

SHAGUFTA PATHAN

ETL Developer

PROFESSIONAL SUMMARY

ETL Developer with over 4 years of experience in data warehousing and database technologies, proficient in DataStage, Python, and SQL. Demonstrates exceptional analytical skills in managing complex data integration projects, ensuring data accuracy and integrity, while collaborating with IT teams to enhance system functionality. Focused on performance tuning and innovative data solutions, with a commitment to supporting HR analytics initiatives.

EMPLOYMENT HISTORY

DATASTAGE DEVELOPER

Jan 2020 - Sep 2020

Tata Consultancy Services (TCS)

Thane

HR Data Warehouse Management – Chrysler Group (DataStage ETL)

Overview:

Managed the HR Data Warehouse as the central repository for HR-related information, including U.S. and Canadian Payroll data, utilizing **IBM DataStage** for Extract, Transform, and Load (ETL) processes to ensure data integrity and availability.

Key Contributions:

◆ Data Integration & Management:

- ◆ Integrated data from multiple sources such as **PeopleSoft**, **PS Payroll**, **Zero Chaos (ZC)**, **Retiree Data**, and **CBWS Benefits**, ensuring seamless consolidation and accuracy.
- ◆ Developed and optimized **DataStage jobs** to handle large-scale HR data processing, ensuring consistent and reliable data flow.

◆ ETL Development in DataStage:

- ◆ Designed and implemented ETL processes using DataStage stages, including **Lookup**, **Join**, **Aggregator**, **Transformer**, **Filter**, **Sort**, and **Dataset**.
- ◆ Automated job deployments across various environments, streamlining workflows and improving system efficiency.

◆ Data Quality & Compliance:

- ◆ Conducted regular audits and validations to ensure high-quality data and adherence to regulatory requirements.
- ◆ Designed and implemented robust error-handling mechanisms in DataStage to address data inconsistencies effectively.

◆ Reporting & Extracts:

- ◆ Led the creation of critical extracts for stakeholders, including **Service Awards**, **RPNT Feed**, and **Resource Planning**, using DataStage stages to process and deliver data.
- ◆ Automated scheduling of DataStage jobs using scheduling tools like **Tivoli Workload Scheduler (TWS)** or equivalent, ensuring timely delivery of extracts.

◆ HR Analytics Enablement:

- ◆ Facilitated access to clean and structured data for HR analytics, supporting decision-making with accurate and timely insights.

ETL DEVELOPER

Feb 2019 - Oct 2019

Valerian System

Nashik

Extract, Transform, Load (ETL) Engine Project

Project Overview:

The project was divided into two phases:

1. **Phase 1:** Migrated existing SSIS packages to Informatica jobs, replicating the logic and ensuring seamless functionality.
2. **Phase 2:** Designed and developed an enterprise data warehouse to consolidate data from heterogeneous sources, applying business logic transformations and loading the processed data into the data warehouse.

Key Contributions:

- ◆ Spearheaded the migration of SSIS packages to Informatica, ensuring smooth transition and data integrity throughout the process.
- ◆ Designed and implemented robust ETL processes, extracting data from diverse sources such as SQL Server 2008 and text files, transforming data using complex business logic, and loading it into the Netezza database.
- ◆ Engineered Informatica workflows and mappings, leveraging advanced transformations such as Lookup, Join, Sort, Filter, Funnel, Remove Duplicate, Copy, and Row Generator.
- ◆ Developed and optimized jobs for **Slowly Changing Dimensions (SCD)** Type 1 and Type 2 to handle dynamic business requirements.
- ◆ Applied Change Capture stages to detect and manage incremental data changes effectively.
- ◆ Actively contributed to the design, development, testing, and documentation of Informatica jobs, collaborating with cross-functional teams to deliver efficient ETL solutions.
- ◆ Enhanced data processing efficiency by constructing a robust data warehouse in the second project phase.

Key Tools & Technologies:

- ◆ **ETL Tool:** Informatica PowerCenter
- ◆ **Database:** Netezza
- ◆ **Source Systems:** SQL Server 2008, Text Files

DATABASE CONSULTANT

Espalier- The Experimental School

May 2016 - Feb 2019

Nashik

The Cloud ERP system was designed for the security and centralized management of all activities in an organization. ERP software for schools was programmed in such a way to meet the administrative needs of schools. Quality ERP software has different modules to help us in managing administration, students, academic results and teachers etc. It managed time-consuming tasks such as student registration, fee collection, payroll management, GPS tracking of school buses and other student related data in an easy way with ERP solutions.

- Involved in design, development, testing and documentation of Cloud ERP system.
- Used MySQL database for tables creation and involved in writing SQL queries using Joins, Stored procedures.
- Maintain database and update permission.
- Guide programmers in design and development.
- Resolve issue related to database.
- Ensure that organizational data is secure.
- Set user level privileges and permission for database segments.
- ◆ • Conduct training to staff on ERP and database design. Spearheaded Cloud ERP system design and development, optimizing school administration processes and enhancing data security measures.
- ◆ Implemented robust MySQL database solutions, crafting efficient SQL queries and stored procedures to streamline data management workflows.
- ◆ Guided programming team in ERP system development, fostering knowledge sharing and ensuring alignment with project objectives.
- ◆ Engineered user-level privileges system, balancing data accessibility with stringent security protocols to safeguard sensitive information.
- ◆ Architected robust MySQL database solutions, optimizing data management workflows and enhancing system performance for school administration processes.
- ◆ Mentored programming team in ERP system development, fostering knowledge sharing and aligning project objectives with organizational goals.
- ◆ Pioneered user-level privilege system, balancing data accessibility with stringent security protocols to safeguard sensitive student information.
- ◆ Streamlined administrative tasks, including student registration and fee collection, resulting in significant time savings and improved operational efficiency.

EDUCATION

BACHELOR'S DEGREE IN COMPUTER ENGINEERING

Savitribai Phule Pune University

Nashik, India

DIPLOMA IN COMPUTER ENGINEERING

Maharashtra State Board of Technical Education

Nashik, India

COURSES

PYTHON PROGRAMMING
Technokraft Training & Solution Pvt.Ltd

Nov 2024 - Dec 2024

J2EE
Open University YCMOU

Jun 2018

SKILLS

Python (*Experienced*), SQL (*Expert*), Shell (*Experienced*), Bash (*Experienced*), DataStage (*Expert*), SSIS (*Experienced*), Informatica (*Experienced*), Crystal Report (*Experienced*), TFS (*Experienced*), ETL (*Expert*), Data Warehousing, Database, ERP, Performance Tuning, Stored Procedures, Data Modeling, Data Visualization, Cloud Computing, Big Data, Machine Learning, Agile Methodologies.

LANGUAGES

English (*Highly proficient*).

LINKS

LinkedIn: [linkedin.com](https://www.linkedin.com).

ADDITIONAL INFORMATION

CERTIFICATION

Python Programming Certification

- Issued by: Dec-2024

ACHIEVEMENT

Awarded by the IJARCCCE for publishing a research paper entitled "Annotating Search Results from Web Databases"
