

Sean Bradley

Full Stack Software Engineer

• San Francisco, CA, USA • seanbradley110@gmail.com • github.com/Dark-Coders1 • linkedin.com/in/sean-bradley-9838802bb/

Profile

Full Stack Software engineer with a track record of building and delivering robust, high-performance applications across web and cloud platforms. I specialize in crafting intuitive user interfaces with Angular and React, coupled with the development of scalable backend services using .NET Core. My approach blends technical proficiency with strategic thinking, allowing me to design solutions that address both user needs and business goals. I thrive in fast-paced, collaborative environments and excel at implementing DevOps practices to ensure seamless, reliable software delivery. Dedicated to staying ahead of the curve in modern technologies, I bring a practical, hands-on mindset to every project.

SKILLS

- **Programming Languages:** C#, SQL, Typescript
- **Web Frameworks & Libraries:** .NET Framework, ASP.NET, Angular.js, React.js
- **Web Development:** HTML, CSS, JavaScript
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, DynamoDB, SQLite, Redis
- **Version Control:** Git, Gitlab, GitHub
- **Project Management:** Scrum, Kanban, JIRA, Trello
- **Cloud & DevOps:** AWS (S3, Lambda, EC2, ECS), Azure, Docker, Kubernetes, CI/CD (Jenkins)
- **Testing Tools:** NUnit, MSTest, xUnit, Selenium

EXPERIENCE

LogicVortex

January 2023 - Present

Senior Full Stack Engineer

- Developed and launched a cloud-native SaaS platform utilizing .NET Core, Kubernetes, and AWS, improving deployment efficiency by 50% and reducing downtime.
- Designed and implemented a microservices architecture for a payment processing system, increasing transaction speed by 40% and ensuring seamless scalability.
- Directed a team of 8 engineers to adopt DevOps practices, introducing CI/CD pipelines and automated testing, which reduced release cycles by 30%.
- Built a real-time analytics dashboard using React and AWS Lambda, empowering stakeholders with actionable insights for over 10,000 users.
- Collaborated with cross-functional teams, including product managers and designers, to deliver solutions that enhanced user satisfaction by 20%.
- Migrated legacy applications to Azure-based microservices, leading to a 15% reduction in operational costs while improving maintainability.

Letsremotify

December 2019 – December 2022

Full Stack Engineer

Developed and maintained web applications for DenebSolution as a contractor using C#, .NET with a focus on creating scalable and efficient software solutions. Key contributions include:

- Delivered 4 enterprise-grade applications, integrating .NET Core, ASP.NET, Angular, and React to provide end-to-end solutions tailored to client requirements.
- Improved backend service efficiency by 35% through the development of optimized ASP.NET Web APIs and seamless integration with cloud-based infrastructures on AWS.
- Spearheaded the adoption of containerized deployments with Docker and Kubernetes, enhancing reliability and scalability for core applications.

- Enhanced database query performance by 25% through advanced indexing strategies and efficient utilization of DynamoDB and relational databases.
- Played a pivotal role in mentoring junior developers, fostering a culture of collaboration, and improving team output by 30%.
- Created intuitive user experiences by building responsive frontends using Angular and React, leading to a 15% increase in client engagement.
- Automated repetitive infrastructure tasks using Terraform, improving operational efficiency and reducing configuration errors.
- Worked closely with QA teams to address critical issues, resulting in a 40% decrease in post-deployment bugs.

Mission

June 2017 – October 2019

Backend Engineer

- Assisted in developing software applications using .NET framework, gaining hands-on experience in both frontend and backend development.
- Contributed to the design and implementation of user interfaces using Angular, ASP.NET Web Forms, and WinForms, enhancing UI efficiency by 15%.
- Participated in code reviews, providing constructive feedback to peers to improve code quality and maintainability.
- Supported deployment processes and performed troubleshooting to resolve issues during the deployment phase, ensuring smooth application launches.

Projects

Bigger Pockets | <https://www.biggerpockets.com>

BiggerPockets is a leading online platform for real estate investors, professionals, and enthusiasts, with over 2 million members.

Recurate | <https://www.recurate.coms>

Built scalable solutions to drive traffic, sales, and sustainability for recommerce platform.

Education

California State University-Fresno

- Bachelors in Business Administration
