

SIVA KUMAR GAMPALA

Sr. Mulesoft Developer

Phone : +1-(248)346-1640

Email : sivakumarg2009@gmail.com

Linkedin : www.linkedin.com/in/sivakumargampala

PROFESSIONAL SUMMARY:

- Senior MuleSoft Certified Integration Developer & Architect with over 11 years of extensive experience in the IT industry.
- More than 7+ years of experience in implementing solutions using MuleSoft ESB by using various integration design patterns.
- Expertise in Business requirement analysis, participating in design discussions & preparing design documents.
- Proficient in Identifying, analyzing, and developing API's, integration flows using MuleSoft AnyPoint Platform including Mule Design Center, Exchange, API Manager, AnyPoint Studio, Connectors & Runtime Manager and also implementing security, logging, auditing & policies for developed API's by following industry standards.
- An excellent problem solver, able to quickly grasp complex problems and identify opportunities for improvements and resolution of critical issues.
- Over the period worked with both Onpremise and CloudHub versions of MuleSoft ESB and gained good technical expertise.

CERTIFICATIONS:

- MuleSoft Certified Integration Associate
- MuleSoft Certified Integration Architect - Level 1
- MuleSoft Certified Developer - Level 1
- Salesforce Certified AI Associate
- Certified Kubernetes Administrator
- Workato Automation Pro-I , Pro-II & Pro III

TECHNOLOGIES:

- **Integration:** Mule 3.x, Mule 4.x, AnyPoint Platform, Apigee, Workato
- **Programming:** Java 1.8, SQL, PL/SQL
- **Framework:** Spring, Spring Boot, JUnit, Cucumber, MUnit
- **Tools:** AnyPoint Studio, Eclipse, Spring Tool Suite, ReadyAPI, SoapUI
- **CI/CD:** GitLab, BitBucket, CloudBees Jenkins, Atlassian Bamboo, Github
- **Log Monitoring:** Splunk, New Relic
- **Project Management:** Agile , VersionOne, JIRA, Confluence

PROFESSIONAL EXPERIENCE:

August 2024 – Present

OpenLogix Corporation , a K2 Company - Software Engineer

Client: UCSF - MuleSoft Developer

Project : Clinical Research - EAI

- Articulated requirements precisely by participating in business requirement/design discussions with clients and prepared design documents.

- Developed Event driven, Scheduler, Batch & REST API based Mule apps which integrates data between different systems.
- Developed Mule apps to sync data from US Federal ClinicalTrials site to Salesforce.
- Enhanced existing application to replicate research sponsorship data from Salesforce to MS SQL Server.
- Involved in 4.4 to 4.6-Java 17 Mule runtime upgrade impact analysis and development activities.
- Built automated test suites for the developed integrations using MUnit to ensure efficient and quality code is delivered
- Deployed developed apps through Github-Jenkins integrated CI/CD pipeline to Cloudhub and secrets/certificates management are done through cloud based Keeper Security platform.

November 2021 – August 2024

Client: Allegis Group - MuleSoft Integration Lead

Project : Bullhorn Onboarding - Appian BPM & SmartERP is being replaced with the Bullhorn platform.

- Articulated requirements precisely by participating in Business requirement/design discussions with clients and prepared design documents.
- As part of Design First Approach designed API specification using OAS 3.0 industry standards.
- Developed event driven, scheduler, SOAP & REST API based Mule apps which integrates Salesforce with different partner systems like Abbott EScreen, Sterling, Fragomen, Bullhorn TP, SailPoint & MDM using various components and connectors like HTTP, JMS, Scheduler, JDBC, ObjectStore & Amazon SQS, Azure MS SQL, Salesforce, WebServiceConsumer etc.
- Engaged in internal & external code reviews to ensure efficient and quality code is delivered.
- Analyzed code quality checkmarx scan report generated for the developed Mule apps and fixed the issues.
- Analyzed and migrated existing Informatica ETL jobs to MuleSoft which syncs data from Oracle Peoplesoft to Salesforce.
- Mentored the team of 7 developers and responsible for deliverables as per the stipulated timelines.
- Enhanced custom logging framework built on Mule SDK to improve the logging mechanism.
- Incorporated changes in custom suspended framework as per the standards to ensure reliability.
- Externalized environment specific properties of each app to centralized Bitbucket repo and utilized SpringConfig server mechanism to load application properties during runtime.

Project : Evolve - Scope of this project is to replace PeopleSoft with Oracle Fusion as a result developed a new set of Mule apps catering to the Oracle Fusion data model.

- Implemented different Mule applications to integrate various systems like Salesforce, Oracle Fusion, Appian BPM, MDM, Snowflake, SailPoint, MarketSource, Fragomen & Cornerstone etc.
- Developed wrapper APIs for Oracle Fusion APIs to enable seamless integrations.
- Enabled XA Transaction Management while syncing data to Oracle and Snowflake DB.
- Achieved OAuth token cache mechanism by using ObjectStore.
- Developed reusable dataweave libraries and published to Anypoint Exchange.

Project : ESF Modernization - Development of different APIs using the API-Led Connectivity approach for different operating companies to simplify the employee onboarding experience.

- Enabled API Proxy for the developed Mule REST API using Apigee API Management platform.
- Developed APIs were secured by applying JWT Validation policy & Cross-origin policy.
- Migrated Mule apps from Mule 3.9 to Mule 4.3 version.
- Handled complex data transformations using dataweave language.

August 2021 - November 2021

Accenture – MuleSoft Application Development Specialist

Client: AON Insurance

Project: Digital Transformation - Development of MuleSoft-based apps to integrate different systems like Marketo & Dynamics CRM, etc.

- Pioneered event driven solution approach to migrate traditional poller based apps which syncs data from Microsoft CRM to Marketo and improved the performance of data sync process.
- Developed API's using HTTP Listener ,Scheduler ,HTTP Requester and all other important Mule components like Scatter-Gather, JDBC connector etc .
- Developed API's are secured by Client Id enforcement policy.
- Attended weekly status calls with the stakeholders and provided status updates.

April 2019 - August 2021

Infosys Limited - Technology Analyst, MuleSoft

Client: Bank of America

Project : Global Payment Processing System - Development of different payment flows related to different countries across the globe.

- Involved in development of various flows using different connectors like HTTP, File, SFTP, VM & JMS etc.
- Developed REST APIs using Mule ESB, Java, Spring & Spring Boot frameworks.
- Fixed the issues and vulnerabilities reported in SonarQube code scan report.
- Transformed canonical XML payment files to ISO20022 PAIN standards using Mule XSLT transformer.
- As part of India UPI Request to Pay project developed a crucial orchestration app which calls multiple APIs and improved performance to meet the stipulated SLA .
- Configured Splunk alerts to notify critical errors related to payment flows to the respective stakeholders.
- Promoted code to low level environments in on-premises mule runtimes through Jenkins pipeline.

December 2013 - April 2019

Tata Consultancy Services – Software Engineer (Java)

Client: Saudi Telecom Company (stc)

Project : Business Support System Transformation - Scope of this project is to leverage MuleSoft ESB to integrate different systems like Siebel CRM, Comptel OM, NetCracker Billing, Aleppo, & WFM, etc.

- Developed different REST APIs for both B2B and B2C systems using different connectors like HTTP Listener & Requestor, JMS, FTP ,SFTP, JDBC and components like Choice, Scatter-Gather, Transform Message, For-each etc.
- Acquired an onsite opportunity as part of the assignment and surpassed the client expectations, received accolades for the same.
- Supporting production deployments and doing post deployment validations.

Client: BSNL

Project : Call Data Record (CDR) & NGN (Next Generation Network) - Transition to the latest systems like Siebel CRM, Clarity OSS, Kenan Billing, etc. for providing efficient services to the customers.

- Involved in development of order management and provisioning systems on the top of Clarity OSS/BSS product for Landline & FTTH services using JAVA, Spring & Unix technologies.
- Written stored procedures, functions, views & cursors etc and gained good knowledge on PL/SQL stack.
- Actively engaged in UAT along with stakeholders and ensured to close the UAT in quick time.

EDUCATION:

- Bachelor of Technology: Electrical and Electronics Engineering from VR Siddhartha Engineering College, Vijayawada.
