WORK EXPERIENCE

IT Architecture, Manager

FORTIS Alberta - Power Utility – Calgary, AB Canada

Jun 2024 - Present

- Direct the creation of architectural artifacts for **SAP ARIBA Business Network and Contract Invoice** solutions, including Current State assessments, Target State architecture, Roadmap development, and Statements of Work (SOW) for implementation.
- Define the implementation strategy for the new CRM system, **SAP Service Cloud**, replacing **Microsoft Dynamics** and incorporating CICO functionalities to enhance operational efficiency.
- Develop **SAP S/4HANA** implementation roadmap transitioning from SAP ECC 6.0, encompassing initial assessments, remediation strategies, core system implementation, and Enterprise Asset Management (EAM) enhancements.
- Evaluated Enterprise Architecture artifacts, including **Conceptual Solution Designs, Solution Architecture Recommendations, and Detailed Solution Designs**, to strengthen IT governance and optimize the Project Management Life Cycle.
- Lead Enterprise Architecture (EA) practices across multiple IT and business projects, including Billing Improvement, RunMyJobs Implementation, ALM/Quality Center (QC), Fiori Apps and others.

Enterprise Architect

TRANSALTA - Power Utility – Calgary, AB Canada

Jan 2023 - Feb 2024

- Developed implementation **strategy and roadmap for business transformation** leveraging: **S/4HANA PCE on RISE, Workday HCM, Oracle Primavera, OneStream**, and other enterprise applications.
- Articulated an **integrated technology roadmap** providing the executive board with a cohesive overview of IT initiatives, spanning operational, tactical, and strategic efforts.
- Led the **Architecture Working Group and Architecture Review Board** to ensure IT initiatives are aligned with the technology direction.
- Implemented **Enterprise Architecture artifacts**: Conceptual Solution Design, Solution Architecture Recommendation, and Detailed Solution Design **to enhance IT governance and streamline the Project Management Life Cycle.**
- Evaluated the current integration platform and **formulated the integration strategy, defining integration patterns** utilizing SAP BTP, Azure Integration Services, and out-of-the-box APIs from various SaaS solutions.
- **Led the Application Rationalization Program**, resulting in a 10% reduction in the application footprint (779 Applications) and generating savings from software licenses and operational expenses.
- Defined and implemented a Minimum Viable Product (MVP) **for IT Service Costing (Chargeback)**, utilizing the **Activity-Based Costing (ABC) methodology** to allocate 100% of operational costs to the business units that utilized the services.

Calgary, AB

Enterprise Architect Consultant

SASKPOWER - Power Utility – Regina, SK Canada

Oct 2016 - Dec 2022

- Developed **technology strategies and roadmaps** providing technical direction for **SAP Solutions, Customer Experience, Hybrid Integration, Digital Workplace, Human Resources, External Workforce, SAP BTP**, and others.
- Formulated **SAP Modernization Roadmap**, which included the migration of **SAP ECC6.0-HCM to SuccessFactors, SAP CRM 7.0 to C4HANA (CX-Suite) and SAP ECC6.0 (SAP R/3) to S/4 HANA in Azure**.
- Created **Solution Architecture Recommendation and Roadmap** for **Work Management in Distribution services** leveraging **SAP ECC (PM), ClickSoftware and GIS (Electric Office)**.
- Proposed **Solution Architecture Recommendation for Case Management on SAP CRM 7.0**, reducing TCO, technology landscape complexity and improving customer services.
- Created **Conceptual Solution Design** to streamline critical business operations, such as **Smart Meter Connect/Disconnect, High Load Move, Customer Omnichannel, Online Customer Energy Use**, and others.
- Conducted **proof-of-concept** trials to evaluate use of **Smart Goggles mixed reality technologies** for QA/QC activities in **transmission station construction and the Bonding and Grounding Training module**.
- Defined specifications and requirements for the **CRM RFP to implement C4HANA (Service, Sales, Marketing, and Qualtrics)**.

Senior IT Consultant

TANDEM - IT Consulting Firm - Miami, Florida USA

Mar 2012 – Oct 2016

IT Consulting Firm, delivering on demand consulting services to clients in South America.

- **Delivered technical and executive presentations** on IT/SAP solutions as part of presales efforts, demonstrating benefits, cost savings, process improvements, total cost of ownership, and ROI across diverse organizational levels.
- **Managed a project portfolio of different complexities, technologies, vendors, and clients**, meeting contractual agreements and exceeding the client's expectations in terms of quality and services delivery.
- **Designed integration patterns between SAP BTP and MuleSoft** to enable seamless connectivity between **SAP S/4HANA and Oracle's Product Master**, supporting secure, scalable, and efficient request-response payload transmission.
- **Implemented integration of SAP HR with CA Identity Manager** for a financial institution. Project goal was automating each task (new employees, vacations, promotions, etc.) in SAP HR and dispatching data stream to CA Identity Manager to perform the configured security tasks.

Senior IT Architect

CORPOELEC - Power Utility – Venezuela

Oct 2010 – Oct 2016

- Led the development of **the technology strategy and roadmap to integrate 13 separate electricity companies into a unified application (SAP ECC) hosted in a centralized Datacenter**. This involved defining specifications across multiple domains including civil, architectural, mechanical, electrical, Telecommunications and IT. The project had an estimated budget of \$10M and a timeline of 3 years.
- **Established and implemented the Project Management Office (PMO)** to offer centralized oversight, support, and governance for projects within the IT Organization.
- **Developed enterprise IT infrastructure and implemented ITSM best practices to provide high quality IT services and a smooth operation** through gathering functional requirements and business needs.
- **Developed business continuity plan** for SAP ERP & ISU based on architecture of servers, storage and replication systems, guaranteeing the availability of critical applications and business income in order of \$1.5M /Daily. Budget was \$5M with a time scale of 18 months.

IT Manager

ENELVEN - Power Utility – Venezuela

Sept 1998 – Sep 2010

- **Planned, directed, and oversaw operations and projects of IT Infrastructure**. Led liaison between IT and business with a team of 25 professionals responsible for the operations of two data centers.
- **Developed IT strategies and plans to support and enhance the infrastructure platform and technology services** by identifying needs, assessing technological trends, and revising the business's evolution through the development of migration plans, digital transformation roadmaps, and people development strategies.
- **Managed infrastructure supporting IT Services**: Microsoft servers, services desk, SAP (ERP, BI, PI), Synaut Spectrum SCADA / DMS, Microsoft Exchange, Internet services, GIS, and homemade applications with availability rate above 99.9 %.
- **Designed architecture to integrate** the Synaut Spectrum SCADA / DMS with SAP/ISU through implementing SAP PI platform. Execution time 8 months with budget of \$500K.
