

# Scott Richardson

**C#/.Net Full Stack Developer | C# | .Net | React | Angular | JavaScript | TypeScript**

Wells, ME • otrrichardson@gmail.com • <https://www.linkedin.com/in/cott-richardson>

---

## Summary

I am a seasoned C#/React, Angular full-stack engineer with a deep passion for building cutting-edge applications. With a track record of successfully leading and contributing to the migration of monolithic systems to Microservices, I prioritize code quality through Test Driven Development (TDD) in all my projects. My expertise spans a wide range of technologies, including C# .NET, ASP.NET MVC, ASP.NET Core, WCF, WPF, Entity Framework, GraphQL, JavaScript, TypeScript, React, Angular, and proficiency in AWS and Azure services. With a strong foundation in agile methodologies, I am dedicated to delivering end-to-end solutions that meet and exceed business requirements.

## Skills

### Programming Languages:

- General-Purpose Languages: C#, VB.NET, JavaScript, TypeScript
- Markup Languages: HTML, XML, XAML
- Query Languages: T-SQL

### Web Development Technologies:

- Frameworks & Libraries: ASP.NET, ASP.NET Core, React, React Native, Redux, Next.js, Angular, Bootstrap
- Technologies & Architectures: AJAX, MV\* Patterns (Model-View-\*), Web Forms, Win Forms
- Styling: CSS

### Mobile & Cross-Platform Development:

- Frameworks: Xamarin, Ionic-Capacitor Cloud Platforms
- Amazon Web Services (AWS): EC2, RDS, S3
- Microsoft Azure

### Databases:

- Relational Databases: MS SQL, Oracle, MySQL, MariaDB, PostgreSQL
- NoSQL Databases: MongoDB
- Database Tools & Technologies: SSIS (SQL Server Integration Services), SSDT (SQL Server Data Tools)
- .NET Data Access Technologies: ADO.NET, LINQ to SQL, Entity Framework/Core

### API Development:

- API Types & Technologies: ASP.NET Core API, RESTful API, SOAP API, GraphQL API
- Version Control Systems Tools: VSS (Visual SourceSafe), SVN (Apache Subversion), Git

### Software Testing:

- Testing Frameworks & Libraries: Unit Testing, XUnit, NUnit, MSTest, Selenium, Jest, Jasmine, Karma

### Development Tools:

- IDEs & Editors: Visual Studio (2008-2023), Eclipse, Visual Studio Code (VS-Code)
- Database Tools: SQL Server Management Studio (SSMS)

# Experience

## Link Development - Senior Full Stack Engineer

Nov 2021 - Present

- Spearheaded agile team collaborations, involving UI/UX designers, product managers, and QA engineers, to gather requirements and deliver high-impact solutions, enhancing project delivery efficiency by 20%.
- Engineered responsive UIs with HTML, CSS, React, and Angular, resulting in a 30% improvement in user engagement and collaborated with designers to translate mockups into functional experiences.
- Developed robust server-side logic using C# and ASP.NET CORE, and optimized database structures with EF Core migration scripts, achieving a 25% increase in data processing speed.
- Pioneered the integration of Google Maps API in UI, improving location-based services by 40%.
- Crafted and maintained GraphQL and RESTful APIs, ensuring seamless frontend (React) and back-end (C#) communication.
- Utilized Storybook to provide isolated component environments, speeding up component development by 15%.
- Applied TDD and BDD principles, achieving over 80% testing coverage with Jest and Cypress, enhancing code stability and reliability.
- Collaborated with DevOps for ASP.NET application deployments on Azure and AWS, reducing deployment times by 20%.
- Troubleshooted React and Angular production issues, maintaining 99.5% uptime.
- Optimized C#.NET application database queries, enhancing application performance by 30%.
- Implemented MicroViews/MicroServices for Domain-Driven Contexts, improving system modularity and scalability.
- Architected and deployed web/mobile applications using C#, PostgreSQL, Angular, and TypeScript.

## Enigma Technologies, Inc - Senior Full Stack Developer

Jul 2019 - Oct 2021

- Led cross-functional teams in migrating the company's legacy website to a Next.js, Material UI, and C# stack, increasing website performance by 25%.
- Enhanced ASP.NET MVC applications with new features, meeting 100% of business requirements.
- Innovated with custom React hooks for a structured form system, reducing code redundancy by 20%.
- Developed .Net Core MVC web applications with client and server-side validation, enhancing user interaction by 30%.
- Built responsive React and React Native applications, advocating for React Query over Redux, leading to a 15% improvement in state management efficiency.
- Managed AWS-based cloud applications deployment, utilizing EC2, RDS, and S3, achieving a 99.9% uptime.
- Implemented Redis, Stripe, Sentry.io, and Mixpanel for enhanced caching, payment processing, and user activity tracking, increasing operational efficiency by 20%.
- Boosted SEO in Angular applications, leading to a 30% increase in page views per session.
- Ensured pixel-perfect implementation of UI designs in React components.
- Utilized Angular for data binding and routing, enhancing user navigation experience.

## Infosys - Full Stack Developer

Aug 2016 - May 2019

- Engaged in all web application phases, from maintenance to deployment using Azure, enhancing deployment efficiency by 15%.
- Wrote and maintained high-quality, modular code, adhering to best practices, resulting in a 10% reduction in bugs.

- Implemented AJAX for dynamic web content, improving page load times by 20%.
- Enhanced customer experience by refining front-end solutions with Angular and RxJS.
- Integrated Google Analytics and geo-location features in a C# booking platform, leading to a 35% increase in bookings.
- Developed .NET Core + Angular applications and coordinated with DevOps for build and release management.
- Executed NUnit test plans, ensuring 95% code requirement compliance.
- Developed client-server modules for remote patient data collection, enhancing data accuracy and monitoring efficiency.

## **Education**

**Anderson University (SC) | 2012 - 2016**

Bachelor of Science in Computer Science
