Phone: +1 508-936-3323

Professional Summary:

- Over **8 years** of professional experience as a **Business Analyst** in **Finance, Banking, Healthcare, and Retail and E-commerce marketing** environments.
- Expert in **End-to-End** Business analysis with expertise in all phases of Software Development Life Cycle (**SDLC**) like Requirement Gathering, Analysis, Design, Implementing, Testing, and Post Deployment using diverse methodologies including **Agile, Waterfall, and Scrum** methodologies with the ability to work with self-managing and cross-functional teams.
- Experienced in creating **Business Requirement Documents (BRDs)**, Functional Requirement Documents (**FRDs**), Non-Functional Requirement Documents, and other supporting documents for application development.
- Proficiency in analyzing and creating **Use Cases, UML diagrams** such as **Use Case Diagrams, Activity diagrams, and Process Flow Diagrams** and **Swimlane Diagrams** using various diagramming tools like **MS Visio, Smart Draw, and Lucid charts**.
- In-depth expertise in performing **User Acceptance Testing (UAT)** which involved the development of Test plans, Test scenarios, and Test cases using an Application Lifecycle Management (**ALM**) system.
- Engaged in data communication projects involving **REST API** data exchange in JSON format.
- Good Knowledge of Data Warehousing concepts like **Data Mapping, Data profiling, Data Mining**
- Extensively used **SQL** queries to extract data from different databases for data validation and data analysis working on **MS SQL Server**.
- Experienced in conducting **SWOT** analysis, **ROI, Risk Analysis, Cost/Benefit** analysis, and **GAP Analysis** using AS-IS and TO-BE business processes to derive requirements for existing system enhancements and **Strategic Initiatives (STIs)**.
- Expertise in **Banking Domain** - Leveraged **AML/KYC** experience and knowledge to share best practices and improve the overall enhanced due diligence process to protect the best interest of the bank.
- Excellent Analytical skills to understand the business process and Functionality, Requirements and to translate them to system requirement specifications. Developing functional specifications for business process refinement and automation, data modelling, system Architecture, conducting feasibility studies, and scope.
- Experience in various projects pertaining, and sound knowledge in Management Information Systems, Market research, Supply Chain Management, Finance, Capital Markets, Financial Risk Management, Banking, Private Equity, Compliances, Venture Capital and Sustainable Investing.
- Direct Experience in Global Liquidity Risk Infrastructure (LRI), PPNR, Zero Based Budget, Projection, Prime.
- Experience in ad-hoc reports generation and scorecards using SAS, MS SQL, and Excel.
- Good knowledge of Payment Systems (SWIFT, SFMS, NEFT, RTGS) in the Banking Domain.
- Knowledge of Liquidity Coverage Ratio (LCR) rules, liquidity stress testing, and Regulatory reporting and reviewing.
- Modelled requirements, managed & communicated requirements throughout the project life cycle, and performed GAP and Impact Analysis against requirements specifications to determine fit.
- Experience developing project plans, schedules, and estimates -MS Project /Office proficient.
- Manage the tax calendar to insure proper and timely payments to government entities.
- Strong Subject Matter expertise in Credit Card Industry, Investment Management, Risk Analysis, and Asset Management- risks and returns. Good understanding of the Capital Markets, Fixed Income, and Derivatives.
- Expertise in diverse Retail Banking sectors including lending, deposits, payments, cards, trade finance, treasury, KYC, AML, and Payment system.
- Experience on Mortgage Loan origination, Loan Servicing, Loan Modification, and Commercial Lending systems like Loan IQ. Familiarity with Consumer Lending Processes.
- Strong experience in processing knowledge of EFT payments processing through Automatic Clearing House ACH, Credit Cards, Check Processing, Third party payments and European payments knowledge.
- Experience of Digital Payments, E-commerce business, Wallet Payment functional, Credit Card functionalities like Credit Management, Online Payment, G3 Payments, Authorizations, Account Boarding, Service Based Architecture involving Front-end and backend integration in CRM, internet banking, Mobile Banking, Tablet Banking, IVR and SMS gateways.
- Expertise in **Retail Supply Chain Management**, including **Order Management** and **Inventory Management**, with experience across **Consumer Travel, Supply Chain Management (SCM)**, and **Demand Management (DM)**.
- In-depth knowledge of **Sterling Order Management System (OMS)**, defining contracts between systems and modeling tables.
- Experienced in developing **E-commerce portals**, including **B2B** and **B2C** environments.
- Proficient in creating and managing documents such as **Software Requirement Specifications (SRS)**, **Business Requirements Document (BRD)**, **Functional Specifications (FSD)**, **System Design Specifications (SDS)**, **Requirement Traceability Matrix (RTM)**, and testing documentation.
- Experienced in **ETL tools** like **Informatica**, designing data flows, and creating **star/snowflake schemas** for data warehousing.
- Expertise in **Business Intelligence (BI)** tools such as **Power BI, Tableau, IBM Cognos, and Splunk** for creating dashboards and reports.

- Hands-on experience with **Azure Data Services**, including **Data Factory, Data Lake, Kubernetes**, and **Virtual Machines**.
- Skilled in **CI/CD pipelines** using tools like **Jenkins** and **Bamboo**, ensuring streamlined deployments.
- Demonstrated ability in **project management**, including creating **Key Performance Indicators (KPIs)**, conducting **ROI Analysis**, and drafting comprehensive documentation.
- Strong expertise in managing **end-to-end testing processes**, defect tracking, and supporting test teams with tools like **HP ALM, Cucumber**, and **LoadRunner**.
- Certified **Scrum Master**, with experience facilitating Agile projects and Scrum ceremonies.
- Extensive experience in **Investment Banking, Retail Banking**, and **Financial Services**, with a strong understanding of **Portfolio Management** and **Cash Management**.
- Experience in the Health Care Industry with exposure to Electronic Medical and Health Records (EMR & EHR)/Automated Health Care Systems, Claims Processing, etc.
- Maintained the Traceability Matrix table to track the Business Requirements to the design to the testing keeping track of all requirements in the BRD.
- Adequate knowledge in Health Administration - Claim's processing (auto adjudication), COB, EOB/Drafts, Claims pricing, enrolment, Medicare, MMIS, Medicaid, CDHP (consumer driven health plans).
- Experience in Medicaid Management Information System (MMIS). Expertise in various subsystems of MMIS- Claims, Provider, Recipient, Procedure Drug and Diagnosis (PDD), Explanation of Benefits (EOB).

Technical Skills:

Finance, Banking, E-commerce Domain:

Asset Portfolio management, Fixed Income (Bonds, Convertibles, T-Notes, T-Bonds), Derivatives, Money Market Instruments and Mutual Funds, AR, AP Unified Modeling Language (UML), MS Share Point, BPMN, JIRA, Agile-Scrum, Waterfall-Scrum, Waterfall, RUP, Extreme Programming, Kanban, SAFE.

Project Management Tools/Methodology:

JIRA, MS Office, TFS, Confluence, HP ALM.

Requirement Management:

Tableau, MS office Suite, SSRS, Microsoft Power BI

Reporting Tools-BI:

Swagger

Design Tools:

MS Word, MS Excel, MS PowerPoint, MS SharePoint, MS Project, MS Visio

Office Tools:

HP QC, HP ALM

Testing Tools:

Informatica

ETL Tools:

HTML, XML, SQL

Languages:

MySQL, MS-Access, SQL Server

Database/ETL:

JIRA, HP ALM QC, Service Now, SNOW

Defect Tracking tools:

Agile, Waterfall, UML, SDLC, Scrum, RUP, V-shape modeling

Methodologies:

FACETS, HIPAA, NASCO, SHOP, Medicare, Medicaid, ICD 9, ICD 10, Claims Adjudication, RCM, EMR, EHR, COB and EOB

Healthcare:

Scope Initiation, Requirements Gathering/Definition, Workflow Analysis, Gap Analysis, Design review, Business Process Management, Product Management, Business Impact and Risk Analysis, Problem Management, Data Analysis,

Business Analysis:

Education Details:

- Bachelor's in Commerce from Andhra University – **2017**
- Masters in Business Informatics from Judson University - **2024**

Professional Experience:

Midfirst Bank, Oklahoma City, OK

Sep 2023 – present

Sr Business Systems Analyst

Responsibilities:

- Work with SMEs to understand various assets and security classes, exchange traded derivatives (such as futures, options on futures, equity options and index options), OTC derivatives (such as interest rate swaps, swaptions, credit default swaps and total return swaps) and portfolio allocation and management.
- Possess understanding of Structured Finance with a focus on Asset Backed Securitization including MBS, credit card receivables securitization, insurance risk securitization, auto loan securitization etc.
- Responsible for Leading the Business Process Reengineering effort and for the SRS (Software Requirements specifications) documentation of the build out of the FWA dashboard and for client reporting.
- Liaison between business units and IT Department to ensure the delivery/enhancement/maintenance of loan securitization management system.
- Engage functional specifications and mapping attributes for Daiwa Calypso RISK RFP and Calypso High-Level Requirements, Calypso Architecture and Systems Evaluation Matrix.
- Determine and draw the preferred flows for OMS (Charles River), TMS figuration, BOSS and MEO for financial instruments (Stocks, bonds, Options, Mutual Funds, Preferred, etc. with the consideration of Web discounts, daily trading account value, margin

requirements, IRA accounts, trading limits, Lead-Ins and Lead-Outs, GLAS (Gain Loss Analysis Systems), Confirms, Settles, Trade multiplier, etc. on MS Visio.

- Participate in daily Agile Scrum, Sprint Planning and Retrospective Sessions and update the team on status of upcoming User Stories for the project of changing the client's software maintenance structure of their various software products.
- Responsible for obtaining sign off from the appropriate business process owners prior to deploying the robotic process into production.
- Use Scrum / Agile professional concepts and company objectives to resolve complex issues in creative and effective ways.
- Work with Robotic Process Automation RPA tools Automation Anywhere, Ui - Path to develop software robots.
- Create the 'ARS' - Automation Requirements Specification document for implementing Robotic Process Automation for the processes below implemented through Automation Anywhere.
- Facilitate daily scrum meetings to review the status of sprint backlogs and sprint review meetings to discuss the accomplishments and issues that the Scrum Development team faced.
- Participate in all phases of Software Development Life Cycle (Agile, SCRUM, RUP, and Iterative).
- Manage scope creep and work with the scrum master to manage sprint time-box when business would request to change the requirements after development had started.
- Assist the Strategic Operations Technologies group with implementing Agile Requirements Methodology.
- Work with Fixed Income, Capital market, Bonds and Bond Trading Cycle, Bond Pricing, Equities, Trade Cycle, Derivatives (Options and Futures), Portfolio Management, Sales, and Marketing.
- Support various wholesale bank businesses including loan capital markets, derivatives, and credit fixed income, shadowed Foreign Exchange Traders referendum and US non-farm payrolls reporting.
- Depending on the ISR and meetings, Scope and high-level estimates were sent for approval. Once Scope is approved, Draft SRS master document was prepared, and detailed business requirements were captured.
- Implement new integrated Savings, CD, IRA system; new Leasing system; first Consumer Loan Securitization; numerous acquisitions; new Credit Scoring system; new Commercial Loan Accounting system; new Collections system
- Involved in Logical & Physical Data Modeling. Database Schema design and modification of Triggers, Scripts, and Stored Procedures in Sybase Database Servers.
- Progress and completion report which were then submitted to project management on a weekly basis in MS project.
- Data mapping, logical data modeling, created class diagrams and ER diagrams and used SQL queries to filter data within the Oracle database
- Interact with Cash Management Division and Compliance Office to review the AML (Anti Money Laundering) requirements and provide Positive Pay service to reduce check fraud
- Responsible for creating Use Cases, Business Process Modeling and Workflow Diagrams using MS Visio and MS Excel Performed the requirement analysis and documented the requirements.
- Configure the Data mapping between Oracle and SQL Server.
- Create customized reports in Charles River such as commission analysis report, boxed position report, take-over report, compliance report etc. using Crystal Reports, Excel VBA, and SQL.
- Help the testers with automated testing in higher environments, QA-NR, TEST and QA.
- Identify customer marketing opportunities by applying data mining models and writing advanced T-SQL stored procedures and queries.

Environment: SAFe, TDD, ATDD, CICD, Jira, Confluence, MS Visio, MS Word, MS Excel, Tableau, Ajax, AngularJS, Java, WebLogic, Oracle DB, SoapUI.

Byteridge, India

Jul 2021 – Apr 2023

Sr Business Analyst

Responsibilities:

- Engaged with clients to understand business processes and determine their specific requirements.
- Elicited and documented Business Requirement Document (BRD), Functional Requirement Document (FRD) and System Requirement Document (SRD).
- Developed, communicated, and validated requirements package with business and developers.
- Facilitated Joint Application Development (JAD) Sessions for communicating and managing expectations among the Stakeholders.
- Identified the Business processes for developing and documenting detailed business requirements.
- Ensured Use-Cases were consistent and covered all aspects of the Requirements document.
- Prepared regular status presentations to senior management and walked the stakeholders.
- Worked collaboratively with Developers, Testers to perform a gap analysis of the company's existing system functionalities.
- Validated EDI Claim Process according to HIPAA compliance and tested HIPAA regulations in Facets HIPAA privacy module.
- Conducting business validations, covering the following deliverables: FACETS Providers, Facets Claims and Facets Membership and Operational reports.
- Tested the HIPPA EDI, 834, 270/271, 276/277, 837/835 transactions according to test scenarios and verify the data with Facets on different modules.

- Interacted with other teams through walkthroughs, teleconferences, meetings, etc. to resolve various issues.
- Validated the scripts to make sure they have been executed correctly and meets the scenario description.
- Worked on all kinds of joints and operators to fetch data from multiple tables.
- Worked with the client to create and execute the acceptance test strategy.
- Led and managed the User Acceptance Testing (UAT) for the implementation of Facets Extended Enterprise administrative system with emphasis on ensuring that the HIPAA regulation is met across all modules
- Worked on FHIR conversion to be able to provide a 360-patient view from Hospital Discharge to Long-term Care, Home Health or Senior Living.
- Attained HIPAA EDI validation from Medicare, Medicaid and other payers of government carriers.
- Obtained signoff from project stakeholders on tasks completion

Environment: MS Office, Mainframes, Share Point, MS Access, Windows XP, Snag IT, Congas, Audit Studio, MS Office, HTML, ETL, XML, Data Warehouse.

Trigent Software Ltd, India

Oct 2019 – Jun 2021

Business Analyst

Responsibilities:

- Worked with the Command Center team to monitor the Incident queues to identify critical issues.
- Propose solutions to the business and get their approval to implement the projects to resolve the critical issues.
- Worked with the development teams to understand the recurring issues in the application and identify the gaps.
- Proposed solutions to the business based on whether the gap is technology driven (performance issue) or logic driven (business logic).
- Worked closely with business to prioritize these issues and resolve them at the earliest to ensure the stability of the system.
- Provided updates to the stakeholders in Weekly Operational and Monthly Governing meetings.
- Managed and document support processes for L1/L2 support teams and maintain the appropriate level of operations support.
- Introduced Agile and RUP methodologies to reflect liquid nature of front-office improving time-to-market
- Established documentation for agile methodology for implementation with a very water-fall-centric development team.
- Conducted Asset Management, Risk Analysis of the Requirements and Traceability focus areas of the various projects and worked with the project team to help them identify the high-risk areas.
- Analyzed User Requirement Document, Business Requirement Document (BRD), Technical Requirement Specification and Functional Requirement Specification (FRS).
- Collaborated with business users and software development team within AGILE framework to ensure rapid and successful implementation of the solution.
- Analyzed business requirements, created business/ process flow charts, database flow charts and reporting tool database for research revenue management tracking.
- Managed departmental reporting systems, troubleshooting daily issues, and integrating existing Access Databases with numerous external data sources including (SQL, Visual, Excel and Access).
- Scorecard ADHOC development of SQL to excel dashboards, charts, graphs, and Pivot tables.
- Utilized Agile SCRUM methodology to develop User Stories, Product Backlog, and Sprint Backlog.
- Worked extensively with MS Excel and MS access
- Planned and defined system requirements to Wire Frames with Use Case, Use Case Scenario and Use Case Narrative using the UML (Unified Modeling Language) methodologies.

Environment: BMC Remedy, MS Access, MS Project, Agile, MS Office, HTML, SQL, Windows, Jira, Kronos

XTGlobal, India

May 2017 – Sep 2019

Business Analyst

Responsibilities:

- Used SQL queries for organizing and abstracting data from MS access databases, created reports, forms on Ms Access.
- Enhanced the existing online banking application by improving its GUI, making it user friendlier.
- Captured requirements for monthly SL to GL postings, calculating GL beginning and ending balances.
- Conducted JAD sessions with management, SME, vendors, users, and other stakeholders for open and pending issues.
- Incorporated Rational Unified Process (RUP) to create Business Requirement Document Specifications using MS Visio and MS Word.
- Developed User Stories throughout the Agile Lifecycle as well as created UML diagrams such as Use Case, Activity, ER diagram and Chart diagrams with MS Visio.
- Developed business process models in RUP to document existing and future business processes.
- Planned and defined system requirements to Wire Frames with Use Case, Use Case Scenario and Use Case Narrative using the UML (Unified Modelling Language) methodologies.
- Implemented the SDLC for the developing life cycle in an agile approach and followed the standards process in the application.
- Created Use Case Diagrams, Activity Diagrams, Sequence Diagrams and ER Diagrams in MS Visio.

- Responsible for meetings with users and stakeholders to identify problems, resolve issues and improve the process to ensure a stable and accurate solution.
- Installed SQL Server Management tools using SQL Server Setup Program. Tested the Installation of SQL Server.
- Created exceptions report which were then submitted to project lead and stakeholders on a regular basis.
- Facilitated user acceptance testing and test strategies with Information Systems Group.
- Performed manual front-end testing to check all functions of different modules.
- Worked on XML tools with various documents for further processing and worked on XML API's.
- Developed XML schema for data retrieval and processing to improve system flow through metrics.
- Developed strategies with Quality Assurance group to implement Test Cases in Mercury Test Director for stress testing and UAT (User Acceptance Testing).
- Trained the future users to coordinate their activities vis-à-vis CORD system rather than ARW.

Environment: Waterfall, Oracle, Rational Doors, MS Project, Java, MS Excel, MS Access, HP Quality Center, Star UML.
