Profile

Dedicated and results-driven Senior Scrum Master/Project Manager with over 5 years as leading agile transformation in cross-functional teams and driving successful project deliveries as a project master and overall experience of 11 years in progressive roles. Expert in implementing and enforcing Agile/Scrum processes, maintaining product backlogs for clear communication, and mentoring development teams to meet objectives. Skilled in facilitating daily stand-up meetings, sprint planning, grooming, retrospective and other agile ceremonies. Thrive on identifying impediments and addressing them, ensuring seamless project progress. Proficient in managing team metrics to advance team towards success. Proven ability to collaborate with product owners, prioritize tasks and ensure timely sprint deliverables. Experienced in developing and maintaining a shared product vision for team alignment. Proactive at resolving conflicts and conducting retrospectives to drive continuous improvement.

Employment History

Senior Scrum Master/ Project Manager, Client - Fidelity Investments, Boston

February 2021 — December 2024

Tools Used

Jira, Confluence, SharePoint, Reetro.io, AgileBin, EasyRetro.io, AWS

- Facilitated daily stand-up meetings, sprint planning sessions, and retrospectives to ensure team alignment and collaboration.
- Mentored and coached the development team to ensure they had the necessary skills and resources to meet team and business objectives.
- Developed and managed team metrics, such as velocity and burn-down charts, to measure progress and identify areas for improvement.
- Created and presented reports and presentations to senior stakeholders, demonstrating project progress and results.
- Presented project updates to senior executives, resulting in increased trust and confidence in the team's capabilities.
- Worked closely with team to maintain product backlog that facilitated communication and visibility of project progress to stakeholders.
- Groomed team to accept regular feedback for better product quality.
- Tracked and monitored project progress to ensure deadlines were met, identifying/addressing risks and issues as needed.

- Led a cross-functional team of developers, product owners, and business stakeholders to successfully deliver major AWS migration projects on time.
