designed and developed custom applications and workflows in ServiceNow to optimize business operations, including Incident Management, Problem Management, Knowledge Management, and Service Catalogs.
- Jira Integration: Integrated ServiceNow with Jira to streamline issue tracking and project management processes across teams.
- QuickChart.io Integration: Integrated dynamic, data-driven charting capabilities within ServiceNow applications and reports by leveraging QuickChart.io.
- ChatGPT API Integration: Implemented the ChatGPT Free API to deliver AI-driven conversational support within ServiceNow, automating user inquiries and responses.

- Azure DevOps (ADO): Integrated ServiceNow with Azure DevOps (ADO) for Agile and SAFe project management, automating tasks like ticket creation, work item tracking, and sprint management.
- Cloud Management Integration: Enhanced Cloud Management Platform (CMP) by integrating it with ServiceNow, enabling optimized cloud service provisioning and lifecycle management.
- Change Acceleration Integration: Leveraged integration tools to accelerate the change management process, reducing deployment time and ensuring compliance.

Key Achievements:

- Automated project creation in Azure DevOps (ADO) via ServiceNow Service Catalog, simplifying workflows and reducing manual effort.
- Successfully integrated ChatGPT for AI-driven user support, improving self-service capabilities within ServiceNow.

Advance Solutions:

Software Engineer

April 2021 - November 2022

- ServiceNow Development: Customized and optimized ServiceNow modules including Incident Management, Knowledge Management, Service Catalog, HRSD, and Customer Service Management (CSM).
- Portal and UI Troubleshooting: Diagnosed and resolved issues related to ServiceNow Service Portal, including compatibility issues and optimizing functionality.
- Custom Catalog Configuration: Designed and configured custom Service Catalogs to streamline end-user service requests, improving operational efficiency.
- Integration & Scripting: Developed and maintained Client Scripts, Business Rules, Script Includes, and Record Producers to automate and customize workflows.
- Test Planning & Execution: Prepared Test Plans, designed test cases for various modules, and ensured successful UAT and Go-Live processes.
- Update Set Management: Managed the Update Sets for seamless deployment of changes across multiple environments.
- Reporting & Notifications: Configured reports, dashboards, and notifications to enhance business visibility and support decision-making processes.
- Key Achievements:
- Optimized customer feedback collection through the Customer Thermometer(paid API) in the Service Portal, integrating with Record Producers.
- Worked for eStore Application that consisted of Multiple variable sets on multiple Catalog.
- Successfully led UAT and Go-Live activities, providing strong support during the transition.

Ripton Solutions:

Associate ServiceNow Developer

November 2018- April 2021

- Participated in Agile Teams supporting systems engineering projects by collaborates with the project team to-build systems engineering solutions.
- Translated requirements into potential solutions based on existing options; develops solutions to meet business needs; collaborates with the project team to build Systems Engineering Solutions; and ensures solutions align with the overall project design.
- Worked on Multi-Instance ServiceNow Development area to test, debug, deployments to avoid code errors and smooth transition of developments.
- Customized the applications using Business Rules, Client Scripts, UI Action and UI Policies, External Data load using Transform maps, etc., based on the application requirements and rolled out the customizations to upper environments using Update Sets.
- Worked on HR Case and Knowledge Management, Lifecycle Event, JIRA Integration applications.
- Responsible for HR Case application development, including creation and configuration of Service Catalogs, Data imports and exports.
- Responsible for responding to requests for new catalog items and make updates to existing items.
- Successfully maintain Service Catalog Management by ensuring the quality of existing service catalog is maintained.
- Involved HR Case and interview Request configuration/ customization including UI customization, workflow administration, data imports, custom scripting, implementing new functionality, homepage customization.

- Integrating two ServiceNow instances using Web Services to maintain sync.
- Worked on huge Workflow design for on boarding and offboarding of a partner/ employee/Contractor based on the requirements provided by the teams.
- Built forms from scratch along with advances customizations at the level of UI Macros/UI page as per the complex requirements.
- Created many standard workflows which are being re-used and propagated and handled many custom events.
- Developed MID Server setup in both Test and DEV.
- Analysed Test Results and creating test reports using ATF.

CLARITY Medical PVT. LTD

Internship

February 2018- November 2018

- Analysed and Reviewed Functional documents
- Prepared Test Plan Document, Test Scenario and Test Case Design
- Involved in PCM Designing, Software Testing.
- Logged bugs in Quality Center and Bug reporting
- Analysed Test Results and test reports
- Prepared a functional automation framework using Selenium
- Worked on CISCO Packet tracker and Servers both Virtual and live on Linux and Windows.

EDUCATION

Bachelor of Technology in Electronics and communication

Graduated: May 2018

Languages: English, Hindi

ADDITIONAL SKILLS & TOOLS

Project Management Tools: Jira, Azure DevOps, ServiceNow Agile Management

Version Control: Git, GitHub, Bitbucket

Cloud Platforms: AWS (Load Balancer, Alerts, Website Hosting on EC2), Azure

Automation Tools: Ansible

Other Tools: Postman, SOAP UI, Splunk
