

- SIMSIMA GAFOOR -

Flutter Developer

Dubai, UAE • (+971) 581-542-529 • simsimagafoor1@gmail.com • [LinkedIn](#) [BitBucket](#) [GitHub](#)

Experienced Flutter Developer with 3+ years of building scalable, cross-platform mobile and desktop applications. Strong background in Flutter, Dart, state management (Provider, Riverpod, Bloc), and industrial protocols (Modbus, RS-485). Proven success in e-commerce, energy, and task management domains. Skilled in Clean Architecture, API integration, Firebase, CI/CD, and real-time system monitoring. Passionate about writing maintainable code, crafting intuitive UI/UX, and collaborating with cross-functional teams to deliver impactful solutions.

PROFESSIONAL EXPERIENCE

Enercap Power Industries LLC, Dubai, UAE • Flutter Developer

11/2024 – 03/2025

- Developed and maintained cross-platform mobile applications using Flutter, enabling user-friendly interfaces for industrial energy solutions.
- Architected Windows-based desktop applications for real-time industrial system monitoring, ensuring robust performance and scalability.
- Directed the integration of industrial communication protocols such as Modbus RTU and RS-485 to enable seamless hardware-software interaction.
- Collaborated with R&D, embedded, and electrical engineers to design and deploy applications that support energy storage and monitoring products like EnCafe, Encap, and Enwall.
- Implemented real-time data visualization features, allowing efficient monitoring and control of industrial systems.
- Designed modular and reusable application architectures to improve development efficiency and maintainability.

UST, Trivandrum • Software Engineer / Flutter

02/2022 – 04/2024

- Developed and maintained responsive application for Android, iOS, and Web using Flutter and Dart.
- Developed a Task Manager App using Flutter, enhancing task tracking and team productivity by 25%.
- Implemented real-time task monitoring, progress tracking, and automated notifications, improving team accountability and communication using Tibco Software.
- Developed an incident management system using Flutter to streamline the tracking and resolution of production issues, integrating with JIRA for ticketing and status updates.
- Deployed applications and implemented integrations, addressing production issues and meeting customer needs.

- Performed root cause analysis for production errors and resolved technical issues effectively.
- Integrated payment gateways and implemented OTP/email verification for enhanced security.
- Collaborated with design teams using Figma to create user-friendly interfaces across multiple devices.
- Established back-end connections using Firebase and SQL databases, optimizing data management and retrieval.

Goyalo Safaris, Kochi • Flutter Developer

10/2020 - 10/2021

- Designed and developed cross-platform mobile applications, ensuring compatibility across devices.
- Developed an eCommerce app featuring seamless shopping, multiple product categories, and secure payment integrations.
- Engineered a speech recognition system for voice-activated search and navigation, improving accessibility and user engagement.
- Oversaw the app lifecycle, including UI/UX design and API integration, ensuring optimal functionality and performance.
- Collaborated with backend teams to implement real-time data synchronization, resulting in a 20% increase in customer engagement within three months.
- Leveraged Firebase for cloud storage, real-time databases, and push notifications, enhancing user retention.
- Used Git for version control and Jira for task management.
- Managed the mobile development lifecycle, deploying on Google Play and App Store.

SKILLS

- Flutter, Dart, Kotlin (basic)
- Provider, Riverpod, Bloc, GetX
- RESTful APIs, Dio, MVC, MVVM, Clean Architecture
- Firebase, Microsoft SQL Server, SQLite, Git, CI/CD
- Modbus RTU, RS-485, Cloud services , CRC
- Android, iOS, Windows Desktop
- Figma, B2B/B2C applications, OOP
- Cross-functional teamwork with Research and Development, Embedded, and EC engineers.

PROJECTS

- E-commerce Grocery Application: Developed a feature-rich application to facilitate online grocery shopping, integrating payment gateways and providing a seamless user experience across multiple platforms.
- Cafeteria Application: Designed and developed a Flutter-based app for company employees to browse menus, place food orders online using their employee ID, and make payments through integrated payment methods. The app streamlined the cafeteria experience, enhancing convenience and efficiency.

- Task Manager App: Created a task management application for a team of 20+ users to track tasks, monitor progress, and enhance team productivity through a user-friendly interface.
- Incident Management Application: Designed an application for efficient ticket updates and tracking, streamlining the incident management process for improved response times and accountability.
- EnWALL Application: Developed a Modbus Communication Service for seamless serial data exchange with CRC validation. Using Flutter, I built a real-time monitoring app to track temperature, power, and voltage from inverters and batteries via Modbus.
- Movie Search Application: A cross-platform app built with Flutter and Dart, integrating the OMDb API to search and display movie details. Used Riverpod for state management, Freezed for data modeling and JSON serialization, and Dio for network handling. Features include real-time search, movie detail view via IMDb ID, and clean, responsive UI. Follows a modular architecture with repository pattern and proper error/loading state management.
- Makeup Application: Flutter-based mobile app that enables users to explore makeup products and try them on using real-time face detection via the Face++ API. The app integrates Provider for state management and Dio for API requests. It offers a smooth and interactive UI, real-time syncing, and dynamic data handling to provide a seamless user experience.

CERTIFICATIONS

- Flutter & Dart - The Complete Guide (2025 Edition)
- Platform: Udemy
- Description: Updated for the latest version of Flutter and Dart, this course is extensive and includes new features and best practices.

EDUCATION/QUALIFICATION

B. Tech (IT) • College of Engineering Thalassery, Kerala, India
Graduation Year (2020)
