SUMMARY

Results-driven Senior .NET Developer with 4+ years of experience specializing in .NET Core, ASP.NET MVC, Web API, and microservices architecture. Expertise in RESTful API development, cloud-based solutions, and database optimization. Strong background in C#, Azure Data Services, Kusto Query Language (KQL), and Entity Framework. Adept at debugging, troubleshooting, and implementing Microsoft best practices and patterns. Proven ability to collaborate in Agile environments, mentor teams, and deliver scalable, high-performance applications.

EDUCATION

University of Maryland Baltimore County, USA

Jan 2023 - Dec 2024

Masters in Data Science, CGPA: 3.67/4.0

Relevant coursework: Machine Learning and Big Data Processing, Deep Learning, Advanced Excel in Business Management.

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, Python

Frontend: AngularJS, React, HTML, CSS

Backend: .NET Core, ASP.NET MVC, Entity Framework Core, ADO.NET, LINQ, Spring Boot, REST API

Databases: SQL Server, MySQL, KQL

Data Querying & Analytics: Kusto Query Language (KQL), Azure Data Explorer, Log Analytics Data

Development Tools: Microsoft Visual Studio, Jenkins, Postman, Selenium

Cloud & Data Services: AWS (Lambda, S3), Azure Data Lake (ADLS), Azure Data Factory, Azure Synapse Analytics, Azure Blob Storage

Methodologies: UML (Class, Sequence Diagrams), Agile, TDD, CI/CD, Secure Coding Practices, SDLC, Software Architecture

PROFESSIONAL EXPERIENCE

Client: CBTS, Cincinnati, Ohio, USA - **Vendor:** Accenture, Hyderabad, India

Senior Application Development Analyst

Sept 2022 - Jan 2023

- Led the design, development, and maintenance of secure enterprise web applications using Java and .NET Framework, ASP.NET Core, and C#, ensuring secure coding standards compliance to mitigate risks—a skill parallel to using software architecture techniques.
- Developed and optimized Kusto Query Language (KQL) queries for Azure Data Explorer and log analytics.
- Built scalable RESTful APIs with .NET Core and Web API, ensuring seamless integration with front-end applications.
- Built and managed data pipelines in Azure Data Factory, improving data integration efficiency by 40%.
- Collaborated with cross-functional teams using tools like Jenkins, GitHub, and Bitbucket, complementing Agile methodologies and streamlining CI/CD workflows.
- Enhanced Web API applications' front-end functionality with Entity Framework, JavaScript frameworks such as React, and others, thereby improving user experience and responsiveness—aligning with RESTful API and high-performance applications development.

Application Development Analyst

Dec 2020 – Sept 2022

- Developed and integrated ASP.NET Web APIs and WCF services, thus enhancing enterprise applications functionality—a foundation for efficient RESTful API development.
- Utilized React, JavaScript, HTML, and CSS, to develop interactive front-end components that enriched customer experience—a pertinent skill for High-Performance Web Application creation.
- Integrated Azure Data Lake (ADLS) and Azure Blob Storage, enhancing cloud data storage solutions.
- Migrated a legacy system to a subscription-based platform using ASP.NET MVC, leveraging modern architecture and database management.
- Integrated Azure Data Lake and Azure Blob Storage, improving data storage and retrieval speeds.
- Implemented Azure Data Services such as Data Factory and Synapse Analytics, optimizing big data processing.

Application Development Associate

Dec 2018 - Nov 2020

- Designed and implemented web applications for telecom clients using ASP.NET MVC, AngularJS, and RESTful APIs, improving system functionality and customer satisfaction by reducing troubleshooting time by 40%.
- Implemented CI/CD pipelines using Azure Pipelines and GitHub Actions, improving deployment efficiency.
- Leveraged Azure DevOps for continuous integration and deployment, increasing deployment efficiency by 30% and reducing manual errors.
- Deployed event-driven microservices using AWS Lambda, streamlining backend processes and improving system responsiveness.
- Supported CI/CD pipeline setups and testing, ensuring reliable code integration, builds, and deployments within Agile project sprints, which improved team productivity and reduced integration issues.

ACADEMIC PROJECTS

Deep Dive into COVID-19's Impact on Hospital Systems | Python, Power BI, Machine Learning

Sep 2023 - Dec 2023

- Implemented classification and regression models to forecast staffing shortages and hospitalization patterns, analyzing over 71,000 data entries. Applied CRISP-DM methodology to uncover data trends, optimize predictions, and support operational decision-making. Built Power BI dashboards for continuous tracking and presented findings to stakeholders for operational adjustment.

Fraudulent Transactions in Credit Card Data | Python, Machine Learning, Streamlit Web App

Sep 2024 - Dec 2024

- Developed a fraud detection system leveraging machine learning on 555,719 credit card transactions, achieving 99.63% accuracy with a Random Forest model. Addressed class imbalance using SMOTE and enhanced features through data engineering. Built a Streamlit web app for real-time fraud detection, enabling interactive user predictions. Delivered insights through Python-based analysis and visualizations, supporting proactive fraud prevention strategies for financial institutions.

ACHIEVEMENTS

- Rewarded for Excellence:** Led critical application migration to the cloud, saving \$150K annually and improving reliability by 30%.
- Leadership Awarded:** Optimized enterprise data pipeline, saving \$100K and boosting processing speed by 40%.
