

SRIVIDHYA SRINIVASAN PANCHABAKESAN

AWS Solutions Architect Professional

srvdh.blj@gmail.com

M: +19472181292

PROFESSIONAL SUMMARY

10+ years of IT experience with a focus on cloud architecture and AWS solutions

- **Designed and delivered end-to-end cloud solutions** on AWS for diverse industries, including Retail, Automobiles, and Financial Services, ensuring alignment with business goals and technical requirements.
- **Led architectural discussions and workshops** with customers and stakeholders to develop integrated solutions, leveraging AWS services such as EC2, S3, RDS, Lambda, API Gateway, and CloudFront.
- **Executed Well-Architected Reviews (WAR)** to assess workloads, identify gaps, and provide actionable recommendations for improving performance, security, reliability, and cost optimization.
- **Spearheaded cloud migration and modernization initiatives** using the AWS Cloud Adoption Framework (CAF), resulting in improved scalability, reduced operational costs, and faster time-to-market.
- **Developed and presented proof of concepts (PoCs)** to demonstrate the feasibility and value of proposed solutions, enabling customers to make informed decisions.
- **Collaborated with cross-functional teams, including partners and professional services**, to deliver comprehensive solutions and remove technical blockers.
- **Facilitated workshops and training sessions** for customers and internal teams on AWS services, best practices, and emerging technologies.
- **Led the implementation of GenAI use cases** using AWS AI/ML services (e.g., SageMaker, Lex, Comprehend) to build chatbots and NLP-driven solutions for extracting insights from unstructured data.
- **Optimized cloud costs and operational efficiency** through FinOps practices, including cost analysis, resource right-sizing, and utilization of AWS pricing models (e.g., Reserved Instances, Savings Plans).
- **Supported sales teams** by participating in technical discussions, demos, and proposal development to win new business opportunities.
- **Work with Technical communities** to share information about the latest features and technologies.
- **Worked in Agile environments**, collaborating with multi-cultural and multi-functional teams to deliver data-driven solutions on time and within budget.

CERTIFICATIONS AND ACHIEVEMENTS

AWS Certifications

- AWS Certified Solutions Architect – Professional
- AWS GenAI Ambassador
- AWS GenAI Essentials Certified
- AWS Certified Cloud Practitioner
- AWS Certified GenAI Practitioner
- AWS Certified Data Engineer – Associate
- AWS Certified Solutions Architect – Associate
- AWS Certified Developer – Associate
- AWS Certified Security – Specialty
- Amazon DynamoDB Specialist

AWS Community and Leadership

- AWS Certified Senior Speaker
- AWS Certified Blog Bar Raiser
- AWS Certified GameDay Operator
- AWS Builder's League Portal Management
- AWS Study Buddy Champion in LATAM

Key Achievements

- **AWS Summit Bogotá 2022:** Facilitated a session with a client on **Amazon Connect Service**, attended by 4,000+ participants.
- **AWS Summit Bogotá 2023:** Delivered a session on **AWS Graviton and its features**, showcasing its capabilities to a large audience.
- **Cloud Experience Bogotá 2023:** Conducted a session with a partner on **Modernizing Workloads with Custom-Built Database Options in AWS**, attended by 2,000+ participants.
- **AWS Women's Community Colombia:** Facilitated sessions to empower women in technology across LATAM.
- **AWS Community Builders LATAM:** Actively contributed to the AWS community by sharing knowledge and best practices.

Awards

- Recognized as **MCO Team Player** for exceptional collaboration and contributions.

TECHNICAL EXPERTISE

- **AWS Services:** EC2, S3, RDS, Lambda, API Gateway, CloudFront, IAM, CloudFormation, CloudWatch, SageMaker, Lex, Comprehend, and more.
- **Cloud Frameworks:** AWS Well-Architected Framework, Cloud Adoption Framework (CAF), FinOps.
- **AI/ML:** Natural Language Processing (NLP), chatbots, and predictive analytics using AWS AI/ML services.
- **Core Banking:** Extensive experience in customization, implementation, and support of Finacle Core Banking Solutions (versions 10.2.18, 10.4.2, 10.6) and API integrations.
- **Agile Methodology:** Proficient in Agile practices, including sprint planning, backlog grooming, and iterative development.

EDUCATION

- B. Tech, Information Technology, Anna University, 2002-2006, India

EXPERIENCE

03/22 – Present, Amazon Web Services

AWS Solutions Architect

- **As a Solutions Architect** responsible for translating the client's business requirements into specific systems or application process design for small and medium business sectors, Partner- first and Enterprise customer ecosystem in IT, Banking, Retail and CPG sectors.
- Provide insights on usage as well as lead discussions on well-architected framework reviews.
- Support and advice on application **assessment, migration, and modernization using Cloud Adoption Framework (CAF)**.
- Work along with Partners for successful implementation of the solution.
- Technical Advisor and Project Manager for my clients to deliver business values and resolve blockers.
- Work with multi-functional, multi-cultural teams to progress in their business implementation and achieve their goals.
- Working with Financial clients in Colombia and the US for their **Blockchain, Amazon DynamoDB, and Amazon QLDB implementations**.
- Manage a program called **AWS Study Buddy Program** enabling AWS employees and Partners to achieve their Certification with various sessions.
- Guiding **AWS** clients in analysis, validation, and best practices therein develop the solutions architecture using **GenAI and AI/ML**.

- Share knowledge with internal team and with the technical communities in the country.
- Closely work with **Retail, Financial, and CPG** customers in Colombia.
- Formulate Data Quality, data integrity, data governance strategies, evaluations and suggest workarounds.
- Led **Data Governance project** with integration partners for Data Ingestion, ETL processes and full data lifecycle creation for enterprise customers to extract legacy data from their on-premises applications to get data insights by moving those to cloud.
- Led **Data Lake architecture** to share structured and non-structured data from producer to various consumers inside the organization.
- Provide guidance to get the benefit out of their data through **Data-Driven analysis** and governance with guardrails to make business decisions with their C-level and managerial teams.
- As a DynamoDB Specialist, modelled No SQL designs, guided customers from across the globe to implement best practices using NO SQL databases.

Technologies:

AWS: Identity and Access Management, Amazon VPC, Amazon Transit Gateway, Amazon Direct Connect, API Gateway, Amazon DynamoDB, DynamoDB Accelerator, AWS Lambda, Amazon Step Functions, Amazon Relational Database Services – RDS, Redshift, Amazon Simple Storage Services (S3), GenAI services – Amazon Textract, Amazon Comprehend, Amazon Transcribe, Amazon Bedrock, Analytics services – Amazon Athena, AWS Glue Studio, Amazon DataZone, Amazon QuickSight, Amazon Q, Salesforce, GitHub, GitLab, Terraform.

03/21 – 01/22, Sophos Solutions

Specialist Expert/ Senior Solutions Architect

- **Project: Bancolombia – Neon – API Cloud Migration**
- Led discussion with stake holders for requirement analysis and formulate the technical feasibilities and trade-offs of getting it implemented as a solution.
- **Technical Advisor** and **Subject Matter Expert** for the projects. Project manager handling developers, quality analysts and post production teams to develop a product with development best practices intact based on the project plan formulated with the customer
- Work with multiple third-party provider and internal integration teams to analyze, guide and review the integration workflows end-to-end.
- Revision, administration of infrastructure and networking activities to provide High Availability, Disaster Recovery strategies and Secure Solutions.
- Organize and overview production activities and plan post production support with internal and external customers and finalize the successful implementation of the solution.
- Revision of their on-premises servers, their configurations and do migration assessment and provide Total Cost Ownership (TCO).
- Provide comparative cloud solution and its implementation benefits discussion with Directors and C-suite of the bank.
- Plan **Proof of Concept** activities with partners and IT heads, define the success criteria and approve it for implementation with stake holder.

Technologies:

AWS: Amazon Direct Connect, Amazon VPC, AWS Transit Gateway, Amazon Route53, API Gateway, Elastic Load Balancer, SOAP, REST, Identity and Access Management, AWS Lambda, Amazon Step Functions, Amazon Relational Database Services – RDS, Redshift, Amazon Storage Services (S3), Amazon Cost Explorer, Amazon CloudWatch, Amazon CloudTrail, AWS Cloud Formation Templates, Amazon EC2, AWS Graviton Processors, SOAP, REST.

01/18 – 02/21, Sophos Banking Solutions

Technical Consultant/Solutions Architect

Project: Bancolombia – Mobile APP (Sucursal Virtual Personas, Sucursal Virtual Empresas)

- Requirements gathering, design and field mapping for their existing solution.
- Manage internal technical team of developers and QA team to deliver the expected outcome in Agile environment.
- Replace existing TODO1 Digital Banking functionalities into new Mobile APP Services.

- Creation/Design/Mapping of new APIs like Consolidated customer balance inquiry, Beneficiary Maintenance, Internal Transfer, External Payments, SWIFT Transfers for both new Mobile APPs.
- Leading and managing banking modules like Loans, Customer Relationship Management (CRM), General Ledger etc
- Development of jasper reports to provide information to the Frontend Bank users to be reviewed upon end of day, month and year cycles.
- Support for User Acceptance Testing with internal users and stake holders
- Post - Production Support for the delivered solutions.
- Technical Lead and Subject Matter Expert for the banking modules and solutions.

Project – SWIFT 2018 Syntax Change

- Development for payment related services in Finacle product based on new SWIFT Standard
- Trade related services modifications
- New MT 103/202 & MT 7XX series message impact analysis and customization
- Modifications of online trade services from e-banking to core according to the new SWIFT standard for Trade Modules like Documentary Credit.

Technologies:

Windows XP,7,8. Finacle Scripting, Unix, RDBMS, J2EE, JSP, PL/SQL, Java, JavaScript, HTM, SQL 2000/2005, ORACLE 10G,11G, IBM WebSphere ver 8.x, REST, SOAP, Postman.

05/16 – 12/17, Sophos Banking Solutions

Implementation Consultant

Project: Banistmo – Trade Finance

- Responsible for handling all the business and operation related improvements and initiatives for commercial international.
- Requirement Analysis, Estimation of the initiatives, Technical Design
- End to End Implementation of the initiatives and Support.

Technologies:

Finacle Scripting, Javascript, JSP, SQL 2000/2005

Project: Banistmo – Financomer Core banking implementation

- Development / Customization of Loans Module in Finacle Core.
- End to end testing in Development environment.
- Ensure on time delivery of customization as per the plan.
- Worked on Agile Methodology.

Technologies:

Windows XP,7,8. Finacle Scripting, Unix, RDBMS, J2EE, JSP, PL/SQL, Java, JavaScript, SQL 2000/2005, ORACLE 10G,11G, IBM WebSphere ver 8.x, REST, SOAP, GitHub, Jira

May 2006 – June 2007, Polaris Software Pvt Ltd

Software Developer

- Deutsche Leasing Bank- Intellect Core Banking Solutions
- Development / Customization of Intellect Core Banking
- Offshore support for bug fixes and change request
- Version Maintenance of sources

Technologies:

Windows XP,7,8. Finacle Scripting, Unix, RDBMS, J2EE, JSP, PL/SQL, Java, JavaScript, SQL 2000/2005, ORACLE 10G,11G, IBM WebSphere ver 8.x, REST, SOAP
