
SHAHMIR HASSAN

Lead SAP Consultant & Solution Architect | SAP EWM, WM, Pre-Sales
United States ♦ (647) 773-8751 ♦ hassanshahmir61@gmail.com

PROFESSIONAL SUMMARY

With 7 years of experience in SAP digital supply chain, I specialize in SAP EWM and WM modules, delivering tailored solutions for industries like food and beverage, aerospace, retail, and the public sector. Known for my attention to detail and go-getter attitude, I excel in optimizing warehouse processes, leading end-to-end implementations, and ensuring seamless integration across supply chain functions. My expertise includes automating workflows, improving operational efficiency by up to 30%, and earning recognition for delivering high-quality SAP solutions.

Experience Highlights:

- **Full Lifecycle SAP EWM Implementation with Transformational Impact:** Delivered a full lifecycle SAP EWM implementation for a major warehouse expansion, introducing automated workflows and support query handling to achieve a 1,000% increase in operational efficiency. Configured SAP EWM processes, facilitated seamless RF mobile data entry, and ensured robust functional and systems integration testing to elevate supply chain capabilities.
- **Recognition for Large-Scale S/4HANA Implementation Excellence:** Spearheaded testing efforts for a complex S/4HANA public sector implementation, developing over 1,000 test scripts and automating 1,500+ test cases in JIRA. Delivered a flawlessly tested solution, earning Deloitte's prestigious Gold Dot Award for outstanding implementation success.
- **Implemented State-of-the-Art Warehouse Operation Process:** Designed and executed advanced picking and put away processes tailored to client specific needs, ensuring compliance, operational efficiency, and warehouse optimization. Customized RF solutions to seamlessly integrate with business processes, resulting in improved accuracy and productivity. Set up comprehensive warehouse monitoring reports, driving data-driven decisions for optimal efficiency..
- **Seamless SAP S/4 EWM Migration:** Successfully led the migration of SAP S/4 EWM for four plants, implementing best practices to ensure a smooth transition. Delivered hyper care support, hands-on training, and rigorous testing, maintaining operational continuity while enhancing system performance post-implementation.

EDUCATION

Honors Bachelor of Science (HBSC) – University Of Toronto Mississauga (Computer Science, Mathematics & Biology)

WORK EXPERIENCE

Lead SAP Consultant | SAP EWM, WM, Pre-Sales | Global SAP Practice

Company: Argano

- Configured and optimized both inbound and outbound processes, including putaway, goods receipt, picking, packing, and shipping, to enhance overall warehouse efficiency.
- Designed and executed advanced picking and put away processes tailored to client specific needs, ensuring compliance, operational efficiency, and warehouse optimization. Customized RF solutions seamlessly integrate with business processes, resulting in improved accuracy and productivity. Set up comprehensive warehouse monitoring reports, driving data-driven decisions for optimal efficiency.
- Conducted comprehensive testing, including unit, integration, and user acceptance testing (UAT), to validate system performance and accuracy.
- Demonstrated exceptional organizational skills by efficiently coordinating defect creation and prioritization to maintain an effective defect management process.
- Collaborated with cross-functional teams to gather requirements, develop functional design specifications, and provide expert recommendations on SAP EWM solutions.
- Drove pre-sales initiatives for new SAP EWM implementations, advising customers on optimizing their current business processes and transforming them using cutting-edge SAP EWM solutions (both public and private cloud options).

Technology Consultant | SAP Testing | Retail Order to Cash (SAP OTC)

Company : QVC Retail – Rizing LLC

- Led SAP testing initiatives for Rizing Inc's client, QVC, encompassing multiple SAP streams including SAP PP, MM, Reporting, SAP FICO, Core Finance, Logistics and Fiori
- Played a pivotal role in leading the Integrated Test Cycle (ITC) and User Acceptance Testing (UAT) phases, collaborating closely with business stakeholders to validate system functionality and ensure alignment with business requirements.
- Managed defect resolution throughout the testing lifecycle, actively identifying, documenting, and tracking issues to closure.
- Demonstrated exceptional organizational skills by efficiently coordinating defect creation and prioritization to maintain an effective defect management process.
- Proficiently utilizing SAP Solution Manager for various tasks such as project management, test management, and application lifecycle management.
- Leveraging the Test Suite component of SAP Solution Manager to plan, design, and execute end-to-end testing scenarios, ensuring comprehensive coverage and adherence to testing best practices.
- Successfully conducted comprehensive testing to ensure seamless integration and functionality between the Order to cash, Order accounting and supply chain.

Project Manager | Testing Consultant | Automation Lead

CBSA Government of Canada– Deloitte, Canada

- Took ownership in developing over 1000 + test scripts, independent testing of multi-functional CARM solution for multiple life cycles (SIT, UAT, FUT, Release 1/ Release 2).
- Defined the test journey for the business user and developed functional testing scenarios from functional specifications.
- Led functional integration testing discussions with the business shareholders as well technical functional teams.
- Provided testing lifecycle blueprint to other teams to create a successful and efficient testing mechanism for the client. Helped the disaster recovery team with a step-by-step testing procedure which included (test cycle creation, JIRA coordination with client, how the information will flow from JIRA to reporting, Mapping test cases from main directory to current cases in the execution cycle). The system was successfully created to support clients such as UPS, Fed-ex, GSK etc.)
- Provided knowledge transfer to multiple functional teams within the CARM umbrella. Organized JIRA breakdown and automation to over 5 functional teams (PSCD, Master data, Internal Portal, Performance, DR) and over 20 independent resources.
- Led UAT test case automation with JIRA. Managed a team of two team members to manage the automation. Worked directly with the client to determine the most efficient procedure. Provided direct knowledge transfer about the automation procedure and methodology. Successfully automated the production of 1500 + test cases in JIRA.
- Functional testing within the SAP FICO & SAP PSCD modules to target SAP Core Finance integration
- Received the Deloitte Gold Dot Award as well as a SAP recognition award for successful implementation efforts

SAP EWM Functional Consultant,

Weston Foods – Deloitte, Canada

- Lead functional consultant for SAP S4 EWM migration (4 plant implementation)
- Provided direct hypercare support post-SAP EWM implementation, actively resolving warehouse-related issues and ensuring minimal disruptions to operations
- Conducted hands-on training sessions for warehouse personnel, empowering them to efficiently use the SAP EWM system and perform their tasks effectively.
- Developed detailed test scripts and conducted functional, integration, user acceptance, and regression testing for the SAP EWM solution.
- Configured and customized SAP EWM to align with the unique needs of the business, setting up master data, organizational structure, and warehouse processes.

SAP EWM Consultant,
Bombardier Aerospace – Beelogix, Canada

- Inbound and outbound process configuration in SAP EWM
- Collaborated with cross-functional teams and end-users to ensure a seamless integration of SAP EWM with other SAP modules, enhancing overall supply chain efficiency.
- Configured RF mobile data entry and RF devices, facilitating real-time data entry and processing in the warehouse.
- Customized and tested solutions on system and coordinated enhancements to meet business requirements
- Testing support for functional and systems integration. Direct hyper care resource.

SAP EWM Functional & Quality Assurance Analyst,
Indigo Books & Music – Brampton, Canada

- Maintained Indigo retail production and conducted technical analysis to ensure production efficiency.
- Engaged in one full lifecycle SAP EWM implementation of Indigo Calgary expansion. Customized and tested solutions on system and led enhancements to meet business requirements.
- Automated several EWM support queries and quality assurance workflows to increase efficiency by over 1000%
